Hattersley out to 'raise hackles' in campaign

By Julian Haviland, Political Editor

Mr Roy Hattersley, in an supporter of Mr Kinnock, made appeal yesterday to many of the out lower-paid workers whose votes he needs in the Labour Party's leadership contest, advocated an "incomes policy which makes sure that inflation is hold down and real earnings are preserved" and which "produces a better deal particularly for the bottom of the incomes scale."

scattning about the "pathetically inadequate" organization at the party's London headquarters and the incompetent campaign arrangements.

Labour's experiments.

It might be that his destiny during the campaign was to raise a few hackles, he said, "but the idea that free collective bargaining, which is essentially the victory of the strongest, which has left the public sector workers, the agricultural workers, the shopworkers so far behind, that that manifestation of the free enterprise system should be a canon of socialism is simply bizarre."

Mr. Hattersley said that a

credible arrangement with the unions about wages was one essential element lacking from Labour's economic policy at the general election, a policy that was "literally incredible".

The party had been afraid of talking about it, he said, in case

someone "parrot-cried incomes policy, incomes restraint".

Mr Hattersley was discussing on BBC radio's World. This Weekend his personal manifesto which is being some to land esto which is being sent to local Labour parties, trade unions and other affiliated bodies, and Labour MPs, all of whom have votes in the electoral college.

Mr Hattersley, who is gene rally believed to be some way behind Mr Neil Kinnock in votes pledged or expected, said that the contest was absolutely

The best assessment-was that Mr Kinnock was substantially ahead in the constituencies, that he himself was slightly ahead among Labour MPs, and that each could be sure or nearly

of the trade union vote uncommitted, he said, so it was far more open than Mr Clive Jenkins, a leading trade union

In his manifesto Mr Hatters ley called for changes in party policy and organization. He was scathing about the "pathetically

was a net vote loser, he wrote in his manifesto. Their vague hopes of achieving growth through government spending were barely understood and rarely believed.

The British people, not being stupid, realized that the whole strategy lacked two
essential ingredients a coherent
plan for investment and a
scheme to combat inflation."

If they were to respect and trust the people they must begin to listen to their opinions on the policy which lost the party most votes: defence and disarmament. The party's opposition to rejection of Trident, was widely shared. "But the notion that we might give up our nuclear protection if others did not do the same was overwhelmingly

Mr Kianock's election address, which he cails his "statement of views", is to be published today.

A third candidate, Mr Peter

Shore, speaking in Sheffield last night, said that Labour's defeat was because they lost contact with their traditional sup-porters, and ceased to be the party which millions knew, respected and trusted, and because their edergies had been turned not against the Con-servative enemy but against themselves.

They must reappraise policies, and see that the "cultural revolution" was over which had

and purify the party, he said, no theme was stronger or more poisonous than the charge of betrayal levelled against the party's elected representatives.

Bride's car hijacked in jailbreak

Bastia, Corsica (AFP) - Four dangerous prisoners have brought off a spectacular escape here, hijacking a wedding car and forcing the bride-to-be to help them.

The escape, which would seem far-fetched in a film, began in the early afternoon on Saturday. One of the four opened the cell with a key. Then they spent several bours sawing their way through the prison bars unnoticed. They scaled the outside wall of the prison, a former convent, with a nylon rope bound in rags to avoid rope burns, and slid down 15 yards to freedom.

Then they hijacked the wedding car fresh from being decorated at a florist's. The alarm was eventually raised by

the young bride-to-be, who had been at the steering wheel. The most surprising aspect of the affair was that four men with such records should have shared a cell. Christian Leandri, aged 28, and his brother Jacques, aged 29, had been jailed for seven years for a bold-up in Paris. Daniel Casanova, aged 30, a former professional footballer, had been convicted of taking a hostage in March this year, releasing his captive after 12

hours of negotiations

The fourth man, Constanting Guagnin, aged 24, who had been freed on March 16, had landed back in jail within days charged with the attempted murder of a former partner in

Chicken coup

Chicken is likely to take over from beef as Britain's favourite meat within the next year, Mr Centre, said yesterday.

'Aid boost' for Central America

From Mohsin Ali Washington

The Reagan Administration is considering a 40 per cent increase in military aid next year to its Central American allies, the New York Times said in a front page report yesterday.
It added that the proposal for the increase was made in a classified report outlining US options in the region. But it added that White House officials said no decisions had been made about increasing involvement and called the report a "working paper".

They said it formed the basis for high-level discussions but did not necessarily contain the final options now under con-

The report said that the contemplated aid increases could include a doubling of security assistance to Costa Rica, an 80 per cent increase in aid to Guatemala and an increase of more than 30 per cent to El Salvador and

Administration officials said that one key recommendation had already been approved by President Reagan. This was a suggestion to establish a special United States top-level commission on Central America, without veto power over White House decisions, to try to build bipartisan support for the Administration's policies.

The Washington Post, in its main front page story on Saturday, reported that President Reagan would this week name a bipartisan study commission to make wide-ranging recommendations on United States policy in Central Wilson Marshall, chairman of America, including a possible the British Chicken Information economic assistance "Marshall Plan" for the region.

Helicopter may have hit seagulls

Reason for Sikorsky crash remains a mystery

From Craig Seton, St Mary's

Department of Transport investigators were waiting yes-terday for the wreckage of the British Airways Sikorsky 61 helicopter to be lifted from the seabed a mile off the Isles of Scilly to find out why it crashed and sank almost immediately, killing 20 people on board, including eight children.

Six people, two of them children, who were orphaned by the crash, escaped after the aircraft's flotation system apparently failed.

The survivors were rescued by the St Mary's lifeboat after 30 minutes in the water.

Early signs indicate that the sought to "manacle" the next Sikorsky, flying from Penzance Labour government so that it to St Mary's in fog suffered would not betray the Labour severo mechanical failure or hita flock of seaguilis at about a in the campaign to cleanse hundred feet, plunged out of control and broke up, at least partially, when it hit the sea.

Normally the passenger heli-copter would have been able to float in an emergency if it managed to touch down under some power, but the lifeboat, which was first to arrive, found which the undercarriage re-tracts, floating on the surface.

Mr Matt Lethbridge, cox-swain of the lifeboat, yesterday described the scene: "We could

not believe it. We expected to see the belicopter floating on the surface. To find half a dozen people floating around in thick log was really unbelievable".

The survivors, two pilots. two Scilly Isles women and two

children, were without life-jackets, suggesting there had been little or no time to prepare for ditching.

Divers are also reported to have found dead and mutilated seagulis floating on the surface, which may have caused the disaster, two minutes flying and a brother and sister died. Ellen Hanslow aged 15, an only child, lost her parents.

Air traffic control at St Mary's had lost contact with the aircraft at 12.58 pm and it appeared there had been no time to send a May Day.

The accident was the first since the helicopter service since the helicopter service between Penzance and the Scillies began in 1964. More than a million passengers have been carried. At the peak of the holiday season up to 12 flights a day leave Penzance for the popular islands' resorts.

sentence. I am taking my wife and family away from this country just as soon as I can get the money together."

Mr Michael Foot, the Labour leader, laying a wreath at the grave of James Hammet, one of

Mr Twomey said that the Metropolitan Police had recently made him a cash offer believed to be a five-figure sum - as a settlement for the 17 months he spent in custody after his arrest in 1977 on bank robbery charges. He claimed that two sawn-off shotguns and a £10 note from the robbery bad been "planted" at his flat. At his trial the prosecution offered no

evidence:
He said yesterday: "If I stay in England I know they are going to fit me up again or even kill me. I have no future here".

Mr Twomey had been on trial since January, charged with four armed robbery and firearms offences. He was cleared by a jury in March on two of the counts. But they failed to agree "I told two juries that I had a on the remaining charges bad record in the past, 13

day retirement, a second jury could not reach verdicts and Judge Brian Gibbens, QC, told them: "Enough is enough". Mr Twomey was found not guilty.

The chief prosecution witness was a "supergrass", fidward "Toggi" Ludlow, aged 35, from Acton; who is serving a sevenyear sentence for a string of crimes. He admitted being involved in two raids on security guards at Stonebridge Park station in which a guard was shot and wounded, and implicated Mr Twomey. -

Mr Twomey, who stayed in the cells below court for long periods of the trials because he had "no interest in hearing lying accounts", was arrested while giving evidence for the prosecution in a trial which ended with the acquittal of four detectives who denied corruption charges.

Mr Twomey said yesterday: arising out of two robberies at previous convictions, but I have Stonebridge Park underground been trying to lead an honest station, and a retrial was life for a long time. Then along ordered comes this diabolical so-called On Saturday, after a three- supergrass."

RUC men with 350 fire bombs

From Richard Ford Belfast

Masked youths pelted Royal Ulster Gonstabulary officers with about 350 petrol bombs during more than four hours of rioting in Londonderry on Saturday night.

Trouble broke out in Ros-

sville and William street, where police have been attacked with stones and petrol hombs after public houses closed. Several rounds of plastic bullets were fired to disperse the crowd after a building was set on fire and police vehicles scorched by bombs. There were no reports of injuries.

Tension in the city increased after Roman Catholic families were intimidated in their homes in Donemana by a "loyalist" mob after an IRA land mine killed four members of the Ulster Defence Regiment last

Roman Catholic youths retaliated by petrol-bombing the only Protestant housing estate on the predominantly Roman Catholic side of Londonderry. Saturday's rioting was seen as a continuation of that incident. The attack on the "lovalist"

Fountain Estate was con-demned by Mr Martin McGuin-ness, Provisional Sinn Fein assembly man for the city, who described it as "anti-republican and stapid."

A 400 lb bomb intended to be used against security forces was discovered on Saturday. Homemade explosives packed into an oil drim were found under a bridge near Swatragh, co Lon-donderry. A command wire led to a vantage point near by.

A police constable aged 18 the Tolpuddle Martyrs, after he had marched with agricultural labourers in Dorset' was said to be comfortable in hospital yesterday after he wa shot in the stomach as he directed traffic arriving for the Castlewellan show in co Down on Saturday, The gummen held a family hostage overnight and then escaped in their car. A Provisional IRA attack on

the Springleld Road Army and police base in west Belfast on Friday failed after a missile went out of control. It hit railings around a house, a parked van and kerb before smashing the rear window of a parked car, ricocheting across the road and passing through the upstairs window of a house and landing in a bedroom.

A woman in the house was not injured and the base was not damaged in the attack which was described by the police as "totally irresponsible". A police spokesman said

yesterday that the Provisional IRA had claimed the missile was an anti-tank weapon, but they were still investigating. The missile was not the type used by the IRA in similar

The Rey Ian Paisley, leader of the Democratic Unionist Party, has been granted a visa to enter the United States or condition that he avoids involvement in politics. Mr Paisley is to attend a religious conference in South Carolina after being given a visa valid to the end of next month.

continue to look inward, to be preoccupied with the require-ments of its own activists voters; and the Alliance would have to avoid making the same mistake. If would bave to convince the electorate that it was a serious political force. The evidence of the Liberal

Council at Chester on Saturday, the first opportunity for Liberals to get together natio-nally after the election, was not altogether reassuring. The issue over which the con got most excited was the support given by leading figures in the party to the Social Democrat who stood as the Alliance candidate at Liverpool Broadgreen in the election, rather than to the Liberal candidate who stood in defiance of the party leaders.

After a closely contested private debate, the council refrained from censuring the party's president, but none the less deplored the actions of "certain prominent Liberals". It was a perfect example of an obsession with the past, with the party's internal affairs and with a narrow approach to the

Potentially traumatic

The far more important question on the agenda at Chester was how the Alliance should contest next year's European elections, a subject which will also be discussed at the SDP National Council today. This issue matters, 1722 partly because it will be extensely damaging to the Alliance's public reputation if there is bitter squabbling over a pict. and parily because whatever arrangement is made may have long-term implications for the future relationship of the two

selection of candidates for the European elections, so that in members of the Liberal and Social Democratic parties should be able to decide together who should represent them. This would avoid the potentially traumatic and cerof dividing up the seats of dividing up the seats of between the two parties; it would accord with the wishes of many Social Democrats as well as Liberals at local level; and it would both symbolize the unity of the two parties and and help to draw them still

Democrats are wary of being sucked too closely into the Liberal orbit. They do not want the parties to be merged and see joint selection as a stalking horse for a merger. The new party leader, Dr. David Owen, has made it clear that while he favours close collaboration between the two. collaboration between the two parties, he wants to preserve their separate identities.

He sees proportional representation as the principal objective of the Alliance, recognizes that once it is achieved there would no longer be the same electoral imperative for the two parties to operate as a single force, and believes that under PR they could be most effective as separate entities, true to their own natures, but as natural coalition partners.

There is logical force in this argument, but I believe it ignores certain political realities. It concentrates too much on how the parties should conduct themselves under PR, and too little on how they can secure the power without which they will never have PR. It assumes greater differences between them than is evident to the electorate or, indeed, to many members of both partis who are eager to in join forces at local level. Above all, it takes too little account of the public expectation that they will operate to ail intents 2 and purposes as a single political force.

This does not mean that they would be wise to have a formal merger now.

Operation minefield advances

minefields around Port Stanley in the Falkland Islands has been substantially reduced in Areas totalling over 80 sq km which last November were

still thought to contain minefields, have been declared free of mines. That has reduced by well over half the area within 20 to 25 km of Stanley which was thought to contain mines.

In addition, the koyai Engineers have made progress in methods of detecting the mines. Of about ten types of mine which were laid in the Falklands by the Argentines, there is thought to be only one type which cannot be reliably detected. That type probably detected. That type probably accounts for under 10 per cent

After the recapture of the Falklands last year, attempts at clearing minefields were suspended once the immediate ricinities of Stanley and the airfield had been declared safe. That was because there were many plastic mines which could not readily be detected, and because the conditions of the Falklands add to the difficulties of detection. Many of the mines are lying in soggy peat. It was decided that risks which might have been toler-ated while the fighting was on were not acceptable when the conflict had ceased and that clearance would not be resumei entil means had been devised of

to reduce the area of suppos minefields. That is largely because captured Argentine maps of the minefields have proved much more reliable and comprehensive than was originally thought.

Lonely lot: PC Mackleworth, the Dixon of the dock scene, goes about his duty on the 480 acre patch which is the centre of redevelopment by the London Dockland Development Corporation. (Photograph: Bill Warhurst).

PC on the beat where no one lives

By Stewart Tendler, Crime Reporter

P.C. Colin Mackleworth is a Metropolitan Police home beat officer, one of those tiny fingers at the end of the long arm of the law sent out into the streets in increasing numbers to find or rebuild relationships with the public.

But working a few miles east of Scotland Yard PC 278H has a beat unlike any other in London or perhaps Britain, No-one lives on PC Mackleworth's beat - unless the growing population of fish at his feet and birds above his head count. His beat is the 480 walled

acres of what used to be the West India, Millwall and Poplar docks which span the Isle of Dogs in London's East End. It is now the centre of

redevelopment by the London Dockland Development Corporation. On a hot summer's day PC

Mackleworth paces Herons Wharf as a water skier swishes past in what was the export section of the West-India Dock. Helicopters chatter overhead bringing visitors from an inquiry into road plans. Port of London barges, now redundant are moscool. now redundant, are moored near by and a huge carp idles beneath them among shoals of other fish,

The constable first crossed the threshold of West India Dock's number one gate last December, entering what is still private property nutil the great walls of the early nineteenth-century docklands

se decided it would be a worthwhile investment to introduce a police presence as the face of the docks began to

P C Mackleworth, aged 37, with 11 years experience, admits he was less than keen to exchange the normal life of policing on ordinary streets-for the potentially lovelier life of the docks. A hive of construction work, his beat threw up mud in winter and dust in

developments for small busi-nesses. Billingsgate Market moved downstream from its old site, and large-scale ents which are being

people working in the docks but at twilight the place is left

P C Mackleworth tends to work a day shift, getting to know local firms as they set up, liaising with security men and his colleagues on the other side of the walls

His writ is somewhat limited. He can, and has, made arrests, two to date, but he can do nothing about driving offences because the roads are still private.

He has pulled his first corpse from the grey water, using a borrowed dinghy, and there are signs that the docks could present criminal prob-

CND rally will call for arms freeze

The Campaign for Nuclear Disarmament is to make a call for a freeze on nuclear weapons one of the key themes for its big London demonstration planned for October.

With the general election result having provided a big setback for the campaign, CND is emphasizing to its local groups that a big turn-out in October is needed to restore momentum. Stickers asking "Where will you be on October 22?". to be followed by stickers urging people to "Be in London", are being distributed.

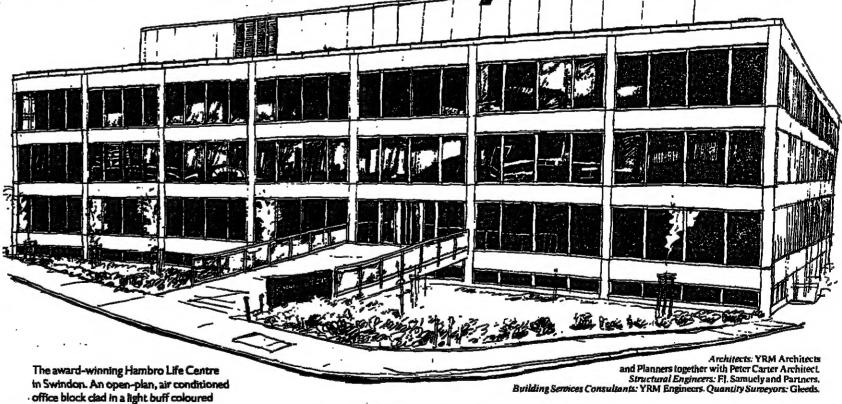

At the national council meeting at the weekend, the campaign decided to broaden the themes from opposition to the freeze movement, which has been gathering support in the United States, and to take in opposition to the new Tornado aucrast which have a nuclear

Mgr Bruce Kent general secretary of CND, said yesterday: "We are doing our hest to broaden our base to involve people who are concerned about the freeze. "There are a lot of people who may not have got into the precise arguments about cruise. Trident and SS-20s, but who see the urgent need to stop the escalation of nuclear weapons at all levels. CND should be reaching out to people who may not agree with us from A to Z, but do agree from A to K'

Support for a freeze did not imply any lessening in oppo-sition to Trident and to cruise missiles which are due to be deployed in Britain by the end of the year, as they would be covered by a freeze, he said. CND would support both the

United Nations' Association's proposals for a multilateral freeze, and the United States freeze movement which wants a bilateral negotiated freeze between the superpowers, but which has also opposed cruise and Pershing as a first step, and individual steps to freeze nuclear weapon deployment.

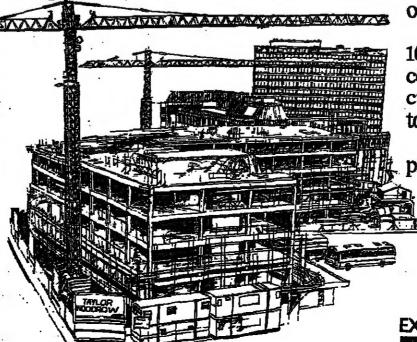

When Hambro Life wanted to insure the best office construction, they came to us.

Taylor Woodrow is busy completing its second project for

Hambro Life Assurance. The first, the prestigious three storey Hambro Life Centre in Swindon, was awarded a commendation in the 1982 Financial Times Architecture at Work Awards.

Its 7,000 square metres of largely open-plan floor space and landscaped courtyard make it a very agreeable place in which to work. The second, when it is completed, will be a five storey, L-shaped office building worth some £9 million.

On its way to completion, the first part of the three-phase

Hambro Life Tricentre in Swindon,

The building, with a net floor area of about 10,000 square metres, is constructed in reinforced concrete and will be clad with glass and aluminium curtain walling with a special colour coating similar to the Hambro Life Centre. Perhaps it was the high quality of the first

project that won us the second.

But then, we've built our reputation on building the best.

Security breakthrough at Madrid

which side gained more

must wait From Richard Wigg

Madrid Delegates at the European security review conference are of a more stable and construcwaiting to see if Malta at today's plenary continues delaying tactics or whether they can all signal to their foreign ministers to come here for the concluding

Provisional agreement on a compromise "declaration of Madrid" was reached late on Friday by all the Western, communist and neutral countries attending, Malta excepted. Maita wants more attention paid to the Mediterranean region's security problems.

Speeches by the foreign ministers will indicate the way each nation answers the basic question at the almost threeyear-long Madrid gathering. Has the West or the communist block gained more?

One of the first results of the meeting could well be a Soviet propoganda barrage against the Americans installing the Euro missiles at next January's European disarmament conference, the single most significant product of Madrid, or at a prepartory meeting in October.

But on a longer-term basis, the advantages may well lie with the West from Madrid. This is essentially because neutrals such as Austria and Switzerland succeeded with patient diplomacy in sketching a final document, now accepted with compromises which favour the Western values these twocountries so obviously share.

Perhaps the best perspective from which to judge the outcome is from its worst moments, the eight month long recession last year under the impact of material law declared in Poland.

For months, the Reagan Administration manoeuvred to put the blame on the Soviet Union for the break up of the meeting in complete failure as a sign of the returned cold war. The neutrals last spring revised their draft after the Americans had returned to negotiate on the bidding of their

Mr Yuri Andropov, the Soviet leader, then held up things by refusing any Western amendment to the neutrals draft, but finaly accepted a Spanish compromise.

European allies.

Much thinking. Western diplomats admit, is required to prepare for the European disarmament conference, with a first stage devoted to confidence-building measures to reduce risks of surprise military

The extension of the area to he covered by the measures now the Soviet Union up to the Urals and from the Alantic Ocean the other way, is one of the Madrid gains. The mandate limits notification by the West to sea and air operations in the Atlantic only to when they are connected with Nato land forces movements in Europe. The Americans' rapid deployment force in the Middle East is thus

The Western allies have to decide on an incremental approach, notification of troop movements say up to 40 days. instead of three weeks as now. or combining this with new measures, for instance moving back bridging eqipment from the Elbe.

Nuclear weapons are not excluded from the disarmament conference, although the chief forum is obvously Geneva.

The West's task is to keep the debate on confidence-building measures, whereas the Russians are likely to prefer vague

disarmament proposals. The Helsinki process has no sanctions manchinery and so can only reasonably be asked to exercise political and moral pressure. Under the impact of Poland, the Madrid document upholds for the first time the rights of workers to establish trade unions

Question of Reagan says accord is step forward

President Reagan has announced that the US will sign the Madrid European security conference agreement "with the hope that it will serve as a step toward achieving our objective tive relationship with the Soviet Union".

In a special statement here on Friday night, he said that the US had agreed to the concluding document of the 35-state Madrid conference with "no illusions about the nature of the Soviet Union or about the system which it seems to impose over much of Europe".

He added: "In an ideal world, agreements such as this would not be necessary. But we believe it is the best agreement attain-able, one which significantly improves on the (1975) Helsinki Final Act and advances the efforts of the West to hold out a beacon of hope for those

in the East who seek a more free, just and secure life." Mr George Shultz, the Secretary of State, would be willing to go to Madrid to sign the conference agreement if other participating states thought it would be desirable for foreign ministers to do so, a senior State Department official said.

Such a trip would open up the possibility of a meeting in Madrid between Mr Shultz and Mr Andrei Gromyko, the Soviet Foreign Minister. They would be able to discuss arms control and other issues

The possibility of a summit-meeting between Presidents Reagan and Andropov might also come up. Both President Reagan and President Andropov have said they would be ready to hold summit talks if were carefully prepared and offered good prospects of

Shcholokov case tests 'Brezhnevite' strength

From Richard Owen Moscow

An empending decision on the fate of one of the late President Brezhnev's senior influence still wielded by leading "Brezhnevities" in Mr Yari Andropov's regime, informed sources say. Mr Nikolai Shcholokov, who

was Minister of the Interior under Mr Brezhnev, was dismissed in disgrace soon after Mr Andropov came to power, and may stand trial for corruption. If he is tried, Mr Sheholokov would face possible death sentence.

Mr Shcholokov, who is 72, climbed up the party ladder with Mr Brezhnev and was one of his closest associates for several decades. In a final act of ignominy, he was expelled from the Communist Party central committee at the June plenum. The announcement of his expulsion omitted the title "comrade", suggesting that further action is being prepared

Sources said that Mr Shcholokov was being protected by Mr Konstantin Chernenko, who was also a member of Mr Brezhnev's inner circle and was the late leader's choice as successor. Mr Chernenko, who is 71, was initially eclipsed in the power struggle which followed Mr Brezhnev's death, but has recently regained influence in the Kremlin. He made the main speech on ideology at the June plenum, and has subsequently received several foreign delegations.

Mr Chernenko is thought to have taken advantage of Mr Andropov's failing health to impose a stalemate in which the Soviet leader has been obliged to trim his reform programme and make con-cessions to the entrenched

bureaucracy he inherited Mr Andropov none the less appears determined to press on with his campaign against

Mr Shcholokov: Could

face the death penalty. corruption and incompetence, and is said to want to make an example of Mr Shcholokov, who allowed corruption in the Soviet police to proliferate, on Friday the Deputy State Pros-ecutor warned officials in Prarda that those found guilty of corruption and embezzle-ment would be brought to

The Pravda article revealed that a deputy fisheries minister had been executed for black market crimes last year. Before becoming party leader last November, Mr Andropov used his power as head of the KGB (secret police) to undermine close Brezhnev associates by implicating them in his anticorruption campaign.

arms deal

The Reagan Administration has announce plans for arms (about £345m), to the evident

critation of Peking. The plan, announced by the Pentagon on Friday, would bring total US arms sales to Taiwan to about \$660m in the urrent fiscal year.

China maintains that the US is obliged under a joint communiqué issued in August last year to reduce this year's total to below the 1979 figure of \$600m and to phase out all arms sales to Taiwan. But the Reagan Administration argues that after adjusting the 1979 figure for inflation its projected sales to Taiwan do not violate

agreement with China. The new arms package would include kits for upgrading old American-built M4 tanks, sea and land-based air defence missiles and spare parts for aircraft and tank recovery vehicles. It would not include advanced aircraft and missiles. Peking argues that the arms

sales amount to interference in its internal affairs because it regards Taiwan as part of

mpact of the stoppage, Mir The sales announcement coincided with the conclusion of talks here between US and Chinese officials on the possible sale of American civilian nuclear reactor technology to hina. American officials said that these discussion were very friendly, that they had made progress and that there would be further meetings.

Moi wants Britain to curb exiled **Africans**

From Charles Harrison

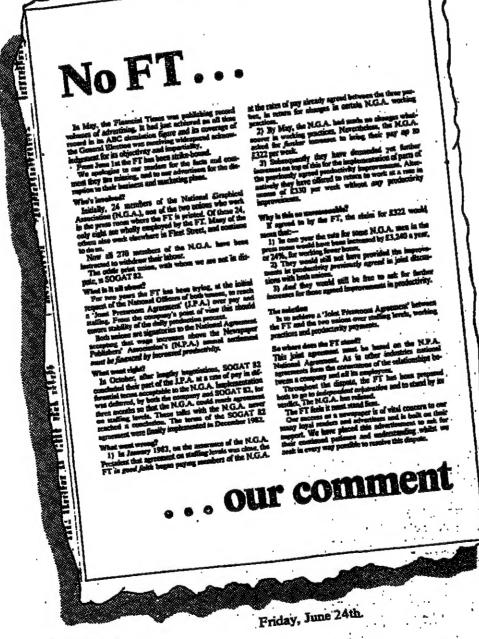

President Moi of Kenya has urged Britain to curb the activities of African dissidents in London. He made this point in weekend discussions here with Mr Timothy Raison, the ment, and Mr Malcolm Ri-kind, the Minister of State in charge of African Affairs. Mr Raison was completing a

tour of Kenya, in which he visited some of Britain's aid projects here. Mr Rifkind, who had just paid brief visits to Uganda and Tanzania, later chaired a meeting here of British high commissioners and ambassodars from a number of tinues today.

According to the official Kenya news agency, President Moi did not refer specifically to the small number of Kenyans who are in exile in Britain after an abortive coup attempt last year. But the Kenya Government is unhappy about their activities and attacks on the Government here which have received wide publicity.

According to the Kenya news out that democracy in Africa was younger than in Britain, and added: "You should restrain these dissidents from Africa who choose to attack venge' have not silenced the their home governments from

No FT. our second comment

Mediation

On June 29th, after a series of discussions at ACAS, the Financial Times and the NGA began talks under an independent mediator and two assessors to reach a Press Room Agreement covering staffing, pay and productivity -aiming to reach agreement by July 3rd.

The arrangements for these negotiations were formally agreed by both sides, and fully supported by Len Murray, General Secretary of the TUC, who confirmed in writing that the TUC "would expect both parties to respect the outcome of the agreed procedure and act upon its recommendations".

On July 3rd the mediator gave specific recommendations on staffing and pay as a prelude to negotiations on a Joint Press Room Agreement. These recommendations were immediately accepted by the FT, but, at a meeting on July 7th, were rejected by the NGA.

What did the Mediator recommend?

On staffing in the machine room he recommended, first, that the number of shifts per week should increase from the 64 proposed by the management to 66.

He recommended that when, in the course of a year, there had been more than 157 papers of 42 pages and above, there should be an additional two shifts working.

On pay he recommended a wage of £304.67 for a full week of four night shifts, and said that this should include the previously agreed productivity improvements which the NGA is refusing to implement

Why did the NGA say No?

Because the mediator's reconot give them the 191/2% differ seeking between themselves ar machine assistants. Nowhere is the differential between these high as 19½%.

andation did hat they were **OGAT 82** Fleet Street groups as

Where does the FT stand now?

The FT is willing to resume talks at ACAS at any time under the terms of reference already agreed by both parties for independent mediation.

We therefore welcome reports that Mr Len Murray, TUC General Secretary, has written to Mr Joe Wade, NGA General Secretary, urging him and his union to accept the mediator's recommendations and to resume negotiations.

In the Meantime

... the FT has to consider both the continuation of a service to readers and advertisers which has won 3 Queen's Awards to Industry, as well as the future of its other 1,500 employees.

Primarily, and most urgently, the FT seeks a resolution to the present disagreement with the NGA. But, in the final analysis, it would be irresponsible for the FT not to consider all alternative ways of producing the newspaper.

We ask for the continued patience and understanding of our readers and advertisers.

المكذا من الأصل

If ever we needed a warning against making friends with stray animals, The Mad Death on BBC I, a three-part serial about an outbreak of rabies in Britain, provides it.

Not that many would pick up a sleeping fox by the side of the road and take it home as a pet, as does the first victim, an American executive living in Scotland. The fox is incubating rabies from a Siamese cat smuggled from the continent by a Frenchwoman visiting a Scottish laird.

The contacts build up - the cat had bitten the laird's collie before bolting into the night and the fox's jaws. The American executive bites his mistress before succumbing to the disease. Then there are those well-heeled guests at a party given for the Frenchwoman kissing each other, patting the rabid cat and eating canapés almost simultaneously. Will they be spared?

On one level Sean Hignett's adaption of Nigel Slater's novel could be a Government tract on hygiene. But it is also a skilfully directed thriller, produced by Bob McIntosh and directed by Robert Young for BBC Scot-land. An abrasive veterinary expert. Michael Hilliard, played by Richard Heffer, is given the brief to kill all wild animals within a 12-mile radius of the outbreak and impound all domestic pets.

"You will have more power than Hitler in that control area". a Ministry official tells him, and from the cold gleam in Hilliard's eyes you can see the thought appeals to him.

The first episode had certain irritating vagueness about place - I do not remember Scotland as being so blandly international. But the encounters with the animals and the hallucinatory symptoms of the disease are horridly rivetting. The word "rabid" takes on its full meaning.

The first episode in Channel 4's series of three programmes about the British Labour Movement, What Went Wrong?, cast back to the days of Victorian values as the elderly children of pre-war activists recalled the deprivations they and their parents suffered. Boys who should have been at school going down the mines, families thrown out of tied cottages at the whim of the boss, men suffering from silicosis clutchmg at windowsills as they stumbled along the street - no wonder they hailed the 1945 babour victory as the coming of the Golden Age.

But, one interviewee said, The British ruling class is the oldest and cleverest in the world". Biatant exploitation gave way to the appeal of mass consumerism, and the feeling of working-class solidarity faded. The son of a local doctor wistfully remembered what had been lost "Life seemed closer, more intense, not taken care of, parcelled up and packaged. It was there in the raw...we really lived life as it was."

The earnest-faced Jeremy Seabrook linked past documentary and present-day interviews, more poignantly made through people's memories. The ques-tion of the title remained unanswered, but may be clearer during the next two episodes.

James Mason and Judy Garland in the proposal scene, among the early cuts

The legendary Judy Garland vehicle A Star is Born has for a whole generation been shown incomplete. Now it has been lovingly restored, as Sheridan Morley reports

The complete movie myth

sheet of instructions explaining how to snip 29 minutes out of the film altogether, thereby cutting two complete Garland musical numbers and various scenes detailing the early meetings of Garland (the band singer on the way up) and Mason (the alcoholic star on the way down). These 29 minutes were then duly returned to the studio on lengths of celluloid, stripped of their silver content as usual, and totally de-So, for almost three decades, all

creenings of George Cukor's A Star is Born in cinemas and on television around the world have lasted no more than two and a half hours, and, though movie addicts have occasion ally run appeals in the press for the missing half-hour, the scenes appeared irretrievably lost Inspired however by Kevin Brownlow's triumph in restoring another "lost" film, Napoleon, and apparently undeterred by the fact that A Star is Born is somewhat less of a classic, Ronald Haver of the Los Angeles County Museum of Art has spent two years on the track of the missing scenes. Unlike Brownlow, he never actually

found them; what he did find however was the complete three-hour soundtrack, plus fragments of the cut scenes. Using those, together with stills sequences to cover the gaps, he has now rebuilt the three-hour version. Back at its full length, A Star is Born is being sent across the USA this summer for a series of gala performances from Dallas to Los Angeles to mark the beginning of the Motion Picture Academy's film-prespectation companion of decimal to ervation campaign, one designed to save what is left of Hollywood's heritage at a time when it has just been realized that half the films made in America before 1950 have already

disintegrated beyond repair. The cause is beyond all doubt both excellent and important. The restoration of A Star is Born has cost Mr Haver two years of his life and Warner Brothers more than \$30,000. It has been achieved by spending months in underground film vaults searching through thousands of unmarked cans of off-cuts, and the result must by any standards be reckoned a remarkable feat of film detection and devotion. Whether, in terms of the new material that

were able to see for the first time, it has all been worthwhile is alas an altogether different matter.

A Star is Born always seemed to me overlong at two and a half hours, and at three it begins to look not so much slow as totally stopped. Cukor was undeniably a great director, but was he a great director of musicals? His only others were either critical disasters (Les Girls, Let's Make Love) or photographed stage originals (My Fair Lady), and despite Mason's marvellous performance A Star is Born only really comes to life when Miss Garland stops singing for long enough for Cukor to get on with making her into a fine actress. Two more complete Garland numbers ("Here's What I'm Here For" and "Lose That Long Face"), though fascinating collector's pieces, are therefore a mixed blessing when they come to interrupt an already lifeless storvline, and though the one or two brief dialogue scenes do close minor loopholes in the plot (by explaining what happens to Garland just after her first meeting with Mason and then precisely how they get engaged) the

technique of stills-plus-soundtrack that Haver has been obliged to use here does not really allow them to be adequately assessed.

What is clear however is that, for all of what seem to me to be its many faults. A Star is Born has now acquired mythic status in America: tickets for the one-night-only screen-ing in New York went for upwards of 20 dollars, and James Mason was persuaded to make a rare stage appearance to recall the filming of the musical. Miss Garland herself being alas no longer available for public appearances, her daughters Liza Minnelli and Lorna Luft were also on hand, and one of the most cerie sights at Padia City was that of members of at Radio City was that of members of the audience reaching out to touch the Garland girls much as pilgrims at shrines reach out to touch relics. There was no doubt that we were involved in a religious happening of some sort, and what might in this country have passed as a collectorsonly screening on a Sunday afternoon at the National Film Theatre became at Radio City a full revivalist meeting with six thousand people cheering each and every one of the endless production numbers which clutter up

Cukor himself, like Garland, always refused to watch the truncated version of A Star is Born, and privately expressed doubts that the uncut one would be as good as some movie addicts were hoping. This restoration project was the last Hollywood venture which involved his interest and early he died the his interest, and sadly he died the night before they were due to show it to him. But his timing always was his

they cannot bear to hand over their fool's gold (which is not, of course, theirs but yours and mine. O fellow tax payer) to anyone other than the like of Anthony Powell, and that Mr Powell has neither requested nor needs the money? The closing date has recently passed for applications for this year's bursaries, to enable writers to work on particular projects, whether non-liction or iction. It is to be hoped that sensible sums say £10,000 upwards, will be meted out to the chosen few. If a writer of proven quality has applied. better to give him or her sufficient wherewithal to buy time to complete work on a book likely to be of value than

(PUBLISHING)

The name

of fame

Whoever Jane Somers is, she is not Jane Somers. Michael Joseph published her novel The

Diary of a Good Neighbour recently and it has been virtually ignored by reviewers. It would not have been had its

well-known author allowed her

real name to appear on the

book. It makes you question the criteria by which literary editors

and fiction reviewers decide which books are discussed. Scores of novels are published

some weeks, the same six or eight reviewed in most papers.

So much for poor Jane Somers.

wanting her new book to be judged on its quality, not on her

Michael Holroyd, that literary

representative of the Great and the Good, is no doubt correct in

pointing out that Macdonald brought out the collected works of William Gerhardie in the 1970s. It would be interesting to know how few copies were printed of the later volumes.

As to the Arts Council's advisory Literature Panel. I agree with Mr Holroyd that it

should do more not less. The fact remains that it has difficul-ties in spending its modest allocation for authors and books each year. Is this because

the panel as a whole, or its chairman (Marghanita Laski) or director (Charles: Osborne).

have such areane standards that

to shell out fivers to any itinerant poctaster who applies. And, speaking of poetry, it is reliably said that it was only the pleading of certain prossu-members of the Literature Panel which stopped Miss Laski doling out money to improve the standard of verse which appears on greetings cards.

Surprise was expressed by some that, in the recent Birthday Honours, Stephen Spender should - all these decades after the Thirties - be awarded a knighthood. It is fervently to be the Poet Laureate, is immortal, Certainly having had a train named after him is one way to ensure that. If he proves not, there will one day have to be a new Poet Laureate, and it would be more convenient if he were already knighted. Next time, perhaps. Mr Larkin or Mr Hughes?

The Public Lending Right computer at Stockton-on-Tees will pronounce in October as in how much in the first year each author who contrived to register by June 30 will receive by way of central government handout. Nearly 8,000 authors registered, and the 16 libraries in the first year's sample are likely to have recorded around 6m issues of

the books in question.

Those authors who failed to get their forms to the registrar in time should not relax for 12 (or 11) months but fill in and have notarized their forms now so that they may apply for the second year's benefit. Besides, second-class post to Cleveland takes time, and authors usually do not have money to waste. Books only need to be registered once although authors are required to register their new titles when published. This involves a statutory declaration each time. Lucky solicitors. lucky JPs.

Pete Townshend has just started work at the publishing house first known as Faber & Gwyer, then Faber & Faber and now. since they have had their image redesigned by Pentagram, faber & faber. There once was a Gwyer but there never was a second Faber any more than there is a second fabor. Mr Townshend, sometime of the Who (rather than: who?), wore a suit on his first day at the office. After all, Mr Eliot had done so on his first day, and he was a figure from the pop world too.

As the result of pressure applied by the Writers' Guild (usually referred to as "negotiation"). BBC Publications are about to sign a Minimum Terms Agreement for authors whose books are published by the BBC. This is something of a coup for the Guild, both because very few other publishers (Hamish Hamilton being the major exception) have accepted the principle of minimum terms and because BBC Publications have been known to offer their

equate contracts.

Problems of togetherness

LSO/Flor Barbican

Half of Saturday night's programme had apparently been given at a lunchtime concert

devoted to being sex-kittens -with an unholy pleasure in science-fiction pornography-about well-hung monsters ravshing earthlings as tender as herself. These two immensely funny pieces are almost your only reward for Margarita's shouting match about stealing from Reno's mother, her Three overtures, three con-suicide attempt and hospitaliza-certos, two symphonies and tion or Adrienne's account of quite a bit more besides were paternal oral sex. The production by the author

and Simon Callow is acrupulous and affectionate, with accurate individual performances of these appalling characters. Philip Donaghy's greased-back locks and pencil-thin moustache suggest Claudio Arrau playing Hercule Poirot until his oily vowels, invariably support-ing some form of blatant emotional blackmail on one of his women, give the caricature away. Veronica Clifford, ample and alarmingly turbaned as his wife, strides on with the majesty

of Montserrat Caballé confront-

ing the claque of a rival diva.

earlier in the week, but the orchestra still seemed unprepared for Claus Peter Flor's highly individual approach to the slow introductory section of Beethoven's Prometheus Overture. Chording was often im-precise and attack tentative. In Mendelssohn's Violin

Concerto these shortcomings were subsumed into more widespread untidiness of en-semble, but here the problem lay not in the orchestral playing itself but in the slender rapport between orchestra, conductor and soloist. In the first movement and finale Yunko Shiokawa struck a balance between urgency and repose, and in the slow movement she had much

Music for Youth Festival Hall

presented at the Festival Hall on Saturday night as five English youth orchestras provided the usual lengthy finale to this year's National Festival of Music for Youth

Following sessions earlier in the week, ranging characteristically from primary school handbell-ringing to big-band swinging, Saturday night was clearly used by most groups to pull out all the stops in what could be a once in a lifetime visit to the South Bank.

After Southampton's and Oxfordshire County's pro-grammes of pomp and circumstance (this we were just spared, Anthony Masters actually, though the latter saw to it that Britannia still ruled).

even though her tonal palette was insufficiently varied to bring out the full range of the solo line's winning qualities.

But Miss Shiokawa's tendency to push the music inexorably forward often took everyone by surprise, most noticeably in the tripping arpeggios of the last movement's recurring theme, where the chatter of violin and woodwind sounded distinctly more chattery and uncontrolled than it ought to have done. It was a pity, too, that the final pages should have degenerated into a breathless rush for the finishing post. Although the result was a dead heat, Miss Shiokawa had often led by a short head coming down the home straight.

However, in the second half Mr Flor held a tighter rein on the proceedings. Last week the LSO gave two performances of

Ealing Youth Orchestra, with its considerably smaller forces, looked refreshingly, to different approaches and

With Andreas Manoras, principal cello, as the eloquent and perceptive soloist, the orchestra, under Stephen Block, showed itself capable of true finesse of phrasing and timbre in Fauré's Elégie before a brave crack at Brahins's Academie Festival Overture, its occasional lapses of ensemble cunningly rescued. and urged into a stylishly integrated performance.

With a programme as fresh and freshly played as their enterprisingly cool and colourful costume, the Hampshire County Youth Orchestra, under Edgar Holines, were joined by Michael Whight for the cadenza and finale of Aaron Copland's Clarinet Concerto. With accomplished piano and wind

to offer in the way of tender Dvorak's "New World" Symphrasing and sustained legato, phony under Rafael Kubelik, even though her tonal palette and for Saturday's concert Mr Flor, principal conductor of the Suhl Philharmonic of East Germany, took over Kubelik's baton to make his British symphonic debut with the same work. He attacked it with such freshness and verve that it made one listen with new ears to this oft-played music.

Mr Flor decisively gripped

the attention with his positive, exciting - view of the first movement's Allegro molto, but his entire reading had similar energy and refinement. He rooted out and emphasized all manner of orchestral details without losing sight of the symphony's overall plan, and in the Largo his unusually slow tempo, coupled with some exquisite cor anglais playing offered an experience of rare

Geoffrey Norris

of vigorous detail and quick repartee. Holst's Perfect Fool ballet music was no less memorable for its fine timpani playing and its delight in the work's wit, whimsy and wizardry.

Stoneleigh Youth Orchestra are old hands at the game: they have existed since 1944 and have had the benefit of Adrian Brown's dedicated: and imaginative training for 10 years. Although it was therefore no surprise, it was nonetheless as encouraging and regenerating as ever to hear their exceptionally fine body of strings, their confident solo work and mature ensemble in a quite remarkably distinguished performance of Stravinsky's Firebird Suite. This is an orchestra that could take over any time from its older and not always wiser pro-fessional colleagues on this

BODYGUARDS COSTLESS THANESCORTS.

If you and your family could do with some extra protection on the road, may we offer the services of the 1983 Volvo 340 Hatchback?

Should any trouble run into this bodyguard, it has to contend with a solid steel safety cage and steel bars in the doors.

We admit there are a couple of soft spots, namely the front and rear crumple zones.

But paradoxically they increase the strength of the car, by absorbing any shocks before they can reach the people inside.

Like all good bodyguards, however, it also helps you avoid trouble.

The servo-assisted brakes provide safe, well-balanced braking.

The rack and pinion steering is both light and precise.

And the car's superior road-

holding comes from its nearperfect weight distribution. (Like the Porsche 928, the Volvo's gearbox is over the rear axle.)

Yet despite its tough exterior, the interior of the 340 is remarkably refined.

The fascia is designed to give you perfect access to the controls, with 13 warning lights visible at a glance.

The driver's seat is electrically heated, and both front seats have head restraints.

The boot is carpeted.

And safety belts are fitted to the rear seats.

Now you might imagine that such a stylish bodyguard would come expensive.

In fact, it costs £4,892.

Or to put it another way, £159 cheaper than an Escort from Ford.

Please send me information about the range of 1983 Volvo 340 Hatchbacks.

Tests of terror

The English cricket squad which left for a hastily-arranged

tour of Pakistan in 1969 included Keith Fletcher, a 25-year-old Essex batsman whose Test experience was confined to a single match. The memory of that disastrous series still haunts Fletcher, now the veteran captain of Essex and a former England skipper. In this extract from his autobiography, he recalls tensions on the field and in the dressing-room

I doubt whether any cricket tour has then called. This, of course, was long ever been as unpleasant as our 1969 before the country was even seriously visit to Pakistan. I know the lads who went to the West Indies in 1981 had a very rough time, with disasters punctuating the trip both on and off the field. But the 1969 tour lasted only six weeks, and each of them seemed like a we had a taste of the chaos to come.

It was my first England tour and nothing could have been better designed to put me off the life of a Test player. Politicians caused the cancel-lation of the South African trip to which everyone was looking forward; now politics wrecked the hurriedlyarranged stand-in affair, to which nobody was looking forward, although Commissioners, and emerged poker-one realized that it was done mainly to faced with the news that both these provide us with winter employment.

went, we were protected by armed guards - except for one bizarre day in Karachi when the students insisted that they were removed and the frightened authorities hastily agreed. There were occasions, I admit, when I thought we had little chance of getting home safely.

The trip began quietly enough, with a 10-day sojourn in Ceylon, as it was

Extracted from Captain's Innings by Keith Fleicher with Alan Lec. published by Stanley Paul on July 25, price £6.95

'Nobody was looking forward to the tour of Pakistan," Fletcher says, but the party put on a brave face as it set out. Left, on the steps of the airliner are (from the top) Roger Prideaux, Tom Graveney, Jeff Jones, John Show, David Brown, Fletcher, Derek Underwood, Pat Pocock, Robin Hobbs, John Murray, physiotherapist Bernard Thomas, Alan Knott, Basil D'Oliveira and Colin Cowdrey. Above: David Brown and Alan Knott race for the pavilion as demonstrators spill on to the pitch at Karachi.

Even before we landed in Pakistan, we had a taste of the chaos to come. The situation was so bad in the east of the country that the first part of the tour needed wholesale reshaping. We were to have played a first-class match in Chittagong before taking an internal flight on to Dacca, the venue for the first Test. But while we were still in Colombo. our manager Les Ames had the first of many meetings with High places were so torn by rioting that the I feel that the tour should never have games would inevitably be moved. taken place. Despite the short notice, I You can imagine just what effect this suggest that with a little more foresight had on our players, some of whom had

The first Test was switched to with a gun at our heads; sometimes, intercontinental Hotel. It provided few indeed, that was almost literally the other comforts, as we were very soon other comforts, as we were very soon Every one of the three Tests was by no means confined to one to discover. The student-rule situation interrupted by riots. Everywhere we sector of the country, and their authority extended to the ridiculous extent that Pakistan were forced to include a student leader, 21-year-old Aftab Gul, in their side. To be fair to him. Aftab was not a bad player and he showed some inclination to keep his colleagues in the crowd under an element of control. But the principal was absurd - can you imagine university students taking over English cricket and insisting that an Oxford freshman played in every Test of a major series?

COLIN COWDREY His leadership had not been strong enough

Cowdrey made a century, admirably determined in the circumstances, and shared a stand of 69 with him. But I admit my mind was not as riveted on the cricketing job as it should have been. When I walked out to start my innings I was accompanied by a number of student fans, hardly a circumstance to settle a young man in only his second Test, and when Cowdrey and I went out to resume after tea we were jostled by dozens of

batting four hours for 83 and putting conducted at a good gallop. on half-century stands with both Alan Knott and David Brown. Pakistan were left to make 323 in five hours and declined an improbable target after losing three early wickets.

countries. It was now being suggested kept us awake, that we should go on to Dacca for the second Test, even though we were led had worsened rather than improved threat throughout our stay there, The debate was long and complicated, because we knew the students believed and when consulted, the players made they could profit from national press it quite plain that they were not keen to coverage of their disruptions. We had

Our preferences counted for noth- were prepared to go. ing. We went, virtually on the insistence of our Foreign Office, who apparently feared recriminations against the English population of Dacca if we pulled out. We were no longer cricketers, it seemed, but ambassadors being paid a tour fee to keep the peace. It created a great deal of bad feeling and by this stage many of the squad members were muttering that they wanted to go home.

The entire city was under student law. There was no evidence of policemen, and no troops. The stu-dents supervised the traffic and policed the ground when the game got under way. I must say they did a far better job than the police had managed in Lahore and, although the crowds were bigger, the Dacca Test was the most peaceful we played. Peaceful is a relative term in Pakistan, however, and even in Dacca. fighting in sections of the crowd was virtually a constant sideshow. wooden chairs being the favourite weapon of the brawlers.

If I had been labouring under any We realized that the anger of the delusions that all would be well once crowd had little to do with us. They We realized that the anger of the the serious cricket began, these were directed most of their abuse against the dispelled by the opening day of the Pakistani team and against the various series. England closed at 226 for 5 but politicians trying vainly to run the in the course of the day I had twice country. A Test match was simply a been set upon by members of the convenient stage to protest over much crowd as I walked to the wicket and, just to add insult to injury, I had also being dragged into the gutter by been given out, caught off my boot.

There were only 10,000 in the ground, whereas on the Under-25s tour patriotism would still have its say, we under Mike Breadey a couple of years were not popular for reasons upons. under Mike Brearley a couple of years were not popular, for reasons uncon-earlier we had regularly played before nected with cricket again, and it crowds of 50,000. Yet those who were seemed obvious that any likely English at Lahore seemed far more intent on win would be the cue for a severe disrupting the cricket than enjoying it. disturbance. It was not a comforting thought.

One of the few occasions on the tour when tension was lifted came with the arrival of Colin Milburn, who flew to Dacca to reinforce our injury-hit squad. Ollie's omission from the original side was a controversial matter and caused a fair bit of resentment among his growing band of supporters. He had played in two Tests against the Australians the previous summer and, although not a classic opener in the common mould like the adhesive figure of Boycott, he was a great improviser and entertainer. He was also a thoroughly good bloke and a very amusing character. Never had he been needed more urgently.

Pushed straight into the Test side at Karachi, Milburn made a brilliant 139, his best score in Test cricket. Tom Graveney also scored a century and we might in ordinary circumstances have been delighted with our total of 412 for 6. But the rioters were not yet through with us. Both Milburn and Graveney were mobbed on reaching their hundreds, and it was not the type of backslapping which can normally be tolerated. These pitch invaders did not mind whether they slapped you on the back or kicked you on the shin.

I was batting with Tom when he reached his hundred and the scene was appailing. Hundreds of youths came over the fence and headed towards spectators and I was almost dragged to him. The police beat them back, but the ground. It was an absolute were then set upon by sections of the shambles and the police seemed crowd, who threw chairs, stones, fruit powerless to do anything about it. and anything else they could lay their The first Test ended drawn, al- hands upon. As Tom walked across in though we got ourselves into terrible an effort to calm them, hundreds more trouble during the second innings and eluded the police cordon and sprinted lost our first five wickets for only 68, for the middle. We both gave up at this I then played the most important point, and I think I beat Tom back to innings of my career to that point, the pavilion by a short head in a race

Six times in the opening two days, the mob invaded. It was becoming increasigly obvious that the game, and with it the tour, had a limited life. The cricket was meaningless, and we were While this match had been taking its by this stage concerned with little more unpleasant course. Les Ames had been than a safe passage home. In the city in constant touch with officials of the itself shots were being fired through the Pakistani and British governments, as night, and it was not the first time in well as the cricket authorities of both this nightmare trip that this sound had

But Karachi, I think, was the most to understand that the position there frightening place. We felt under severe no means of knowing just how far they

COLIN MILBURN Never had he been more urgently needed

That city gave me my first view of a full-scale operation by riot police. Heaven knows what would have happened if they had waited any longer, because this time the mob was totally out of control. It had begun as a bit of a laugh for us. Alan Knott and David Brown were batting, and little Mushtaq was wheeling away with his leg-breaks. Another disturbance seemed inevitable, just a matter of waiting, and it came as Mushtaq turned to come in for another ball. "Brownie" had seen the mob coming, but the bowler had not, and as he brought back his arm and reached his delivery stride, he was visibly amazed

TOM GRAVENEY After Cowdrey he took over for the last rites

to find he was bowling at unguarded stumps. Both batsmen were by this time sprinting for the relative haven of the pavilion; Mushtaq, as soon as he had familiarized himself with the state of play, followed rapidly.

This time we were not even safe in our dressing-rooms. There were thousands of berserk hooligans streaming across the ground, digging up the pitch and breaking down doors and gates. Then the riot police moved in. Dressed all in blue, and 20-deep, they started at one end of the ground and moved at a sedate pace into the mob. No one stood in their way, and eventually a degree of sanity was restored, though at what cost I could not say. It was the closest thing I have ever seen to a battlefield on a sports ground, and we knew then that we would be getting out as fast as possible.

Colin Cowdrey was already back in London. He had flown home at the end of the second day's play after a call from his wife had told him of the death of his father-in-law. Everyone sympathized with him over this bereavement, but privately wished they could be going on that plane with him.

To be frank, Cowdrey's leadership had not been strong throughout the troubles. But for the strength and good sense of manager Les Ames, the squad would have been short of leadership. I felt Cowdrey was affected as badly as any of us by the problems.

Graveney took over for what turned out to be the last rites of the tour. Following that final, fearful riot, Les Ames decided that enough was enough and we could stay no longer to be so abused. By now it seemed that every player had passed his tolerance level and wanted nothing further to do with

The most precarious part of it all was still to come, however, as we now had to be smuggled from the ground to the airport and out of the country, without alerting the students to the fact that we were quitting. No one was in any doubt that our escape plan, once discovered, would have led to the mob turning all its fury against us.

For reasons of swiftness and comfort, not to mention the fact that it might mislead the enemy, we abandoned all our gear in the changingroom and took only our personal belongings with us. On the bus to the airport we were instructed to keep our heads down and once into the terminal we were rushed through all the formalities and on to a midnight British Airways flight heading home. None of us, I imagine, has ever been so glad to step on board a plane and see the smiles of British stewardesses.

moreover... Miles Kington

Variations on a theme of Brahms

After his spectacular crash on the M4 last week. Mr Neil Kinnock said he was wide awake at the time, as he had been listening to Brahms No 1 on a tape, -

Brahms would have approved of this. He himself hated people falling asicen, especially during concerts at which he was playing, and he is known to have put optional loud chords in his first piano concerto which he would play only if he could hear snoring. Crash! he would go, then stand up and point accusingly at the

then stand up and point accusingly at the guilty person.

What he loathed more than anything was the sight of critics asieep, especially in the front row, right in front of his eyes. "I do not compose in my sleep," he used to complain, "so why should I let them work in their sleep?" On one occasion he saw old Hunstacher from the Hamburg Chronicle actually drop off to sleep before he had even started playing his first piano concerto. Putting a finger to his lips to keep the audience quiet, Brahms intoted over to where the crusty old critic was dozing and tapped him on the shoulder. The poor man tapped him on the shoulder. The poor man awoke with a start to find Brahms glaring

down at him.
"You realize you have just slept through Tou realize you have just such through the whole of my piano concerto?" roared Brahms. "But you do not get away with it so easy. We shall now play the whole thing again, just for you. OK, gentlemen, from the top!" And - giving the audience a big wink - he returned to his stool and carried on the concert as planned. To the end of his days Hunstacher believed that Brahms had allayed the entire piece twice that evening. played the entire piece twice that evening, and swore never to fall asleep at a concert

He was unsuccessful, unfortunately.
About a year later he did the same thing at the premiere of a Brahms choral work. This time Brahms got four befly tenors to belp him carry the sleeping critic in his chair out of the concert half and into the street. When Hunstacher awoke later, he imagined the concert was over and went

straight home.

Like Mr Kinnock, Brahms did a lot of travelling, though by horse-drawn coach, which was slower and safer. Sometimes he would be irked by the painful progress across Europe and, shouldering the coachmen aside, would take the reins and the coachmen aside, would take the reins and cochimen aside, would take the reins and drive allegro con fuoco through Schwabia or Bavaria. Well aware of the dangers of falling asleep at the reins, he liked on these occasions to hire a violinist to sit on the roof and regale him with lively gypsy airs, thus baying some claim to having invented in-flight entertainment.

Once, unfortunately, the fiddler broke a string and during the time it was necessary to replace it Brahms nodded off, with the result that the coach left the road and poernirued in a ditch. Shaken by the experience, Brahms thereafter always travelled by train, though he still liked to have a fiddler on the roof. This was, however, banned by the railway companies

after an unfortunate accident in a tunnel.

There is another, little-known link between Neil Kinnock and Brahms. The latter as a young man earned a pittance playing a piano in a Hamburg brothel, and Ernst Arbeit, leader of the newly formed German Workers Party. Brahms recognized the revolutionary youth and raised his evebrows to see such an idealist there.

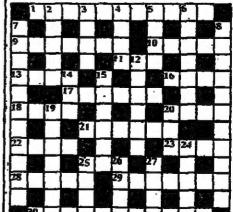

"If they knew you were spending party funds here, do you think the members would be very happy?" said Brahms. "Either of them?" he added, in a reference to the still modest state of the party. Arbeit flushed angrily.

"I am not here to spend money - I have come only to canvass votes and talk to people. You, for instance, Mr Brahms, are you a member of a trade union?" Brahms roared with laughter at the idea.

You bourgeois traitor and élitist!" cried Arbeit." When we come to power there will be no room in the workers' state for parasites like you! You will be set to sweeping the streets. We also pledge ourselves to leave the Common Market

and nationalize the banks..."
"Out!" cried Brahms, kicking the
unfortunate man into the street. Arbeit. however, had the last laugh, as Brahms was indeed to become known as a bourgeois composer and a sell-out. Let us hope that Mr Kinnock's allegiance to the great man will start to turn the tide.

MODERN TIMES

sideways look at the British way of life

The Silent Season sounds like the title of some grucsome Hollywood weepie. In fact it describes the softly, softly resurgence of that late Fifties,

the sorty, sorty resurgence of that late Fifties, early Sixties phenomenon – the debutante.

Maybe it is post-Mrs Thatcher reelection cuphoria, but in drawing rooms all over Belgravia. Knightsbridge and Chelsea 18-year-old Lady Petronellas and the Hon. Mirandas are plotting how best to spend Daddy's money on a splurge of dances, cocktail parties, houseparties and general making whoopee.

The modern deb is very different from the tearaway self-made millionaire's daughter Jayne Harries, who eloped with her hairdresser in 1968 and died much later of a drugs overdose. Nor does she resemble the stately Henrietta Tiarks, banker's daughter and so-called "deb of the year", who then married the eligible Marquess of Tavistock.

Instead, she is more likely to be awaiting her Alevel results and a place at university.

حكذا من الاحل

The girls seem more sensible, more in awe of Mummy, more (dare one say it) traditional. "The bed-hopping days are over, although there are a few little animals left who just want a good time". one debs' delight told me at the Australian pub, a favourite deb rendezvous.

As an institution the season lost its purpose when the presentations stopped in 1958. Some 300 debs whose mothers had been presented at Court used to curtsey before the Queen at Buckingham Palace. (Prince Philip was said to enjoy watching this). Ludicrously this ceremony continued at the annual Queen Charlotte's Ball in Grosvenor House. A phalanx of debs, all garbed in white, ostensibly like Vestal Virgins, would sink down before a 12-foot high cake, a replica of the birthday gatcau baked for King George III's wife Charlotte Sophia. This event too ceased in 1976.

The season still has its lodestars, however. The Berkeley Dress Show each May is a must for every aspring deb. A fortnight later is the Rose Ball attended by nearly 1,500 debs, elder sisters, escorts and "grown-ups" (a common phrase in debdom. meaning anyone aged over 30).

The season officially started last February when

other girls "coming out" from the Tatler's social editor, Peter Townend. They then arranged a series of "mums' lunches" to discuss tactics with similarly-placed chums and new contacts.

The next-stage were the tea-parties, when the young" went through the same larky rigmarole. Men are banned, but are the principal conversation topic. Deb wits often used to write sation topic. Deb wits often used to write unflattering epithets beside the names of those men thought "suitable" by Harper's & Queen's doyenne, Betty Kenward, and the indispensible Mr Townend. ("NSIT" stood for "not safe in taxis", "NB" for "no background" and "SQPQ" for "suspiciously quiet, probably queer").

Of course snobbery still reigns, although parents pretend it does not. There is the old-style deb whose family is titled and/or appears in Burke's

whose family is titled and/or appears in Burke's Landed Gentry. This year they include Princess Diana's cousin Francis Roche.

The new-style ones tend to have gone to the same private schools - St Mary's, Wantage: Benenden; Heathfield; St Mary's, Ascot - but have less obviously recognizable backgrounds. Among the 1983 batch are property millionaire Geoffrey James's daughter Samantha, London Transport supremo Dr Keith Bright's daughter Elizabeth and, Alexandra de Schwarzburg-Gunther, daughthe more enterprising mothers obtained a list of ter of the Inter-Continental Hotel's publicist.

Dances are less splendiferous than the Gatsby Revived era of the Sixties when stately homes like Viscount Kemsley's Dropmore and J. Paul Getty's Sutton Place reverberated incongruously to the beat of rock groups and discotheques. London's grand hotels – the Savoy, Berkeley, Hyde Park, Dorchester – had deb parties booked throughout June, July and again from October to early December.

A recent dance at Claridge's is said to have cost one tycoon father £20,000, including the two bands, disco, champagne and breakfast. Little "extras" like all-white flower arrangements can easily add £1,000, a toastmaster £69, while even sending out 250 engraved (never printed) "stiffies" costs almost £1 apiece.

Debbery, like private education and inherited wealth, will always provoke strident derision. But the modern scaled-down version is really little more than a sophisticated initiation marking the debut of an unmarried girl into adult society. And, as one father told me entirely seriously: "It provides a heck of a lot of employment".

Indeed so. Imagine all those toastmasters, party planners, social secretaries, bandleaders, discooperators in the dole queue!

to history of art. I

CHOO CHOO

Andrew Chance Bandleader

"We'll be playing at about 30 deb dances this Season. Wc. never arrive with a planned repertoire; we adapt to the mood of the evening. Some dances go crazy right from the start. All they

want to hear are Police, the Stones, David Bowie. Then you slow the tempo into lighter pop - Cliff Richard, Men at Work, Duran Duran. If lots of parents are present myself locked out.

"My father (aeronautical engineer Michael Tayler) thinks the Season is a good way of finishing off a girl's we play nice swinging music like "The Girl from Ipanema", "Smile", Helio Dolly".
"We don't bother to copy the

sound of original hit records. But if the song is in the Top Ten we had better be good.

"On stage we always wear white bandsuits with white shirts and long white ties. The worst thing that happened to us was when some idiot sabotaged us by pouring spinach into the sound-mixer while we were playing. Another time someone snipped our loudspeaker cables.

Our company, Gibson-Chance, also runs a band called Oliver Twist and two discotheques. We've begun a party-planning side too.

"I started the band ten years ago after I left Stowe. My father farms in East Anglia and has always encouraged me. I love the excitement of a. really good dance and the feeling that we ve contributed by setting the mood. Whatever happens we always end with the same tune. American

REF

Peter Townend Season's unofficial arbiter

I've been going to deb parties for nearly 25 years. The number of girls doesn't change much. The most was in 1966 when there were 337. This year there are 146. Nearly all are old-style

debs. You get the odd few who are a bit nouveau. Last year there was that builder chap, wasn't there? There must be some link between the girls. Maybe their mother did it, or they attended the same school. "No deb these days is just coming

out. They're at school or crammers doing A-levels, attending secretarial college. Some have even got a job.

The Season divides into three

sections: the Easter holidays, the end of exams which is generally during Ascot week until late July, and then September until Christmas. There will be about 80 deb cocktail parties and 25 dances in

1983. Some girls go to the parties and then never give anything. It isn't fair, is, it? The best parties are usually in country homes - so much more personal than an hotel or hired ballroom. I've got about 70 or 80 men on my list whom I recommend. They're

very smartly turned-out these days, having gone through that terrible scruffy stage in the late Sixties. They wear proper dinner jackets, not velvet ones, crisp white shirts with often a wing collar and spotted bowtie. I don't know what to do with all my coloured evening shirts now".

BLASE

Blaise Morris Deb's delight

"Life is pretty hectic right now. During June and July you could be at a party every night, including weekends. Never turn down a free invitation' is my argument. I sort of filtered into it. I was introduced to Peter Townend

and got put on his list. Things have rather gone downhill this year. At one smart dance last month everyone had to pay for their own drinks after 10 pm. Fancy that! Gatecrashing is also increasing. It's not something I've ever done.

"My father's family is Irish gentry and my mother is Canadian. I was named after a racehorse called Victory Blaise which won the Irish Sweeps Derby. I went to Gordons-toun with Prince Andrew and Prince Edward. But you never catch them doing the Season.

"I work as a reinsurance broker at Lloyd's. I have to be there at 9am so I try not to get absolutely ratted (drunk). I think debs can be comparatively promiscuous.

But girls tend to back down after a few months or else their mothers break it up. I don't want to get tied down either. Last year one deb cloped with some dreadful young man and was never seen at a dance

"I have a whale of a time. I've given numerous drinks parties in the past, but I'm loath to have one now in case debs think I'm angling for invitations".

CAKEWALK Lucy Durham-Matthews

Debutante

"It was mummy's idea actually for me to come out. I'm very scatty and so she has to do all the organizing. She She

tations, but don't call her my social secretary. Father (a Lloyd's broker) thinks it's all quite funny. He's giving a dance for me at home in Hampshire next September.

Early on I went to a few teaparties - jolly good cakes. I was a model at the Berkeley Dress Show. dancing down the cat-walk bare-footed wearing a Caroline Charles bikini and sarong. Then I went to Ascot, but hated it as I'm allergic to norses and just sneezed.

Originally I trained to be a dancer and actress at the Elmhurst Ballet School. I was never quite good enough to make a ballerina, but I still keep my acting up. Last year I appeared in a TV soap opera called Take the High Road and I've just done a BBC comedy. My grandfather was a Hollywood film

"My career will always come before the deb thing. I did it because you have fun. The men are usually at university, in the Army or the City. Generally I forget what they ay. I don't drink much champagne as I hate being out of control.

"I have a boyfriend. I didn't meet him through the Season. He looks after the sound for the Chance band. But I don't want to get married yet".

Nixon went...we stayed

Penny Perrick

A scale drawing of the Intercraft Office-System - "unlimited" ideas for limited; office space" - con-vinces me that the era of the office cum playroom is over. The Intercraft looks like one of those mazes where psychologists breed rats to see if they , bite one another, form meaningful

relationships or divide up into Chiefs and Indians. High partitions divide one little bit of airless, territory from another and each partition houses banks of filing cabinets and a stern-looking desk, Not an inflatable sofa, not a lacquered coffee-table, not an executive toy in sight. Work, these days, is obviously too serious to be played around with.
Once upon a time I worked in an

office besides which the Intercraft 7 System appears as luxuriously appointed as the Ritz. This office was in Another Newspaper and such was the prevailing gallantry of the place that the women writers were shielded from the rough talk and-brutish ways of the all-male newsroom by being herded into a small side office which overlooked an airshaft.

Given the choice. I'm sure we would have put up with the odd "dash" or "bother" from the chaps rather than the grit which flowed in through the half-open filthy window and the difficulty of getting from door to desk without treading on everyone else's feet.

It was the film of All the President's Men which broughtmatters to a head. The newspaper office shown in the film waters

office shown in the film was a facsimile of that Washington Post office where Bernstein and Woodward first twigged that there was something nasty in the White House woodshed.

Dry scalp is better than sexual harassment

Our eyes slid off Robert Redford playing one of the inquisitive reporters, and on to the acreage of carpet between each desk, the streamlined typewriters and a system of colour coding whereby the crime reporters could be identified by their red out-trays and matching coffee mugs while the political writers were kitted out in blue. The next day, we went across the corridor to see the Editor.

"We're too crowded in there", we' said. "What's more we don't like alltin." The Editor came to look.

My next office was purpose-built. That is to say it featured a lot of white plastic surfaces and what appeared to be green plastic plants. The plants turned out to be real enough and very attractive to whole families of small black bugs. In an attempt to stamp out unwanted wildlife, I watered the plants with cupfuls of poisonous coffee from the vending machine but they continued to thrive. I think there was a moonlighting horticulturist on the organization's staff who crept in at midnight to check that each bilious

green rubbery spear was in perfect The brilliant The brilliant strip-lighting brought on a range of ills from dry scalp to migraine. Desk lamps would be more soothing. I suggested to the office manager. "Can't be done". he said. "If you have them in this office, everyone in the organization will want one."

These complaints appear niggling indeed compared to some more recently discovered causes of concern such as sexual harassment and visual display units, two of the hazards of office life discussed in excellent surveys conducted by the Alfred Marks Bureau. Betty Friedan author and supporter of a low-tech way of life, thinks you can best keep out of trouble by staying out of the office altogether and working at a crumb-eleared corner of the kitchen table. But I still hanker for the perfect office, the one with low-seating, spotlights and one of those things with silver balls on strings

The other day, my husband, finding himself at a loose end in the of the day, asked me out to lunch. He took me to my favourite restaurant. The Gay Hussar, and we were well into the iced borsch and smoked goose when we noticed that the other lunchtime patrons, many of whom we knew, were giving us some pretty old-fashioned looks. The Gay Hussar regulars are a sophisticated bunch and we decided that they found the sight of a man eating lunch with the same woman he was going to have his supper with a bit silly.

constantly clicking.

A few days later, we went to a party. "Surprised to see you two together." said a friend. "I heard you were getting divorced." We were devastated until we remembered The Lunch. Our bit of midday marital dailiance had obviously been seen as a very serious occasion, indicating that something was definitely up.

Clive Jenkins, in a speech criticizing the way our working lives are arranged in long, anti-social, day-long chunks instead of being spread out into a pattern of shorter shifts over a longer period, said:
"We marry each other for better or
worse, but never for lunch." As one of the wisest advocates of education for leisure. I hope he will now organize classes on how to have lanch with your wife without causing

THE TIMES **DIARY**

Law in our society and the legal framework, built upon and im-

proved throughout the centuries in Britain and adopted by other countries such as Canada, has

preserved our freedom as individ-

of law by an independent judiciary

which is seen to establish the equality of all before that law, is the

fallen across the world.

Lances drawn

Sharp backbiting has broken out over books about Sefton, the heroic cavalry horse nicknamed Sharky for his readiness to use his teeth, Setton - The Story of a Cavalry Horse by lohn Watson is published today. Setion - The Horse for any Year by referency Greenwood was published hin aid of the Army Benevolent Fund at the end of last month. Watson says the Fund conceived that book when he asked its permission to reproduce Terence Cuneo's portrait of the Hyde Park bomb survivor which was refused. Greenwood was in turn refused the cooperation of the Household Cavalry, to whose charitable funds Watson had committed a contribution. As a result the Greenwood book owes background and 20 photographs to Major Tom Hickman, a former officer and Sefton rider the Life Guards would rather forget. In 1977 Hickman was sentenced to two years imprisonment, suspended for two years, for two bank raids carried out with a shotgun and mock timebombs. Pictured several times in the Greenwood book, Hickman is not mentioned in Watson's.

Say that again

Here is my entry for the Plain English Campaign's 1983 gobbledegook competition. It comes from Statutory Instrument 856, the Teachers (Compensation) (Advanced Further Education) Regu-

"In these Regulations a reference to a Regulation is a reference to a Regulation contained therein, a reference in a Regulation or the Schedule to a paragraph is a reference to a paragraph of that Regulation or the Schedule and a reference in a paragraph to a subparagraph is a reference to a sub-paragraph of that paragraph." Should this win the £25 offered

for the year's most hideous gobble-degook, the prize goes to P. Raj, of Bexleyheath. I will gladly forward other entries sent to this office.

Sure-bet sets

A cynical lot, these travel agents, as witness the "marketing segments" defined in a new book-length rumination on holidaymaking extruded by the Economist Intelligence Unit: singles, young trendies, golden oldies ("a group of the population which has never before been so numerous or so affluent"), empty nesters (childless couples and the most likely to have two income earners so have both the time... and the money to engage in holiday travel"), and the new elite. The last, of course, are Americans. "Seventy per cent of all inter-national passenger movements are attributable to 'holidays'," notes the EIU. "And, even in the recent recession years, over three fifths of Britons took at least one holiday trip. This leads futurologists like origins go back many years. Those Herman Kahn to believe that of us who recognize that also see tourism will become the world's that the "instant" remedies now being proffered are but tragic echoes the century." Beastly thought.

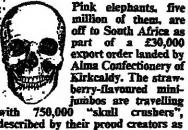

Cold comfort department: "Industrial recession in the East End of Glasgow, once one of the most heavily polluted areas in Britain, has brought about a dramatic decline in air pollution levels in the city." My thanks to Environmental Data Services Ltd for that breath of fresh

Unspotted

The Chancellor of the Exchequer chose a curious forum, the News of the World, in which to put his case vesterday for Britain's economic recovery. The caption on the photograph accompanying Lawson's piece is curious, too: it describes as "Best of British in design and workmanship: Jaguar's new racing .car" - a product that (excepting only its engine) was designed and built in the United States.

Entymology

I warned you that I would be attending a party thrown by the International Trust for Zoological Nomenclature in honour of the naturalist C. D. Sherborn, and now I have done so. It was held at the Natural History Musuem, and was highly instructive. I learned for example that an American entomol-ogist named Kirkaldy named a family of Polynesian bugs after various ladies of his acquaintance, and how Miriam Rothschild, arguably the world's most famous female siphonapterist, did the same using the names of Greek courtesans) for fleas. Best of all, bowever, was the Earl of Cranbrook's surprisingly intimate knowledge of the rather revolting habits of that genus of birds, Collocalis, responsible for bird's nest soup. "Little dark brown birds living in deep dark holes in South-East Asia", said Lord Cranbrook dismissively. "I should have known what I was in for when I heard their specific names: enigma. perplexa. inominata, inexpectata and the like." The namers of names are fast running out of money and there is a real danger that this, their first social occasion in 88 years, may also be their last.

with 750,000 "skull crushers", described by their proud creators as white chocolate-flavoured skulls that ooze red fondant when bitten. Surely, considering their destination, ordinary bitter chocolate would be more

Inner force – our first line of defence against enslavement

The Prince of Wales reflects on the need for constant vigilance to maintain our freedom - and suggests uals. The administration of a system how we can all help those suffering under totalitarian rule

We may take large parts of it for granted; we may criticize it, resent it, millions of people do still exist under a shadow of gigantic ridicule it; pressure groups of one proportions - the shadow of authoritarianism from either end of the political spectrum. Do we acqually have any idea of what that means? We can, I suggest, discover something of what it means by listening to those who have suffered, or who are suffering, in a way which derives its inspiration from the basic motivation of a thirst for power, and power alone.

In such a system power is an end in itself - the better to achieve its consolidation and the destruction of all potential enemies. Those who have observed the operation of the system in practice, rather than in theory, will insist that the struggle waged against religion for instance is not for ideological reasons, but for power. This is because a religious man, deep down in his soul, tends to remain free of political parties or any other earthly power. The struggle waged against such individuals is because they have dared to expose themselves without being

Living in the countries that we do and brought up the way we are, without a constant sense of fear or suspicion, without a feeling that those whom we love could be intimidated as a result of our actions, tends to make us think thatsuch reports must be somewhat exaggerated and that one set of human beings could not possibly do what they do to their fellow men. There is no doubt that countless people whose freedoms are crushed under the weight of a seemingly limitless oppression look towards countries like ours to provide some kind of flickering light of freedom amongst the total darkness that surrounds them.

The least we can do, I believe, is to attempt to understand the predicament of those who are made to suffer for what they believe in, by imagining what our feelings would be if we were in a similar situation. What better way to describe this than by quoting the Pope, who said recently: "I ask those who are suffering to be particularly close to me. I ask this in the name of Christ,

Of course, it is only too easy for people to turn round and say you are being naive and unrealistic. The Christian approach is all very well, but what can we as individuals possibly do, bearing in mind that our freedom of action is so circumscribed. Well for a start, I believe in the overwhelming strength of the human spirit and in the power of faith. Deep in the human soul, as Mihailo Mihailov describes it, lies an unfamiliar force which is stronger than all the external forces which surround us. That force is unfamiliar because we have forgotten what it sounds like

and what it needs to release it. That is hardly surprising, I suppose, when you think how much else there is in the external world to take its place. But nevertheless it is that force which I think Solzhenitsyn is referring to when he talks about "a decline in courage being the most striking feature which an outside observer notices in the West

today".

Life is full of mysterious paradoxes, but one of the most extraordinary is that attested to by some of those who have undergone the most extreme spiritual and physical suffering during their imprisonment, but who have also experienced a by people who have not experienced

From this paradox we learn that it is through such individual awareness of the inner voice, and through the faith which this engenders, that the essence of totalitarian rule can in fact be undermined - in the sense that totalitarianism relies on a belief in the unlimited power of external circumstances, which supposedly direct man's inner world. If there is the very real possibility that the physical world is subject to the spiritual forces of the human soul, then there is indeed hope for those who lack the individual freedoms we experience under the law.

And precisely occause we enjoy those freedoms we have obligations too. We have two particular obligations. I believe one is to try to appreciate that there is inevitably a who said, 'I was sick and you visited price to pay for the blessings of me. I was in prison and you came to democracy - be it organized crime or pornography or whatever. But it is only a price, and the basis of civilized living, it seems to me, is to realize that you can never have something for nothing. One writer living in a state of "unfreedom" emphasized very well what I am trying to get at when he wrote that the efforts to diminish the expenses of democracy in the process not to be transformed into unfreedom is the eternal care of a democratic

The second obligation is the one we owe to those countless individuals – yes, individuals, (they could be you or me, not a mass divided up into categories to be manipulated like automatons) who, perhaps secretly, deep down in their beings, have high expectations of people like ourselves. We have an increasing obligation to concentrate on developing our moral courage and a corresponding awareness of that inner force that we all possess, but without which we will be unable to resist that shadow of authoritarianism and at the same time provide a beam of hope, like a lighthouse on a stormy cliff top, for those who suffer

This article is extracted from a speech by the Prince of Wales at Alberta University during his recent

schaft which is rapacious in its use of finite resources, requires the mass unemployment of labour and cannot make up its mind whether it wants expensive money for the rentier or cheap money for the producer. We are far more entitled to claim

the status of protector of Britain's industrial capacity than a government whose record has been one of wholesale industrial destruction. Our concept of the welfare state has far more to offer as the means of real individual emancipation by the removal of the inhibitions of poverty, fear, inadequate care and lack of opportunity than has the Thatcherite fixation with liberty by purchase. And our commitment to production for use and retention of claim to the title of patriots than those whose desire for the fast foreign buck invariably overrides any dedication to investment in our country's future.

Efficiency, individual liberty, wealth creation, patriotism; such a vocabulary is thought to be unfam-iliar to the Labour movement even though they are - along with justice, compassion and equality - the words and, more important, the purposes and principles on which the movement was founded and from which it has always drawn its vitality. The Labour Party must no longer allow the Tories or the SDP to usurp what are surely its legitimate claims and aims, Above all, it must reassert democratic socialism as an effective body of values for modern needs rather than the ghost from the past.

We have ample ground for doing so. The Tories have now fully retreated into their pre-Churchillian nostalgia. From their economics of the mad-house they have now brought forth the philosophy of the poor house. The SDP is locked into the framework of the 1950s; an unreal world where full employment, continual economic growth and increasing living standards promised the redistribution of wealth without the necessity of radical change. In today's circumstances the mould-breakers are just

plain mouldy.

Labour has the opportunity to fulfil the role of a modern, radical and progressive party which the r two major parties have neither the instinct nor the will to undertake. It has the potential to do so. The fulfilment of that potential will require determination and selfconfidence and need changes in our style of work and operation. We need to overhaul and

modernize our organization. We need far more organizers in day-today contact with the public at large. We must spend less time talking to ourselves and more time listening to and speaking with our supporters and potential supporters, to close the divergence between activists and those whom they earnestly wish to represent. Labour needs massively to extend its membership while ensuring that all existing members are brought into more direct communication and participation

with the party as a whole. Above all, the Labour Party needs to reassert the relevance of democratic socialism, through persuasion and education, to the people who live in the present and want to advance in the future. By that means it will be recognized as the dynamic means of mastering the challenges of technological, economic, social and cultural change so that we can bring advantage both to the British people and to those in the rest of the world who need the friendship and aid of a productive and democratic Britain.

Anne Sofer

Green Tortoise and golden opportunity

Our 18-year-old son, who is spending a few months in America, wanted to travel from the East to the West coast and decided to do it by coach. Greyhound? (Safe and reputable. I had heard). No, Green Tortoise. Something he had heard about in Greenwich Village.

The Green Tortoise, as the name implies, does it slowly and sceni-cally. It takes ten days to meander across the continent first the Great Lakes and the Great Plains; then on across the Missouri river, through the Badlands of South Dakota, down via the Wounded Knee Indian reservation and the Colorado canyons to wicked Las Vegas; across the Arizona desert to Los Angeles and San Francisco.

The vehicle itself is a reconditioned old bus stripped out and equipped with what the promoters regard as essentials for such a iourney for their particular clientele: a magnificent and high-powered stereo system; a mattress-covered sleeping platform covering the entire back half of the bus; and a huge icebox. By contrast, the engine and the seating accommodation (priorities on more conventional journeys) appear to have been primitive.

The trip cost \$199 - about £130. Of the 30 or so passengers about a third were American, the rest coming from all over the world. The great majority were under 25, the notable exception being a 75-year-old Venezuelan revolutionary.

Fortunately for our peace of mind, our son signalled his arrival in San Francisco a few hours before the television flashed the hideous pictures of the French motorway crash. So, having held my breath for ten days, I slowly let it out, and relaxed, and contemplated Youth. We are tremendously serious and

gloomy about our young at the moment. Ask the average person for an instant association and you will almost certainly get "unemploy-ment", or "riots", or "alienation". Anyone who offered "adventure", say, or "romance" would be written off as a crackpot.

I seem to spend half my life now at meetings with people with very long faces and heavy files full of plans for young people: the Youth Training Scheme and Work Experience and Vocational Preparation and Assessment Profiles. And as we look at graphs and pie-charts and cumulative data that analyses where they all are and what they are all doing, we feel that only by doing this can we keep at bay our feeling of guilt guilt that we are presenting the next generation with a world in which the raison detre of our own generation - paid employment - is

Perhaps we are so oppressed with guilt that we are not seeing a golden opportunity: a dazzling egalitarian fantasy whose possible realization is staring us so obviously in the face

short-sightedly round it.

What I mean is this. We have come to accept a state of affairs in which the chite (that 15 per cent or so who go on to higher education) have a prolonged and carefree youth, and the rest have virtually none at all. The former group, while they may study intermittently during the period, spend the five years between 18 and 23 largely devoted to enlarging their experience of life.

They travel and engage in leisurely love affairs. They join pop groups and pressure groups and political parties. They work, casually and without commitment, in a variety of part-time occupations grape-picking, bartending, pro-gramme-selling – without anyone accusing them of drifting. They have time to think what life they want to live and what contribution they will be able to make to society.

The other 85 per cent get none of this. We have grown used to thinking that society needs their labour from the age of 16 or 17. And even now that we have no work for them, our expectations - and theirs - are so geared to this unreality that all we can do is provide surrogate work to fill their precious years of

Of course young people are going to need better and more training to prepare them for such jobs as will be available in the high technology economy of the future. But there is no longer any reason why any of them, so-called elite or not, should be rushing into it when they are

barely grown-up. Some years ago I was present at a meeting to discuss projects for approval under the Lambeth inner Cities Partnership Scheme. As usual, bids exceeded finance available and we were engaged in a paring down exercise. One of the bids was a scheme to give a group of Brixton youngsters a trip to the Caribbean. Although it was dressed up in the right educational jargon ("redis-covering cultural identity", "broadening understanding of contemporary problems", etc) it was clear that the suspicion of joy-riding on the rates was strong, and this proposal was an early casualty. We went on to approve worthy schemes like walkin advice centres and community development projects.

I did the sums at the time and they have stuck in my mind. The annual salary of one qualified community worker could have bought 20 young people a chance they would not have had otherwise. to spread their wings and see the world. It would have paid for twice that number of trips on the Green Tortoise: I thought at the time our priorities were wrong. I do still, and now it's on a far larger scale.

Two issues for a Tory revolt

Parliament goes into recess at the wishes on their leaders either by the end of next week, and presumably even Mrs Thatcher is planning to take at any rate a short break. I recommend for her holiday reading list a volume published about three years ago entitled Dissension in the House of Commons 1974-79. In this somewhat hefty tome an academic named Dr Philip Norton demon-strated with hundreds of examples the steadily increasing propensity of MPs of both main parties to rebel against their own front benches.

The Prime Minister, provoked by her then Foreign Secretary, Mr Francis Pym, asserted confidently during the general election cam-paign: "I think I could handle a landslide majority all right." Last week's Commons votes on capital punishment proved emphatically that she cannot. In five out of the six parliamentary divisions she walked through the Aye division lobby.

During those six divisions, many of her Conservative colleagues, ranging between one third and almost a half of their total, defiantly crowded into the No lobby. Some of them, I have to report, made it clear with an almost indecent zest that they were deliberately voting against their

Tomorrow night, unless they accept Mr du Cann's compromise, some of them may be at it again, this time on the very different issue of MPs' pay. Here too Mrs Thatcher has been seeking to impose her will on the Commons without first taking into account the sensitivity of her backbenchers to the matter involved. In consequence, those backbenchers have shown themseives ready to snub her publicly, if need be.

Now it may be contended that in neither of these cases is there anything to cause the Prime Minister real concern, since on both occasions the Cabinet has prudently permitted a free vote, with the Whips out of action. This is totally to misunderstand the nature of manmanagement among Tory MPs, to whom the concession of a free vote merely substitutes one form of coercion for another: instead of an overt command, arm-twisting behind the scenes.

If a Tory prime minister really wants something, it is made clear that he or she must get it. That is certainly what happened with the charade of a free vote on the White Paper on Common Market entry in 1971, when Conservative MPs (including the present Leader of the House) were blackmailed in their constituencies with a coerciveness that makes some of Labour's reselection procedures appear posi-

tively benign. Nevertheless, during the last The author, MP for Islwyn, is chief Parliament, Tory MPs were not Opposition spokesman on education. Inhibited from imposing their

prospect or even the actuality of a three-line Whip. On the proposal for referendums among local auth-orities, enough of them voted against the Government in an exploratory debate to ensure that the Department of the Environment never introduced this legislation in the form that the Secretary of State had originally and confidently promised. On the immigration rules Tory backbenchers simply voted down the Home Secretary's proposals when he persisted in going

forward with them. it may be argued that these regrettable events took place when the government's majority was a mere 40 or so, and that an administration now buttressed by 100 votes more than that has nothing to fear. I am ready to forecast that such complacency is hubristic and that, on necessary occasions, the number of rebels will increase-sufficiently either to force the Government to concede to their wishes or to produce a defeat in the lobbies if there is a refusal to concede, Indeed, I name two issues where this is likely to occur.

The first would be a failure in next year's Budget to provide for an increase in unemployment pay in line with the rise in the cost of living. The second would be a determination by the Environment Secretary to proceed with proposals limiting the right of local authorities to fix their own rate levels, should such draft legislation not be to the liking of the Association of District Councils and the Association of County Councils.

Of course Tory rebels have no intention of bringing down their government on an issue of con-fidence. That knowledge, however. ought not to engender slackness among Conservative Whips. In his book Dr Norton offers this warning: "Government supporters could combine with Opposition members to deny the Government a majority ... without necessarily endangering its continuance in office...Once one had defeated the Government a first time, it was much easier to do it

a second time". Far from finding herself able to "handle a landslide majority all right", Mrs Thatcher – unless she schools herself to the unaccustomed self-discipline of learning tact and even humility - may find herself in the disagreeable predicament of Edward Lear's old lady whose folly induced her to sit in holly. It will be

recalled that: Whereon by a thorn, her dress being torn, She quickly became melancholy".

The author is Labour MP for Manchester, Gorton.

folk recipe. It was not the prescrip-tion which was at fault, we are told, but the inadequate dosage. Neither of those courses is any use. They are based on the assumption that the crucial matter deciding the outcome of the general election was the detail of policy, and

they consequently miss the para-mount point that even if a majority of the electorate understood and agreed with every aspect of Labour's policy, that would not necessarily ensure a Labour victory. Credibility, coherence and legitimacy are words which rarely enter into the psephologists' vocabulary, but they are deeply embedded in the voters' consciousness.

Some leading politicans and a few preoccupied activists may be unwilling or unable to see the wood of defeat for the trees of arrogance. But millions of party members and supporters do not suffer such restricted vision. When they are asked to give the primary reason for Labour's failure to win the election, the overwhelming majority will give the simple, sad answer, "We just the simple, sad answer, "didn't get our act together".

The majority in the Labour movement will not look kindly in future on political prima donnas of whatever persuasion who put their personal causes and vanities before the interests of the party as a whole and thereby jeopardize Labour's strength and appeal.

Slowly, but inexorably, a further recognition has been gaining ground.

A realization that the polarized diagnosticians of the last few years have been offering the party as a whole an unpalatable, sterile and above all, false choice. Democratic socialism cannot be reestablished on the basis of either the old social democracy or on the "new" ultraleftism. Nor can it be constructed on an amalgam of the two, any more than a wit can be fashioned from two half-wits. A third way is needed: separate and distinct from the stale vanguardism of the ultra-left and from the atavistic and timid premise

And that third way has always existed - it is the socialism which, in Aneurin Bevan's definition, "is based on the conviction that free people can use free institutions to solve (his intention, my emphasis) the social and economic problems of the day". It is, of course, an audacious view. It dispenses with PHS the idea (fiercely clung to by sectarian socialists and by anti-

of social democracy. ...

socialists) that socialism requires a perpetual threat to private freedom. It rejects the defeatism of those who. think that problems are beyond solution and would therefore be better called immobile rather than

"moderate".
That democratic approach is not blithe. On the contrary, it recognizes that the reexamination of strategy, attitudes and style, of socialist politics is a continual imperative. Unlike the Tories or the Alliance, we are in the business (and always have been) of cradicating the very social conditions which necessitated our

existence in the first place. We cannot, therefore, afford to be either paralysed or blase. We have to draw confidence from accomplishment without breeding complacency.

placency.

An understanding of this obligation is crucial to the development of Labour's strategic approach. The harsh electoral reality is that Labour cannot rely merely on a combination of the dispossessed, the "traditional" working class and minority groups for the winning of power. If Labour is to form a government we have to relate to, and draw support from the modern Working class whose upward social mobility, increased expectations and extended horizons are largely the result of opportunities afforded them by our movement in the past. ..

These are our people and we should rejoice in their advance, especially since my generation of Labour Party members are most definitely products and beneficiaries of that progress. We should never assume that the relative security of

the so-called "new" working class forbids active sympathy with the plight of the disadvantaged, for their roots, their background and their family relationships militate against such selfish forgetfulness. But we must appeal directly to them and convince them that greater aspira-tions of merit, justice and security are realistic. Only a Labour Party which can illustrate the relevance of socialism to the manager as well as the mechanic, to the technician and the teacher, the home owner alongside the council house tenant, the ' majority as well as the minorities, can hope to convert its plans into effect by gaining the power to nurture success properly and defeat disadvantage conclus-

This requires a shift in attitudes and presentation, not a change in principles. It does not need an abandonment of dilution of values. It demands practical education in the truth that the great majority of people - whatever their occupation or status - who must depend entirely upon the sale of their labour as the only means of enjoying a tolerably comfortable and secure life have a direct vested interest in standards of care and opportunity which can be provided with

The potential for making and winning that case is great and a claim to present itself as the party of efficiency with far more justification than a Tory Party committed

COMPETITION NOT CORPORATISM

The 18 biggest nationalised industries employ more than 1.6 million workers with a combined annual turnover of £42.7 billion in 1981/82. Most of them operate in conditions of state guaranteed monopoly, or of a severely regulated market, Many of them are plagued by chronic debt, which adds billions of pounds annually to the scale of public borrowing and the burden on the tax payer,

At its simplest, the mechanism of privatisation of these assets merely involves a transfer, at a price, from its present owners (the tax payers) to future owners (shareholders). But the arguments about the merits and demerits of such a course occur on many levels - political, economic, social and industrial and vary enormously from one sector to another.

. Today the issue is joined in Parliament with a debate on the second reading of the British Telecom Bill. It is also marked by the publication of two contributions to the general debate. One entails a study of the inplications of withdrawing the state monopoly from the postal services. The other surveys the whole range of possibilities for privatising elements of the public sector.

be Even if the privatisation of state industries had no effect on the economy and no benefits for the consumer, there would still be a substantial political argument for carrying it through.

Ministers are not equipped to
take the burden of decisions which crowd in on them from the board rooms of the public enterprises. The underlying excuse for this role is that most of the industries operate in an area where there is a particular

social utility to be protected. Unfortunately, that original purpose - the provision of a public utility which could not be equally well provided for by firms acting in competition with each other - has been vastly overweighed by other factors.

As a general principle the size of the state owned sector in a mixed economy should be kept to a minimum and the rigours of competition to a maximum; Only in those circumstances can the benefits of a pluralist society be guaranteed to continue. Otherwise the administrative momentum of the state bureau-cracy, and its gradually expanding burden on the revenue producing sector, can only distort the market, reduce compe-tition, and distract ministers from their true vocation by immersing them in quasi-industrial, problems for which they have no competence and no necessary responsibility.

Set against these principles, the example of British Telecom, which is to be debated today, is not encouraging. Indeed the principles are effectively violated in the whole thrust of the bill which in practice will involve the transfer of a state owned monopoly to a shareholders monopoly operating under the provision of the Companies Act. It is said that Britain needs an organisation of the size and structure of British Telecom to survive in the fiercely international competitive market of telecommunications. Yet that size and structure has been almost wholly determined by political and administrative forces and not by the play of the

The future growth of the telecommunications industry is

likely to be enormous. Why should its pattern be so preconditioned at the start by launching this leviathan on to the market with only a token obeisance paid to the spirit of competition through the presence of Mercury. When in doubt, privatisation should create smaller rather than larger successor companies; they should be created and allowed to merge thereafter, but only subject to rules of competition policy which have not been applied in the case of British Telecom. Its dominant position in the market is bound to be used to eliminate or unfairly to discipline its competitors.

This bill gives a totally inadequate idea of how compotition can be genuinely encouraged in the field of telecommunications and how such a vast company as the privatised British Telecom could be controlled. The Government may hope that the creation of a Director General of Telecommunications, and the mainten-ance of constraints and obligations imposed by the operation of licence, will do the trick. However, all previous attempts to liberalise the telecommunications market and to free it from the dominance of BT have all but failed. They have left British Telecom as the guardian of the new telephone network and the principle supplier of all telecommunications equipment. Consequently, most manufacturers of such equip-ment still rely substantially on BT contracts. All that will occur, therefore, is that BT will gain greater access to private finance while losing what little public accountability it has had. That is not competition; it is

A COLD PEACE

Any progress in reducing East-West tensions is good news, and there have indeed been several hopeful headlines recently. After three years of bitter dispute the Madrid follow-up to the Conference on Security and Cooperation in Europe (CSCE) has reached a compromise solution which could lead to a meeting number of heavy SS-18 and SS-between the US Secretary of 19 missiles which the Americans State, George Shultz, and the Soviet Foreign Minister, Andrei Gromyko, when representatives of the thirty-five participating states gather to sign the final document. Both sides at the Geneva Start negotiations to limit strategic nuclear arsenals have made proposals which might open the way to an agreement. In Poland the authorities are talking of lifting martial law this week, and Washington has promised to respond by raising economic sanctions. The USSR has assured the United States that more exit visas will be granted this year; among the well-publicized cases of dissidents who have already been allowed to emigrate are the Pentecostalists who camped in the US Embassy in Moscow and Sergei Batovrin, a leader of the unof-

ficial Soviet peace group. Unfortunately these signs of progress are more apparent than real. After Madrid, CSCE issues, which should be closely inter-related, will be divided. Next year in Stockholm there will be a meeting to discuss confidencebuilding measures in the military area, which considering the disarmament negotiations already taking place in Vienna and Geneva, is likely to prove just another forum for empty Soviet rhetoric. There has certainly ocen some movement at the Start negotiations, but it is far from being a breakthrough. Last Thursday the Soviet representa-tive at the United Nations disarmament discussions. Viktor Israelyan, accused the US Administration of adopting an

obstructionist attitude at the Geneva talks, while the US Assistant Secretary of Defence, Richard Perle, maintained that Soviet proposals for missile cuts did not deal in a significant way with the essential factor of destructive power, the USSR is not yet prepared to lower the number of heavy SS-18 and SS-

regard as the major threat to their land-based missiles. The intermediate nuclear forces (INF) negotiations, now adjourned until September, have made even less progress than Start, Soviet insistence that the British and French nuclear deterrents should be included in talks between Washington and Moscow is largely to blame, but the planned deployment of new US missiles in Western Europe may yet bring Moscow to agree to a compromise before Decem-

The unique contribution of the CSCE lies in promoting East-West discussions on human rights, rather than on disarmament. Yet the humanitarian issues now risk becoming a mere side-show, the USSR agreed only with great reluctance to continue this vital part of the debate on the Helsinki accords. It will give very low priority to the specialist meetings planned to take place in Ottawa and Berne before the next general follow-up conference in Vienna in autumn 1986. Continued Soviet violations of the CSCE principles show that the West cannot become content to accept mere assurances of future good behaviour and

occasional gestures of good will.
The Polish authorities are very keen for the West to raise economic sanctions. But the promised lifting of martial law this week will return few civil liberties to the Poles. Constitutional amendments have endowed the regime with most of the powers gained under martial law, police, security and censorship have all been strengthened.

the high price, which is indeed a formidable obstacle to be overcome; but is otherwise practically meaning-

less. There has been little oppor-

tunity for the painting's real worth to be widely recognised, because it has rarely been seen in public since

its completion in Bethlem Hospital

Without himself being a "great"

painter in the accepted sense, though his singular talent achieved its own

level of perfection, Richard Dadd painted two works which can be

judged great by any standard:
"Oberon and Titania", and "The
Fairy Feller's Masterstroke", which

is in the Tate Gallery. These are masterpieces not only within the context of his own work but in the

whole field of Victorian imaginative

painting of which "Oberon and Titania" is perhaps the supreme

Despite the strange circumstances

of his life Dadd's work is rooted in

the traditions and conventions of his

time but possesses an intensity of vision and a freedom from the constraints of fashion which are

example.

An amnesty for political prisoners may follow, but since the government recognizes only a small proportion of the thousands imprisoned as having political rather than criminal status, most of the prominent opposition figures will stay behind bars.

corporatism:

The Madrid agreement supports the right of workers to establish their own unions, but the Polish regime shows no sign of changing its hostile attitude to Solidarity. In the USSR those who attempted to form an independent trade union movement are in labour camps or psychiatric hospitals. Dr Andrei Sakharov remains in exile in Gorky, and there is no word about the possible release of the imprisoned members of the unofficial Helsinki monitoring groups, or of the thousands of other prisoners of conscience.

The American girl, Samantha Smith, who wrote to President Andropov about the need for peace between their countries has received great publicity touring the USSR as his guest. But a little Soviet girl, Ira, who appealed to Mr Andropov to release her father, Dr Yury Tarnopolsky, has just learned that her father has been sentenced to three years' imprisonment because of his activities in support of the right to emigration - also one of the CSCE principles.

The Reagan Administration may not be diplomatic in maintaining that a "tough" approach brings the best results when dealing with the Kremlin, but the evidence of past negotiations tends to support this claim. Years of discussions have brought little improvement in the West's relations with the Soviet leadership. But perserverance in defence of democratic principles is the only way forward, no matter how disheartening it may be for the West's negotiators.

LETTERS TO THE EDITOR

An open market on the seabed

From Professor D. R. Denman Sir, Yesterday (July 4) Parliament debated the Petroleum Royalties (Relief) Bill which aims to relieve oil companies of payment of royalties on oil extracted from the North Sea. The purpose of the Bill makes sense. Future exploitation of the nation's wealth of oil in the seabed calls for measures to ensure to the oil companies improved control over cash flow, wider investment decision flexibility, field on field differential incentives and

The new Bill will do something but it perpetrates an error of conception which has impaired seabed resource development from the outset. The nation holds sovereign rights over the scabed analogous to those over the land: By appropriate adjustments to the law, freeholds and long leaseholds in the seabed itself should be offered on the open market to the oil the open market to the oil companies in exchange for once and for all 'capital payments. The proceeds would be 'capitalised rent and would go to the Exchange for reduced revenue taxes and royalties. By so doing all the safeguards and incentives, now rightly called for by the oil companies, would be assured to them.

Yours faithfully. D. R. DENMAN. Pembroke College. Cambridge.

Dispute at 'FT'

From the Managing Director of the Financial Times Sir. Mr Bodroff's letter (July 15) supporting the continuation of the NGA strike at the Financial Times left me, and I am sure all your readers, wishing they had been better informed.

Having freely entered into an agreement to put the dispute to independent mediation, Mr Booroff did not explain why the NGA saw fit to reject the mediator's recommendations out of hand.

The NGA's rejection is particu-larly surprising, given that the General Secretary of the TUC expected both parties to respect the outcome of the agreed procedure and act upon its recommendations".

I think Mr Booroff should tell us

Yours faithfully. R. A. F. McCLEAN, Managing Director, Financial Times, Bracken House. O Cannon Street, EC4. July 15.

Abolition of GLC

From Mr.Adrian Stade Sir. Is there no end to Conservative paranoia about Mr Livingstone, the GLC and the independence of local government? Not content with rushing through plans to hand over the GLC's transport powers to a non-elected bureaucratic quango, to be followed by unspecified plans for abolishing the GLC itself, this autocratic new Government now announces that the GLC will receive no block grant in the coming year and that other local democratically elected councils will also be starved into submission to central Government policy.

Is it beyond the perceptive

capabilities of Government ministers to distinguish between the insensitivities and extravagances of a particular Labour leader of a particular group and the fundamental principles of devolved democracy? Are Mr Livingstone and his diminishing band of socialists so threatening to this Government, with its massive majority, that the very roots of local government have to be cut away? Can the electors no longer be relied upon to remove politicians whom they believe to be anachronistic, irrelevant or dangerous?

There was a time when Conservatives frequently wheeled out centralised control by state and by quango as the great bogies of socialism. It now seems that it will be a Conservative Government that is responsible for emasculating local democracy and creating the most centralised, unaccountable state since the wartime emergency

. As a Liberal, I find this determination to abolish opposition very disturbing and I suspect this view is shared by many Conservatives in local government. Yours faithfully.

ADRIAN SLADE Members' Lobby, The County Hall, SE1.

RAYMOND NOTTAGE

GERALD RHODES, 36E Arkwright Road, NW3, July 13.

cations.

From Mr Raymond Nottage and Mr Gerald Rhodes

Sir, The increase in the ratio of retired to working persons over the past 50 years is causing serious social and financial problems in most developed countries. Among those problems in Britain are the low incomes of many elderly persons, especially women; the social inequalities to which employer-based pension schemes give rise, notably between those in the public and private sectors and between stayers and leavers in the private sector, and the extent to which provision for the years of retirement can and should become a

personal responsibility.

The methods of financing pensions are a frequent source of difficulty. Annual earnings as the determinent of individual pensions and of pension schemes' income presupposes a high level of employment as an economic norm. State pensions constitute a large and virtually autonomous element in the

national budget.
Employer-based schemes, which would not exist in their present form but for the tax concessions accorded them, produce a concentration of financial power whose political and economic implications need to be more widely understood and criti-

cally examined.

Recent increases in life expectancy cannot fail to have profound

Amusement arcades

From Councillor Robert Davis Sir, It was certainly of little surprise to read (report, July 13) that 20 per cent of gamblers seeking help from agencies such as Gamblers Anonymous were between 12 and 17 years of age. Local authorities have been concerned for a long time about the proliferation of amusement arcades, or "centres", as the up-market arcades now call themselves. Once

based in city centres, they are now

opening in nearly every high street. Planning law is proving ineffec-tive as appeals are usually lodged against local authority rejection and constantly won. Local authorities presently have a second avenue, through the licensing of "amusement machines with prizes", but under the Gaming Act the power to

reject applications is limited and there is no ability to set conditions.

It was for this reason and our concern at the growth of young gamblers and their effect on society that Westminster City Council and

age of those admitted, the opening hours and the extension of the controls to all amusement machines. Draft legislation is being prepared, and with the support of the London Boroughs Association, will be included in the Greater London Powers Bill. What is needed now, is more

with the aim of seeking new legislative controls. This would give

local authorities the power to license

all amusement areades and thereby

to control their number in a given

area. It would also enable local authorities to impose strict and

enforceable conditions, such as the

evidence to support our case and in this respect we are holding a conference in Central London in September. Yours sincerely. ROBERT DAVIS, Chairman,

Amusement Arcade Action Group, City of Westminster, City Hail, Victoria Street, SWI, July 13. three other London boroughs

Theatre Museum

From Dame Peggy Ashcroft and Sir, We were very relieved when in

was made that the Theatre Museum should go ahead as planned in Covent Garden with all possible speed", and that former promises were to be honoured at last. We assumed that building was under

How wrong we were. The cut announced last week is a betrayal of all those who have given to the Museum and of all those who fought so hard to save it successfully last year. The fact that the cut was announced on the eve of exchanging the lease with the GLC smacks of very sharp practice.

We do not want further promises about next year. We trust that the Government will immediately reverse its decision about the Theatre Museum, allow it to go shead now and be seen to have kept its word. Yours faithfully,

PEGGY ASHCROFT, JOHN GIELGUD, RALPH RICHARDSON, i Chester Terrace, Regents Park, NW1. July 12.

Sale of venison

From Mr V. C. C. Saunders Sir, I am glad to see that Sir David Scott (July 11) took issue with Dr Fletcher (July 6) on the question of the proper taste of venison

Like many other people, my wife and I like venison (and other varieties of game) to taste "gamey".
and if this means from older animals and well-hung after killing this is our preference: If the deer-fiesh to be marketed by Dr. Fletcher and his colleagues is to be young and fresh and; as he suggests, with no distinctive flavour from (say) beef, we shall not be interested and not bother to buy it.

We are surely now growing out of that period of the after-war years

when food producers seemed to assume that there was no longer a laste for strong and pronounced flavours and textures. The change from this has already made itself felt such fields as cheese, beer and bread and needs to go further.

One still has to hunt around for a sausage with proper seasoning by way of herbs and spices. The venison producers will be making a big mistake if they assume that we are still in an era when blandness and mildness are safe-selling qual-

Yours faithfully. V. C. C. SAUNDERS. 42 Templar Road, Summertown, July 12,

III-gotten gains?

From The Reverend R. J. Hills Sir. Waiting for the train back to school, one of my grandsons spied a fruit machine through the open door of the buffet. Heedless of my cries not to waste his money he dashed off. Following at a more sedate pace. I was greeted by triumphant smiles and outstretched hand containing six tempenny pieces. He explained he had not wasted a penny because he always gave the machine a good bang first and quite often money came out.

At that moment the train came and he was unable to re-invest his winnings. As he waved delighted to me from the window, richer by 60p, fruits of his own efforts, as well as by my gift of pocket money, I was left variously musing on the ill effects of gaming machines on the young, how some people have all the luck, or whether this was an example of Victorian "self-help".

JONATHAN HILLS, 19 Church Way.

Labour skeletons

From Mr John Barry

Sh: Mr Denis Healey dismisses (July 7) as "bad journalism" and "a series of statements which are easily shown to be untrue" my account (feature, June 30) of the last Labour Government's role in Nato's 1979 decision to deploy new, long-range

But, having claimed in the Commons on December 15, 1982 (col 314 in Hansard of that date) that the issue of Nato's nuclear modernisation was not even discussed until after Labour had left office, Mr Healey now concedes that the inner quarter of ministers I identified had in fact "concluded that Nato's existing theatre nuclear forces should be modern-

Mr Healey asserts, however, that the same group had also decided that they opposed the deployment in Europe of new land-based missiles like croise and Pershing 2" This is, bluntly, at odds with other

It is contradicted by Mr Fred Mulley's letter of August, 1977, to US Defence Secretary Harold Brown, which carefully set out the

need for a Europe-based nuclear force and rejected the proposition that this could be wholly sea-borne. It is contradicted by Dr David Owen, who as Foreign Secretary was part of that inner group: "What there is no doubt about at all is that ministers in that government had accepted the need for a study on the options as to how you could modernise theatre nuclear forces, and that it was accepted that that would be necessary. But no formal decision was made at any stage as to the way in which it would be done... everyone knew we were discussing the possibility of cruise missiles. But that was not one of active for out on the control of the control only one of actually six options on Nato modernisation. (BBC, World at One, June 29, 1983).

It is, finally, contradicted by the fact that when Nato's two-track decision was first announced - to deploy Pershing 2 and ground-lannched cruise missiles in Europe should arms talks fail - the new Labour Opposition supported this.

Mr Healey further disputes my summary of what was said in January, 1979, at the informal western simmit on Guadeloupe and in April, 1979, by Nato defence ministers - among them Mr Mulley - at the Nuclear Planning Group meeting in Florida.

Power and Principle, the newly-published memoirs of President Carter's national security adviser, Dr Zbigniew Brzezinski, gives an account of Guadeloupe rather different from Mr Healey's According to Dr Brzezinski's notes of the inceting (p.295) it was Chancellor Schmidt, not Mr Callaghan, who throughout ... was the one who was most concerned about the Soviet nuclear threat in Europe and the least inclined to agree to any firm response [ie. Nato deployments, JB]. He kept saying he has a political problem and that he is not in a position to make any commitment. I was quite struck by how hard the other three [Caner, Callaghan, Giscard] pressed

Finally, Florida. According to the semi-official account of the modernisation decision published by the US House of Representatives Foreign Affairs Committee in December, 1980: During the meeting of the NPG in Florida in the spring of 1979, Nato defence ministers agreed in principle to the concept of a deployment in the early 1980s of some 200 to 600 warheads for ong-cauge theatre delivery (p.23).

The paper presented to ministers in Florida by their technical working party, the High Level Group, made it clear that Pershing 2 and cruise missiles were the favoured systems to carry those warheads. Yours faithfully. JOHN BARRY, 86 Islington High Street, NI.

Making the best of Docklands

From the President of The Landscape Institute

Sir. Sir Geoffrey Jellicoe (July 2) pointed out the opportunities for London Docklands to have a new, imaginative landscape worthy of the skills available in today's landscape designers. To this forthright call for vision among those who are in a resistion to see how figure developposition to see how future developments can be achieved I would add the reminder that, in my experience, the best in landscape design seldom comes about by accident, or by waiting for it "to emerge" as sites are developed piecemeal.

First, you need a sound, far-sighted concept for the future Docklands landscape prepared by professional people able to show how to capitalise on the sites' assets and how the various features of the new development can be imaginati-vely composed; then the allocation of land so that the concept cannot be jeopardised by short-term expe-diences, and, finally, you need the support of the incoming occupier, for who wants to occupy beautiful new premises if they have to keep apologising to their visitors for the surrounding muddle and squalor? Worse still, to repeat that apology every time for the next 100 years?

Yours faithfully, DAVID E. RANDALL, President. The Landscape Institute, 2 Carlton House Terrace, SW1 (Wandsworth, Croydon and Ken-sington and Chelsea) set up the Amusement Arcade Action Group,

From Mr Tcd Hollamby

Sir, In his letter published on July 2, Sir Geoffrey Jellicoe wrote most cloquently of the tremendous scope and challenge to landscape design in Docklands, with all of which I wholeheartedly agree.

He asks: "What is this new approach to landscape, and why is it so significant? Is it being recognised in Docklands?". to which I am pleased to be able to assure him that it most certainly is. Indeed, although I am sure that as he says, "there is an abundance of talents and expertise waiting in the wings", to use the phrase, there is equally an abundance of talent already on stage.

The Corporation has deliberately set out to use young and imaginative landscape design consultants as well as those who have established reputations. All of them, including the Corporation's own staff, subscribe to the concept of the permament regeneration of Dock-lands in which the identity and creation of landscape, taking advantage of water - the area's unique advantage - provides a new and dramatic aesthetic dimension.

Yours faithfully. TED HOLLAMBY. Chief Architect and Planner. London Docklands Develop Corporation. West India House, Millwall Dock, E14.

The Pope and Poland

From Dr Adam Darowski Sir, It is impossible to compare Lech

Walesa, as Dr Murray does in her letter (July 7), with union bosses in Britain, where government and opposition are democratically elected. Who elected any of Poland's rulers since the last war? By contrast

Lech Walesa, is the democratically elected leader of Solidarity, a movement of 10 million members who, with their families and many non-member supporters, represent most of the Polish nation. Can anyone who has seen those millions of Solidarity victory signs during the Pope's recent visit dispute that Solidarity is the democratic voice of Poland?

Is Dr Murray telling us that this majority has no right to the freedom which she enjoys in Bitain - to reject the rule of union or party bosses imposed by a small majority, or from outside, and to be ruled by a government of its own choice? ours sincerely.

ADAM DAROWSKI. 81 Thurleigh Road. SW12. July 10.

Beresford Hope silver From Mr C. M. James

Sir. I read with interest your correspondent's article (features, July 8) on the Beresford Hope silver at the British Embassy in Warsaw. He missed out one point of some importance. The first pieces were discovered by Lady Russell (whose

husband was at that time serving as First Secretary in the Embassy). I think justice should be done. She deserves credit for unearthing the silver, cleaning it and, in some cases, buying it with her own money in advance of Treasury approval. As one who has often eaten off it I salute her.

Yours faithfully, C. M. JAMES. As from 20 Greville Road, NW6. July 12

Over-tired?

From Mr S. G. Jefferson Sir. As one who has spent 45 years in industrial and factory life in the West Midlands I must add the following comments to Philip Howard's "Detumescent" in today's edition (July 13). To knacker = to steal:

2 It's knackered = it is stolen: 3 I'm knackered up = I am as good as dead; 4 It's knackered up = It is absolutely worn out beyond repair. Yours faithfully,

S. G. JEFFERSON, Vanguard House. Farnborough Road Birmingham 35. July 13.

Blanch takes

Bishopthorpe

into title

Dr Stuart Blanch, who was made a life peer in the Queen's Birthday Honours list, has taken as his title Lord Blanch of Bishopthorpe.

The news was announced at St

Andrew's church as Lord Blanch attended parish communion a few hundred yards from his palace at Bishopthorpe, York. Lord Blanch said after the service,

at which he was also presented with a record token from parishioners,

that he had a wealth of happy memories during his nine years at Bishopthorpe. He thought the tite would be more appropriate than his birthplace in Gloucester or his

retirement home at Bloxham, Oxfordshire.

Extinct damselfly returns to life

By High Clayton Environment Correspon

But the distribution pattern of

the two are quite different. The common one is found throughout northern Europe, from Britain to mach, of the Soviet Union. It is

often abundant. The scarce one occars in the same regions and is always scarce. But it also appears occasionally in parts of Asia and north America, where the common.

The Scarce Green Lestes has been rediscovered in Britain by Mr Bob Merritt, national organizer of the recording scheme for the biological records centre of the Institute of Terrestrial Ecology. The common version can be found in much of England, but the scarce one has never been found antided.

one is never seen.

same swampy ground.

The General Synod evidently

did not wish the procedures to be lax and nominal, as that

The Church of England may inquiries, and indeed the whole seems to want the public to Petrine privileges. The Pope's know that divorce is a serious failure, as a lifelong yow had

been broken. Marital breakdown, as the The procedures may, by this. Synod was reminded by one or very complexity and opacity. two experts in its ranks, is not symbolize this sense of disap-proval. The good this may do, from the Church's point of only a messy but a mysterious affair, and the whole truth is view, however, may well be undermined by one unfortunate Catholic Church's matrimonial iribunals, which now have vast counter-symbol, the provision for the dispensation by the bishop from former marriage vows. The Synod seemed what can be achieved by a reluctant to give that difficult philosophical concept the attengathering and psychological insight, and yet it is widely held tion it deserved, and gave less attention still to the effects it may have on the status of the vows in the public's general understanding of marriage.

The Anglican panels will have a far wider brief than the It is not the first marriage vow, which the Anglican Bishops will set aside but the obligations stemming from it, it is said. That distinction, if valid task of making moral judgments of the individuals concerned. at all, will not be caught by the which the tribunals strictly couple concerned nor by the public. It may well look as if the Bishop has dissolved the vow able in Anglican circles to make disparaging remarks about the itself, in effect granting a church divorce. That is the exact opposite of the message the Church wishes to convey.

Yet the Synod bardly glanced at this detail before awarding to the bishops routine powers to "bind and loose" beyond even power over the marriage vow has always been extremely tightly limited.

It is not even a necessary detail of the process. The Synod could just as well have said that it was of the very nature of a vow that it loses its binding force at the point at which it becomes incapable of performance. A vow cannot bind one to do something impossible. Instead it seems to deal with a yow as if it were an independent metaphysical entity, or a medieval curse.

Behind both the debate in the Synod and the procedure itself there are still hints of a moralistic and judgmental attitude to other people's matrimonial misfortunes, albeit softened by a desire to offer them the means of repentence.

The latest debate reflected a significant shift away from that moralizing towards a more profound and sympathetic understanding of the processes of marriage breakdown. But the new procedure still has echoes of the old attitude.

That may well be why so few in the Synod's debate last week were really enthusiastic. The rest chose the only option that seemed to be remaining, with a certain sense of nervousness painless (except for the rogues be lax and nominal, as that "bind and loose" beyond even certain sense of nervand bounders). But there is a would seem to amount to the most extravagant claims that some chickens me danger that the preliminary "remarriage on demand". It made for the papal Pauline and day come back to roost. that some chickens may one

LIEUT-GEN MICHEL MICOMBERO

Former President of Burundi

Lieutenant-General Michel declared with Micombero as Micombero, who was President of Burundi from 1966 to 1976. died of a heart attack in exile in Mogadishu, Somalia, on July 16. He was 43.

Micombero had come to power in a coup which overthrew the Burundian monarchy, and presided over the country fortunes in a stewardship which was marked by tribal uprisings and bloody reprisals, until his own overthrow ten years later.

Michel Micombero had been born in 1940 and educated at the Roman Catholic College of in 1962 Micombero returned to the country and was involved in the maintenance of law and order, in a situation in which the numerically dominant but politically weak Hum tribe frequently attempted to shake off the yoke of the ruling Tutsi

Micombero was made Minister of Defence in 1965 and earned the approval of the King Mwami Mwambutsa IV for the rigour with which he supressed a Hutu uprising in September of that year, Made Chief of the Secretaries of State he, however, proceeded to engineer the moves by which the King's son was brought back to supplant his father as Mwami

Any cordiality of relationship between Micombero and the new King did not, however, last for long. In November 1966

His presidency was to be an unquiet one, however. Though there seems to have been some intention on his part to lower the level of inter tribal resentment by the release of Hutu political prisoners and a propaganda campaign against clan rivalry, tension in the country continued. A referendum on a new constitution was mosted and a date fixed. But delays in these plans bred new suspicions. and in the Spring of 1972 the

Hutu tribe rose in revolt. Some 2,000 Tutsi were killed Some 2.000 Titis were killed before before before with his small army to put Academy. When Burundi became independent of Belgium the Tutsi, bent on revenge had the Tutsi, bent on revenge had taken the law into their own hands through their party youth wings and armed factions. Burundi was then to witness an inter tribal massacre of a highly sanguinary character in which 200,000 Hutus are said to have perished. Whether or not Micombero and his government were guilty of premeditated genocide or not is unclear but the stain on their rule was indelible and the task of reconstructing any form of stable government based on cooperation between Hutu and Tutsi a well nigh impossible one, most of the most able Hutu administrators having died in the massacres.

With the hegemony of the Tulsi minority confirmed, Micombero ruled on uneasily until overthrown himself by Colonel Jean Baptiste Bagaza, the present ruler.
Micombero left the country

Micombero seized power and Micombero left the country deposed the King, forcing him for Somalia where he had lived to go into exile. A republic was quietly in exile ever since.

urban squalor.

GABRIELLE ROY

Gabrielle Roy, the French- gress in Canada had brought, Canadian povelist whose works not growth, (except in a soulless enjoyed major status in France as well as in her own country, died on July 13 in Quebec. Her books were all translated into English, were widely available, and were as widely read. Her carliest novel remains as what bas been called "a landmark study of working-class life".

Gabrielle Roy was born in Saint-Boniface, Manitoba, in 1909, the youngest of eight children of a French-Canadian family of pioneer stock. She was to draw upon her early experi-ences in much of her fiction. She attended the convent, St Joseph Academy, at Saint-Boniface, and then trained as a teacher at a college in Winnipeg. She mught in various rural areas, until, by 1937, she had saved enough money to undertake a journey to Europe, mainly in order to study for the stage, which was her first ambition. She had already become a member of the famous Cercle Moliere, in Ottawa, On the outbreak of war she went back to live in Montreal, although she eventually made Quebec City her

home. the age of 12, and now began to support berself with short stories, feature articles, and semi-sociological studies of Canadian rural life for Le Bulletin des Agriculteurs. It was at this time that she decided to abandon her intention to become an actress and to devote herself to writing. Throughout the war she had been able to take two or three months off each year from her journalistic assignments to work on her first novel, Bonheur d'Occasion (1945), translated in 1947 as The Tin Flute. When this appeared it won the Prix

Seminal in France. Bonheur d'Occasion deals in a uniquely vivid and natural-istic manner with the misery of a large family in Montreal's slums. Critics acclaimed it as "tough", "unflinchingly honest" and brilliant in characterization, though many noted a "complete absence of humour". It was by no means a socialist or

reformist novel rather, it implied that technological pro-

enemy, technological and commercial progress - which she thought of as regress She never again equalled this inspired novel, in which the nature of the passivity of Chenevert is presented with striking psychological penetration and depth. However, the French have always considered Rue Deschambault (1955), also biographical sketches in fictional form, as the most beautifully written of all her works. It was translated as Street of Riches, (1955). Titles of later novels include

La Montagne Serrète (1961), translated as The Hidden Mountain (1961) and La Route d'Altamont, the English version of which appeared as The Road

Past Altamont (1967).
In 1947 Gabrielle Roy married Dr Marcel Carbotte.
She received many awards, including the Medal of French Academy and a prize from the French-Canadian Academy. As one of her shrewder early critics prophesied, the best of her work will be remembered as "warm, human, endearing and fundamental".

SAMSON RAPHAELSON

Samson Raphaelson, the role made it an immediate American dramatist and screen writer, who died in New York on July 16 at the age of 87, made his reputation with his first play, The Jazz Singer, but beside his many successful plays he wrote numerous film scripts, many of them stylish comedies for the director Ernest Lubitsch. Raphaelson was born in New York on March 30, 1896 and after some time as a newspaper reporter, followed by a short spell as a teacher at the University of Illinois, he turned full time playwright in 1925,

that year, and made into a film in 1927. Though having only a few scraps of dialogue and several songs The Jazz Singer was billed as the "first talking picture" and the vibrant person-

after the success of The Jazz

Singer which was produced in

The Jazz Singer was followed

by a dozen more plays, includ-ing Young Love (1929); The Magnificent Heel (1930); Accent on Youth (1935); Skylark (1939); Jason (1942) and The Perfect Marriage (1944). His association with Lubitsch

produced many successful comedy films in the sophisticated, spicy mode in which the director specialized, and he cooperated on several films with him, notably, The Smiling Lieutenant (1931); Trouble in Paradise (1932); Heaven Can Wait (1943) and That Lady In Ermine (which was finished by Otto Preminger, 1948). Raphaelson also wrote the

screenplay for the movie of his own play, Hilda Crane, and was in addition a notable short story

British Telecom bill gets second reading today

Privatization of coal, rail, post and electricity urged by bank review

Nationalized industries, 1981-82

Electricity Industry British Telecom British Gas

British Alrways Rolls-Royce British Shipbuilders S Scotland Electricity

Post Office

Government's privatization programme to embrace more industry sector - including such unexpected candidates as the Central Electricity Generating Board and British Rail - is advocated in an article published today by Lloyds Bank

Professors Michael Beesley and Stephen Littlechild say that the scope for selling off state industries into private hands has been greatly under-esti-

Consumers would benefit through lower prices and better services, though the bulk of such benefits could be achieved by selling off five companies; the CEGB (excluding the National Grid), British Telecom, the National Coal Board, British Rail and the Post Office. Of these, only British Telecom is on the Government's

denationalization list.

The professors wade straight into controversy with suggestions on how privatization might be achieved, notably for the coal and rail industries, already embroiled in a political battle over threats of government-imposed closures and cuts to curb buge financial losses.

The article freely accepts that privatizing the coal industry -through the sale of individual pits or groups of pits - would weaken trade-union power and would lead to widespread closure of loss making pits.

"would necessitate a generous policy to cope with the social adjustments," the pro-fessors advise, But they add,

A big extension of the consumers would benefit from ower prices and, with long-term demand trends favourable. than 80 per cent of the state output and jobs could increase.

On rail, the professors envisage sell-offs on a regional or area basis, with the plum for investors being British Rails huge tracts of land ripe for sale or development. Because "wholesale withdrawal of service would not be politically acceptable," successor companies would have to guarantee "a minimum programme of rail output" to be imanced from

profits of other activities. The article coincides with the publication this week of exrecord profits from British Telecom and the Post The Government is copected to put the final touches to the sell-off strategy soon, with the whole programme expected to be completed by the autumn of 1984.

Today sees the second reading of the new Telecommuni-cations Bill which will transform British Telecom into a private company and empower the Government to sell the shares Merchant bankers Klein-wort Benson and S G Warburg have been retained to advise the Government and corporation.

Part of the difficulty has been valuing BT's huge asset holdings, at present valued anywhere between £10bn and £18bn. The flotation of 51 per cent of the shares, will be expected to raise around £5bn but the Government is having difficulty deciding how to go about such a big operation. The favoured course is to sell

shares to telephone subscribers,

The increase is attributed to

better productivity, a 1.6 per cent fall in man hours and a 2.7

which would not only lighten the overall burden but also make it very difficult for any. successive government to renationalize. Although union representatives of the 250,000 workers have been vocal in their opposition, the staff are expected to be offered stock. Sales overseas have also been

looked at as part of a programme which would involve the sale of several different tranches of BT stock. The Government is also

planning a big reorganization of the Small Business Advisory Service. Plans to hand over responsibility to local private sector agencies and chambers of commerce are now being considered by Mr David Trippier, under secretary of state at the Department of Trade and

policy has been prompted by a survey done for Shell UK by its economists. It found that in spite of the emphasis placed by the Government on the role and contribution of small firms, the avast majority feels that relations between government and small firms have worsened, and that the level of awareness among small businessman of government assistance

scheme was still very low. ● The right-wing Institute of Economic Affairs has called on the government to privatize the post Office as a means of improving the postal service urban dwellers, says the report.

and preventing unnecessary increases in its charges. The conclusions of the IEA study are contained in a report published today, referring to the post office's income, it says:
The profits made in the past
six years derive not from higher efficiency but from putting the prices up faster than the rise in the cost of labour, whilst also

reducing the quality of service".

The IEA suggests that the post office, which made record profits of £136m last year, is as good a candidate for privatization as British airways or British Telecom, the report, Liberating the Letter, outlines a 10-point plan which calls for the abolition of the Post office's monopoly in carrying letters and for the sale of shares in the corporation to the private

It says: "The Post office is currently profitable and has the potential to remain so even without the letter monopoly; the public could be expected to ake up the offer of shares in it".

The IEA says that there is no justification in maintaining the Post Office's monopoly on the that this monopoly "has been maintained on grounds of pragmatic self-interest by successive governments which have used it as a source of revenue - as well as by the Post Office itself which has enjoyed the financial comfort it affords"

The IEA dismisses the argument that the Post Office fulfills a social need in the rural areas and so needs to be subsidized. That subsidy comes from the

City Editor's Comment

Trade vision clouded by cut-price dealing

Trade talks over export credits subsidies have turned even nastier, with France once again cast as the prima donna.

M Jacques Delors, finance minister, has told Delors. EEC counterparts that he will not accept a compromise on a new concensus for manufactured goods be-cause, among other things, the Americans will not negotiate a similar deal for agricultural products.

European trade officials believe that this could rebound badly on the French – with the US demanding that the Common Agricultural Policy be included in talks now taking place.

The French incensed by a deal the Americans did in January – undercutting them by up to \$15 a tonne when selling a million tonnes of flour in Egypt - that they now seem blind to any threat to the

US trade officials admit that they poached sales, in a traditional French market to demonstrate that they could fight dirty too.

Despite that setback for Europe, the private talks have continued with the US still on the defensive.

It has changed the way it subsidized agricultural goods last autumn, going over to "blender credits". The recipe of one-fifth government backing at 3 per cent, and the rest from commercial banks at a fraction over the US prime rate, first caused Argentina to complain.

Americans were turning cash markets into credit markets, it said with an effective interest rate of just 8 per cent.

The Australians, losing Middle East markets because of harvest shortfalls, joined in. But it soon became a fight between the US and Europe.

The CAP's export restitution programme creates food mountains, which are dumped on world markets, Washington claimed.

"The talks are to avert a trade war in agriculture which everyone fears will spill over into other areas," said a US agricultural specialist.

Accounts vary as to what happened on June 24, the last time the parties met, with a European delegate insisting: "The Americans said they would not talk, but would listen. The Europeans want a maximum of six months' credit, but would accept exceptional items over two years, if there were no subsidies."

The trouble for the French is that, although other members of the EEC have backed them up to now on the agricultural issue, they are exasperated by French intransigence over the industrial goods

One European trade adviser said: "If the Americans actually agreed to negotiate on agricultural products, the French would find themselves isolated at first on the consensus and, most probably, later on the CAP as well."

Co-op agrees to merger

By Derek Harris

The first step towards a merger of the profitable Cooperative Wholesale Society (CWS) and the higgest cooperative retailer, Cooperative Retail Services (CRS), is believed to have been agreed in principle at secret talks in Manchester over

It signals a more competitivi stance by the ailing Co-op, ability to resist further cuts in the price in the present climate of recession and weak oil supermarket chain, has been challenging co-ops as the biggest supplier in the packaged grocery market. Tesco Stores is also catching up.

The retail co-ops sales were up only 2.5 per cent last year. Although profits rose 3 per cent at the trading level, there were still losses overall, after all charges, of about £49m. One of the advantages being

claimed for a new line-up at the top of the Co-op movement is that it will aid the CWS policy of reducing prices of goods supplies to the retail co-ops More help has also been promised by CWS in setting up An announcement is ex-

pected this week, probably tomorrow, on the results of the talks, which were attended by leaders of the CWS, CRS and the Co-operative Union, They included the three chief

executives; Mr Denis Lander (CWS), Mr Alf Lee (CRS) and Mr Lloyd Wilkinson (Co-operative Union). The likely announcement is

of a joint CWS-CRS holding board being set up to concert trading policies quickly. It would be a first step towards creating a formally-merged organization with a combined annual turnover of about £2.25bn. A full merger would involve lengthy constitutional procedures. A merger is likely to take the

form of a holding organization which would include the Cooperative banks and CIS, the insurance subsidiary. There would be a manufac

turing procurement and distribution arm equivalent to CWS and a retailing arm largely equivalent to CRS

countries, and trains many foreigners. Mr Greenwood said: The more equipment we can get into Cuba now, the more it lots more countries."

Opec convenes in triumphant mood By Jonathan Davis, Energy Correspondent

Oil ministers from the Organization of Petroleum Exporting Countries meet in Helsinki today and are widely expected to defer any change in oil prices until the end of the

The new reference price of \$29-a-barrel agreed at Opec's crisis talks in London in March has held, despite considerable scepticism about the exporters'

The \$5-a-barrel price cut in March was accompanied by an agreement to place an overall ceiling on Opec production of 17.5 million barrels a day, with Saudi Arabia acting as the marginal "swing producer" of oil, adjusting its output to meet

fluctuations in world demand. Although Opec has recovered from its nadir of 14 million barrels a day in March, it is still running below the level of the ceiling, at approximately 16.5 million barrels a day, according to reliable estimates. This is barely more than half its peak 1979 level of 31 million barrels a day, even though seasonal factors mean that demand is certain to pick up towards 19

million barrels a day by the

fourth quarter of the year. The oil ministers are nevertheless expected to congratulate themselves on their success in sticking in broad terms to their pricing and production agree-ment, and leave further sub-stantive decisions on prices and

individual output quotas uptil the expected demand revival Leading ministers such as Sheikh Yamani, of Saudi Arabia, and Sheikh Ali Khalifa, of Kuwait, have said repeatedly that they expect the present price level to remain unchanged

until 1985 or even later. One contentious side issue that has to be settled at the meeting is that of succession to Dr Marc Nan Nguema, the Opec secretary-general. Dr Nguems, from Gabon, ended two-year term last month, and both iran and Iraq have nominated successors - both of

whom are likely to be rejected Nigeria' pricing and production policies are also expected to come under scrutiny. Whereas most of Opec's 13 members have been observing their production quotas. Niceria's second-quarter output has been running at least 100,000 barrels a day above its 1.3 million barrels a day ceiling.

Doubts on BBC satellite

By Pearce Wright, Science Editor

the weekend said the BBC was considering dropping its plan to use a British-built satellite in favour of a much cheaper American one.

Unisat is important to the British Government's policy because it is seen as a springboard for the booming satellite communications market expected to earn more than £10,000m over the next 15

But there is a feeling within the BBC that the corporation is being used to promote the government's industrial policy regardless of what it costs the corporation to provide its

All this is underlined by the knowledge that the Independent Broadcasting Authority, which appeared to have fallen behind £350m.

However, doubts have the BBC in moving to direct emerged in the BBC over broadcasting satellites, is escalating costs. Press reports at considering its own project munications satellite system.

> At the very least, the BBC cheaper price for Unisat, which wants £24m a year from the corporation.

The BBC may revise its timetable for direct broadcasting by satellite. No decision has been taken, but BBC officials are sticking to estimates that the project is 60 per cent likely to go ahead under the scheme announced last year.

Thay would provide broadcasting via a new type of British communications satellite called Unisat, which is being built by a consortium consisting of British Telecora, British Aerospace and GEC-Marconi at a cost of

Friday sees full-year figures from the company which is Britain's biggest plant engineer-ing contractor. The market, which over the past week has marked the share price down to a new low of 44p, expects no better than £6m of pretax profits against £20.4m last time. One or two wilder souls are going for breakeven or worse. At half time, when the

company reported a slump in profits to just over £3m, the interim dividend was halved. The axe is expected to be applied in a similar way to the final. With no upturn in prospect and chronic worldwide overcapacity in the sort of plant that Davy builds, things are going to look bleak for the company for at least another year and a half.

By contrast, MFI Furniture Group, which reports full-year figures on Tuesday, has been experiencing buoyant demand. It is the country's largest furniture retailing group, and interest rates at home, though brokers expect it to produce the authorities will probably pretax profits of between £24m

relocated or refurbished over

the last year. the last year.

The group has also been trading up by selling a signifi-.. cant proportion of its products under the Hygena label in the last six months.

that the group will be expanding its product range into electrical goods.

: This week sees interim statements from two discount houses, Alexanders and Union, Discount houses, which are at a five-year low against the FT All-Discount houses, which are at a perhaps surprising that their five-year low against the FT All-shares should be in such share index despite the gently disfavour. Alexanders prospec-

The results are expected to downward path in interest rates. Lively yields 11.2 per cent, while coincide with an announcement merely make a statement in even Union, the largest and that the group will be expanding and announce a divimost highly-rated of the lot, trading and announce a divi-dend at the half-way stage, preferring to leave figures to the

full-year report. They generally do well-out of falling interest rates so it is

ECONOMIC VIEW

Focus on US money policy

what is happening to public borrowing in Britain and by events across the Atlantic where Mr Paul Volcker, the Federal Reserve Board chairman, will be reporting to Congress on the conduct of money policy over the next 12 months.

Mr Volcker's remarks to the

Senate banking committee last week that the Fed had been tightening credit policy and that short-term rates could rise, albeit not by much, sent the dollar soaring on Friday

This puts upward pressure on prefer to take the strain on the

recovery. An imminent rise in British rates looks unlikely.

The public sector borrowing requirement for the first quarter of the financial year, which is published on Thursday, may also provide some reassurance

Analysts expect the PSBR to be under £4,000m without seasonal adjustment, and perhaps less than £2,000m when seasonal factors are taken into account, which would put the Government more or less on track for its full-year target of

£8.200m. central government borrowing -

The markets this week will be dollar exchange rate rather than totalling £5,460m in the first preoccupied by the question of countenance a rise in rates quarter of 1983-84 - reflects what is happening to public which would inhibit economic lending to local councils and state industries which has gone to repay loans from other sources, leaving overall public

borrowing unchanged. But residual doubts about the trend of public spending remain, despite the Chancellor's recent £1,000m package of cuts.

Also gut this week are June provisional retail sales (today); May average earnings, May construction orders and firstconstruction orders and first, these profits are expected to quarter company borrowing come from Lloyd's under-(Wednesday); second quarter consumer spending and June cyclical indicators' (Thursday) Much of the huge jump in and April engineering sales and

gives an income of as much as 8.4 per cent.

The stockbroking firm, Montagu, Loebl Stanley, an expert on the sector, believes that lack of investment confidence can be attributed to the wariness of potential investors after the disasters of recent years, and to a belief that the way the authorities intervene in the money markets is likely to be changed during the course of this administration. It nevertheless continues to recommend purchases of stock in the sector.

Hogg Robinson, the msurance broker, reports yearly figures on Tuesday. Hogg does not do much business in the United States, depriving its profits of the kind of currency gain that brokers with a higher exposure on the other side of the Atlantic are getting. Brokers nevertheless expect pretax pro-fits to rise by about £500,000 to aboutt £9m.

Perhaps as much as £2m of writing agencies from which the group will have to divest at some stage.

INVESTORS' NOTEBOOK

Rayford makes its supreme City start

Dealings begin this morning world. Technology for Business Broker Greene & Co is offering probably stems from the group's shares of Rayford Supreme is now the largest supplier of 750,000 shares at 100p a share abyamal trading record. This placing of 1,169,828 ordinary f2.5m. sold by the directors, while the hares in the group at 250p per hare which capitalizes the looking for additional cash expected to raise a total of ompany at £12m, Last week to expand the business by £121,000 for extra working obbers were confidently pre-licting that the shares would itart trading at a 20 per cent premium to the offer price.

Rayford was set up by Mr Ray Horney, aged 47, in 1960. He joined forces with an associate to open a showroom n Brighton selling washing machines and vacuum cleaners. By 1972 he and his wife were sole owners of the business and nad four showrooms. At this nage the business was split petween the Rayford showrooms which emphasized cusnomer service and free delivery and the newly established Supreme discount warehouses, Today Rayford Supreme owns six Rayford Electrics and 15 Sapreme Discount Stores.

The directors are forecasting pretax profits of £1,75m in the year ending September 30. At the placing price the group is valued on a prospective fully taxed p/e of 10.3 times. A dvident of 4.9 per net share is expected this year to offer a goss yield of 3.4 per cent on the ar ending September 30. At

Mr Paul Bion has been involved with computers for most of his working life, but two years ago along with two colleagues he decided to set up on his own. For an undisclosed sum he bought the lossmaking computer group Technology for ess from LogAbax, the French designer and manu-facturer of small business

Then Mr Bion set about turning around the fortunes of the company and carving a niche for himself in the legal

figures. These revealed a pretax profit of £747,000 against a loss last time of £308,000. Mr Brian Reynolds, chairman of the group which came to market earlier this year by way of a minimum tender price of 150p, says an exceptionally low level of costs is responsible for the UICTERSE.

Michael Clark

Legal threat hangs over . shares sale

Metal Sciences (Holdings) comes to the USM this week facing the threat of court action to prevent its directors taking out a patent on the company's discovery of a new process for producing shotblasting grit. Metal Sciences, whose chairman is Sir Monty Finniston, claims that the process is cheaper and more efficient than existing methods of producing the grit, which is used for

agineering industry. But Mr John Moore, chairman of Barton Abrasives, part of the Barton Group, which is established in the abrasives field, has threatened to block the company's attempt to patent

the process.

Solicitors' letters have been exchanged and an action would almost certainly delay a decision to grant a patent. Within the industry it is being argued that the Metal Sciences process uses unpatentable conventional tech-

ue of Participating Shares

The subscription list will be opened at 10.00 a.m. on 3rd August, 1983 and will be closed so soon thereafter as the Fund may desire.

Procedure for Subscription

Applications must be made for a minimum of 2,000 Participating Shares and should be made on the Application Form included with this Prospectus. The Application Form duly completed should be sent to TSB Gilt Fund Managers (Channel Islands) Limited, 10 Wharf Street, St. Helier, Jersey accompanied by a remittance in sterling for Gl a share. Further details are set out in the Application

The Fund reserves the right to reject an application in whole or in part in which event the application monies or any halance thereof will be returned to the applicant by post at the applicant's risk.

Applications will not be acknowledged, but certificates for Participating Shares allotted will be posted at the applicant's risk not later than 31st August, 1983.

Non-sterling funds

The Articles of Association contain provisions for the issue of separate classes of Participating Shares the proceeds of which may be invested in sterling and/or non-sterling investments. In such a case the Articles provide that a separate fund of investments (all denominated in the same currency) is established for each class of shares. The Articles also make provision for a class of shares with a managed fund, where the investments are denominated in more than a single currency. Where there is more than one class of Participating Shares the Articles provide that shares of one class may be converted into shares of another class. At present the Directors do not intend to offer shares except with underlying sterling investments. Shareholders will be notified if this policy changes. Were the investment policy of the Fund to change in relation to currencies in which investments may be made, this would be subject to the approval of The Stock Exchange.

Establishment of the Fund

The Fund has been promoted and established by the Managers, a wholly-owned subsidiary of TSB Trust Company Limited, itself a wholly-owned subsidiary of Trustee Savings Banks (Holdings) Limited. This holding company is owned by Trustee Savings Banks Central Board (which is the central supervisory and regulatory body for the Trustee Savings Banks), and by the regional Trustee Savings Banks. Thus the Managers and its parent company and, as a result of the holding by the Managers of the Founders Shares, the Fund are each of them subsidiaries of Trustee Savings Banks (Holdings). Limited for the purposes of Section 154 of the Companies Act 1948 (Great Britain). It is expected, however, that the Fund will cease to be such a subsidiary when Participating Shares have been allotted and issued. The Investment Advisers are also a wholly-owned subsidiary of Trustee Savings Banks (Holdings) Limited. The shares in the Custodian are held by TSB Trust Company Limited and T.S.B. Unit Trust Managers (Channel Islands) Limited.

Management of the Fund

The Managers are responsible for managing the investments of the Fund (subject to the overall supervision of the Directors) under an agreement dated 12th July, 1983 made between the Fund and the Managers. This Agreement is terminable on six months' notice being given by either party. The Investment Advisers will provide the Fund and the Managers with regular and continuing advice on the investment and general deployment of the Fund's assets. For providing this service they are paid a fee

by the Managers.

The Investment Advisers have extensive experience of the London Money Market. They are active and well regarded participants in this and related markets and are well placed to anticipate changes in interest rates.

During the initial period of the Fund's operation the Managers have available to them as consultant the services of Mr. P. F. Keens, C.B.E. Mr. Reens is a Chartered Accountant who is past Chairman of Central Trustee Savings Bank Limited and TSB Trust Company Limited, and who has been connected with the Trustee Savings Bank to over locary five years.

been connected with the Trustee Savings Banks for over forty five years.

The Custodian is TSB Trustees (C.J.) Limited appointed under an agreement dated 12th July, 1983. The responsibilities of the Custodian consist of holding all securities of the Fund in safe-keeping.

Directors
RONALD ANTHONY de PUTRON, F.C.A. (aged 60 years) is a Chartered Accountant. He is a Trustee of the Trustee Savings Bank of the Channel Islands and has been connected with the Trustee Savings Banks for 17 years. Trustee Savings Bank of the Channel Islands has funds in excess of £140m. He is a director of TSB Gilt Fund Limited, a public company listed on The Stock Exchange, which has

assets of over £60m.
BRIAN MICHAEL JOHN BROWN, F.I.B., F.B.I.M. (aged 46 years) is Managing Director of TSB Trust Company Limited, Mr. Brown was appointed General Manager in 1971 and became Managing Director in 1983. Mr. Brown is also a director of TSB Gilt Fund Limited. DENNIS GLOVER CREASEY (aged 63 years) is a Deputy Chairman of Trustee Savings Bank of the Channel Islands and a director of TSB Gilt Fund Limited. Mr. Creasey is also Chairman of

Australia and New Zealand Banking Group (CI) Limited.
REGINALD ROBERT JEUNE, O.B.E. (aged 62 years) is a Solicitor of the Royal Court of Jersey, Chairman of Trustee Savings Bank of the Channel Islands and Chairman of TSB Trust Company Limited, which controls funds of over £430m. Mr. Jeune is also Chairman of the Royal Trust Company of Canada (Cl) Limited, as well as being a director of TSB Gilt Fund Limited.

CUTHBERT GRAHAM PILE, F.C.A. (aged 67 years) recently retired as senior partner with

Messrs. Reads & Co., Chartered Accountants, but remains a consultant with them. He is a Deputy Chairman of the Trustee Savings Bank of the Channel Islands and has been connected with the Trustee

Savings Banks for 14 years.

ANTHONY PERCIVAL WARWICK SIMON, T.D., F.C.A. (aged 67 years) is a Chartered Accountant, Deputy Chairman of TSB Trust Company Limited and Vice-Chairman of Trustee Savings Bank – South East which controls funds of over £950m. He is also a director of Equity Capital for Industry and a director of TSB Gilt Fund Limited. Between 1975 – 1977 Mr. Simon was Chairman of the User Tours American of the Unit Trust Association.

Barclaytrust International Limited have been appointed by the Managers under in attenuant dated 12th July, 1983 to act as Administrator and will therefore be responsible to the Managers for the day to day administration of the Fund.

Costs, Charges and Fees The preliminary expenses incurred in the formation of the Fund, together with all expenses incurred in the initial issue of Participating Shares and the application for listing on The Stock Exchange, will be borne by the Managers and not the Fund. OBJECTIVE

THE FUND WILL ENABLE INVESTORS TO PARTICIPATE IN A PROFESSIONALLY MANAGED MONEY MARKET FUND DESIGNED FOR CAPITAL APPRECIATION WITHOUT THE PAY-MENT OF ANY DIVIDENDS.

The Fund proposes to achieve its objective by adopting a flexible investment policy, aimed at an increase in capital values, coupled with accumulation of income. Initially the Fund will be limited to sterling investments but there are provisions for investments to be made in other currencies

The Fund could therefore be particularly suitable to those people who wish to set aside sums for a known liability or whose funds form a liquidity reserve. The Fund is open-ended and operates in a similar way to a unit trust, in that it may issue and redeem Participating Shares at prices based on their underlying net asset value.

INVESTMENT POLICY

The Fund's investments will, to start with, all be denominated in sterling. Investments will be made in Treasury Bills, Certificates of Deposit, Bills of Exchange, Financial Futures, and other monetary instruments. Investments may also be made in securities of all kinds created or issued or guaranteed by any government or public authority, bank deposits and also other investments permitted by the memorandum and articles of the Fund. There are restrictions on investments which may be made: details are set out in paragraph C(7) of the Appendix.

Around 25 per cent, of the portfolio will normally be realisable at 7 days' nonice.

NET INCOME WILL BE ACCUMULATED AND AC-CORDINGLY NO DIVIDENDS WILL BE PAID.

this offer. The Articles of Association provide that the Managers may receive an initial charge not exceeding 2.5 per cent. of the price at which Participating Shares are subsequently issued. For the time being the charge will not exceed 1.5 per cent. The Managers are also entitled to receive the rounding up and rounding down adjustments to the nearest one-tenth of the minimum unit of the currency in which the subscription price or redemption price is payable.

Annual Charge: The Management Agreement provides for the Managers to receive from the

Annual Charge: The Management Agreement provides for the Managers to receive from the Fund a weekly fee equal to one fifty-second of five-eighths of one per cent. of the weekly value of the investments of the Fund (calculated on an offer price basis).

Out of these charges the Managers will pay commissions to brokers and other approved agents of one per cent. in respect of allotments arising from applications bearing their stamp. The Managers will also pay the fees of the Administrator and of the Investment Advisers.

The agreement with the Custodian allows for a weekly fee, payable by the Fund, of one fifty-second of one-tenth of one per cent. of the weekly value of the investments of the sterling class on an offer price basis, with a minimum fee of \$17,500 a year. The fee for other classes of Participating Shares is to be agreed in due course.

Shares is to be agreed in due course. The Fund will bear (inter alia) the fees and expenses of the Auditors and of the Custodian, commissions and duties in connection with accurities arquired and disposed of by the Fund, taxes payable by the Fund, and the costs of maintaining a listing for Participating States on stock exchanges. The Fund also bears certain of the out-of-pocket expenses of the Managers as referred to in paragraph

Accounts and Reports

It is intended to send audited accounts and reports relating to the Fund half yearly to Shareholders. The first accounts will be made up to the business day immediately following the last Dealing Day in March 1984.

The weekly bid and offer prices for the Participating Shares will be published each day in the Offshore and Overseas Funds Section of the London "Financial Times" or in some other suitable

The Comptroller of Income Tax in Jersey has confirmed that income of the Fund arising outside Jersey and bank interest arising in Jersey will be exempt from Jersey Income Tur. The Fund's liability to Jersey traction is therefore limited to Corporation Tax, which is currently £300 per annum.

Jersey does not levy taxes upon capital, inheritances, capital gains, gifts, sales or turnover, nor are there estate duties. No Stamp Duty is levied in Jersey on the transfer inter vivos or redemption of shares

The attention of Jersey residents is drawn to the provisions of Article 134A of the Income Tax (Jersey) Law 1961 which may render such residents liable to Jersey Income Tax on undistributed income and profits of the Fund. The attention of Guernsey residents is drawn to the provisions of Section 67 of the Income Tax (Guerasey) Law 1975 which may in certain circumstances counteract the

avoidance or reduction of an income tax liability.

The Directors intend to conduct the affairs of the Fund so that it is not resident in the United Kingdom or Jersey.

Shareholders (other than those holding Participating Shares as dealing stock, who are subject to

separate rules) who are resident or ordinarily resident in the United Kingdom may, depending on their circumstances and subject as is mentioned below, be liable to capital gains tax or corporation tax at the capital gains rate in respect of gains realised on disposal (or redemption) of Participating Shares.

Applicants who are ordinarily resident in the United Kingdom should also be aware that Section 478 of the Income and Corporation Taxes Act 1970 (together with Sections 45 and 46 of the Finance Act 1981) may in certain circumstances render them liable to tax in respect of undistributed income and profits of the Fund. Clearance under Section 464 of the Income and Corporation Taxes Act 1970 from the provisions of Sections 460 to 467 of the Act (which provide for cancellation of tax advantages from certain transactions in accurities) has been given by the United Kingdom Board of Inland Revenue in relation to the issue, sale, redemption, and purchase and conversion of Participating Shares.

While the above references to taxation are believed to be correct at the present time, investors are

onal advice on their taxation position.

Redemption of Participating Shares

Participating Shares may, except where there is a suspension of the valuation of assets (see "Dealing Days" below), he redeemed on any Dealing Day. The redemption price is defined in the Arnicles of Association: a summary of the calculation is given in paragraph A of the Appendiz. Although the Fund is under an obligation, subject to the provisions of the Articles of Association and of Jersey law, to redeem at the redemption price it has been agreed with the Managers that they may deal with

law, to redeem at the redemption price it has been agreed with the Managers that they may deal with requests for redemption as principals. In such a case the price would be not less than the calculated redemption price. The Managers will be free, subject to the Articles of Association and to Jersey law, to require the Fund to redeem any Participating Shares purchased by the Managers.

To realise all or part of a holding, a shareholder should complete the form on the back of each Share Certificate and send the Certificate to the Managers. The completed forms should be reteved not later than 3.00 p.m. on the business day immediately preceding the relevant Dealing Day in order to qualify for redemption or purchase by the Managers on the Dealing Day. Requests for redemption received late may be held over until the next Dealing Day.

Any amount payable to a Shareholder in commection with requests for redemption will normally be paid in accordance with instructions received or, if this is not practical or no instructions are given, by cheque. In this case the redemption proceeds will be posted to the Shareholder (at his risk) normally not later than seven days following the later of the date on which the redemption (or purchase) takes effect and the date of receipt by the Managers of a duly endorsed Certificate for the shares to be redeemed or purchased.

redeemed or purchased.

The Fund is not bound to redeem on any one Dealing Day more than one-lifth of the total number of Puricipating Shares of any class then in issue. Where the Fund does not redeem all the Participating Shares for which the Fund has received requests for redeem from any one Dealing Day the requests for redeemption will be reduced rateably and those Participating Shares not redeemed will be treated as if the request for their redeemption had been made in respect of each following Dealing Day until all have been so redeemed, in priority to any later requests for redemption received.

Requests for redemption once made may only be withdrawn in the event of a suspension of valuation.

Compulsory Redemption
If at any time after 1st June 1984 the value of the net assets on an offered basis of any one class of Participating Shares shall, on each Dealing Day within a period of five consecutive weeks, be less than 15 million the Fund may redeem all the Participating Shares of that class then in issue at the relevant

redemption price.

The Directors of the Fund may redeem an entire holding of Participating Shares if as a result of a partial redemption an investor would still hold Participating Shares in the Fund of a value of less than the minimum holding (as the Directors may from time to time determine).

All Participating Shares not previously redeemed will be redeemed by the Fund on 31st December 2083, or if that date is not a Dealing Day on the next following Dealing Day, at the redemption price ruling on the day in question.

The Directors are empowered under the Articles of Association to require the transfer or redemption of any Farticipating Share which is owned directly or beneficially by any person in breach of any law or requirement of any country or governmental authority or by virtue of which such person is not qualified to hold such share.

Minimum Holding

This is a holding of Participating Shares of an aggregate value (by reference to their Subscription Price) of £2,000 or its equivalent in another currency in which any Participating Share is designated (or such other sum as the Directors may from time to time determine). Subsequent applications by existing Shareholders may be made for holdings valued at £100 or its equivalent in

Dealing Days will normally be every Wednesday, or if this day is not a business day the next following business day, or such other day as may from time to time be determined by the Directors. The first Dealing Day after the initial issue will be 10th August 1983 and the assets of the Fund will normally be valued by reference to prevailing prices at 3.00 p.m. on the business day immediately preceding each Dealing Day. However, the Directors may suspend valuation of any class of shares if, in their opinion, it is not reasonably practicable to determine their the value of the net assets of that class, or if a breakdown occurs in any of the means normally employed to according to the class, or if a breakdown occurs in any of the means normally employed to ascertain such value or for any other reason the value cannot be ascertained. During any period of suspension no Participating Shares may be redeemed nor, other than those already allotted, issued.

Further Information

Further statutory and general information is contained in the Appendix.

APPENDIX

A. SHARE CAPITAL AND RIGHTS

Expressions used below have the meaning ascribed to them in the Articles of Association.

The authorised phare capital of the Fund is £500,000, divided into £000 Founders Shares of £1 each and 49,900,000 unclassified shares of the each. The unclassified shares may be issued as Participating Shares or Nominal Shares (see below). At the date bereof no Participating or Nominal Shares have been issued to cash at par to the Managers. Founders Shares

The Founders Shares have been created so that Participating Shares may be issued (in order to be participating redeemable preference shares, the Participating Shares are required under Jersey Law to have a preference over some other class of share capital). The Founders Shares on a poll carry one vote (or each share held but do not carry any right to dividends. Founders Shares are issued only to the Managers.

Participating Shares Participating Shares are participating redeemable preference shares. They are divided into classes according to the currency of the investment in which the proceeds of the issue of each class are invested, except for the class of shares of which the proceeds of issue form the managed fund and where investments may be made denominated in more than one currency. A separate fund of investments is maintained for each class. Each holder of Participating Shares will be entitled, on a poll, to one vote for each share held. Participating Shares when the investment is maintained for each class. Shares have a right to dividends but it is not intended that any dividends will be paid. If any dividends are paid, different amounts of dividends may be payable in respect of different classes of Participating Shares.

Nominal Shares

The Nominal Shares are non-participating redeemable preference shares. They can only be issued at par and only for the purpose of providing funds for the redemption of Participating Shares. They will only be assed to the Managers. They carry no right to dividend. Each holder of Nominal Shares is entitled, on a soll, to one wate irrespective of the number of shares held. The Managers are obliged to subscribe for Nominal Shares for cash at par when Participating Shares are redeemed, unless the Directors decide that the nominal amount of such Shares is to be redeemed our of profits. Nominal Shares may be converted into Participating Chares with Managers

Rights on Winding up

In a liquidation the liquidator transfers assets to and from the funds of investments of the separate classes of Paracipating Shares in such a way as is necessary in order that the effective burden of creditor's claims is shared among the holders of shares of different classes in such proportions as the liquidator thinks

ic. The assets available for distribution among the Shareholders will then be applied in the following The astets awaitable for destribution among the binarcations of acts class of a sum in the currency in which that class is designated as nearly as possible equal (at the middle-market rate of exchange pretailing in the foreign exchange markets at a time selected by the liquidator which is within fourteen days proceding the date of such payment) to the naminal among of the Participating Shares of such class held by such holders respectively provided that there are sufficient assets available in the relevant fund of investments of that class to enable such payment to be made. In the event that, as regards any class of Participating Shares, there are issufficient assets available in the relevant fund to enable such payment to be made, recourse shall be had:

(i) first, to the assets of the Fund not comprised within any of the class funds; and (ii) secondly, to the assets remaining in the funds for the other classes of Participating Shares (after (iii) secondly, to the assets remaining in the funds for the other classes of Participating Shares (after

(ii) secondly, to the spaces remaining in the funds for the other classes of Participating Shares (after payment to the holders of the Participating Shares of the classes to which they refute of the amounts to which they are respectively entitled under this paragraph (1)) pro rate to the total value of such assets remaining within each such fund.
(2) Secondly, in the payment to the holders of the Nominal Shares of sums up to the nominal amount paid up out of the assets of the Fund not compeled within any of the funds of investments of any class of Participating Shares remaining after any recourse under paragraph (1)(i) above. In the event that there are insufficient assets to emble such payment in full to be made, no recourse shall be had to the assets comprised within any of the class funds.

are insufficient assets to enable such payment in full to be made, no recourse shall be had to the assets comprised within any of the class funds.

(3) Thirdly, in the payment to the holders of the Founders Shares of sums up to the nominal amount paid up out of the assets of the Fund not comprised within any of the funds of investments remaining after say recourse under paragraph (1/6) above and after payment in full to the holders of the Nominal Shares under paragraph (2) above. In the event that there are insufficient assets as aforesaid to enable such payment in tull to the holders of the Founders Shares to be made no recourse shall be had to the assets comprised within any of the class funds.

(4) Fourthly, in the payment to the holders of each class of Participating Shares of any balance then remaining in the relevant fund of investments for that class, such payment being made in proportion to the sumber of shares of that class held.

(5) Fifthly, in the payment to the holders of the Nominal Shares of any balance then remaining and not comprised within any of the class funds, such payment being made in proportion to the number of Nominal Shares held.

Redemption Price

The redemption price per Participating Share of any class is determined in accordance with the Articles of Association: It is the total of the nominal amount of a Participating Share and a sum calculated by assessing the realisable value (on a bid basis) of the net assets of the fund of that class at the relevant Valuation Point being 3.00 p.m. on the business day immediately preceding the appropriate Dealing Day, deducing a provision for duties and charges payable on the assumption that the whole of that fund's portfolio was realised, dividing the amount so calculated by the total number of Participating Shares of that class in issue and deducing from the resultant amount an amount an amount equivalent to the nominal amount of a Participating Shares. This turn is then rounded downwards to the scarcest one-tenth of the minimum unit of the currency in which the redemption price is payable (the Managers being emitted to receive the rounding down adjustment on Shares redeemed). Where scribement is to take place in a currency other than that to which the realised Participating Share relates, the conversion is effected taking into account the currency conversion sector referred to in Conversions' below. Where Participating Shares are purchased by the Managers, the price paid not less than the redemption price.

Further Issues of Participating Shares

The Articles of Association provide that, after the initial issue of Participating Shares, and except when there is a suspension of the valuation of the Fund's assets, further Participating Shares may be issued on Dealing Days at a subscription price per Participating Share of not less than the nominal amount plus a promision determined by assessing the value (on an offer basis) of the net sasets of the fined of that class for the relevant Dealing Day, adding a provision for duties and charges which would be payable on acquisition of the whole of that then's portion, dividing the amount so calculated by the total number of Participating Share. The lineal Charge (not exceeding 2.5 per cent.) may be added and the total is then rounded upwards to the nearest constant of the minimum unit of the currency in which the subscription price is pushle (the Managers being untiled to the linitial Charge and rounding up adjustment).

Applications should be made on an application form and the completed form, together with remitturace for the full amount payable an application, sent to TSB Gik Fund Managers (Channel Islands) Limited, 10 Wharf Street, St. Heber, Jersey. The Fund reserves the right to reject an application in whole or in part: in that tree the application will not be schnowledged but contract notes will be posted within 7 days and certificates for Participating Shares will be posted at the applicant's risk within two months of receipt of payment and registration details.

The Articles provide that the Fund may decline to accept Participating Shares unless cleared funds in

The Articles provide that the Fund may decline to accept Participating Shares unless cleared funds in payment of the shares to which an application relates have been received by 12.00 noon (Jersey time) on the Dealine Dec in muscline.

Dealing Day in quantion.

Participating Shares may be assued in exchange for investments on such basis of valuation as the Directors think fit, if they are satisfied that the terms of such exchange are not such as are likely to result in any material prejudice to existing holders of Participating Shares.

The Fund may also from time to time make offers of Participating Shares at fixed prices, within limits act out in the Articles of Association. Conversion of Participating Shares

The Articles of Association give a Shareholder the right to convert all or any Participating Shares of our no shares of another class. The number of Participating Shares of the new class to be allotted in the shares of another class. The number of Participating Shares of the new class to be allotted in secondance with the formula $N = K \times (RP \times CF)$ (· SP)

where:

N is the number of Participating Shares of the new class to be allotted:

N is the aumber of Participating Shares of the original class to be converted;

K is the aggregate number of Participating Shares of the original class to be converted;

RP is the Redemption Price per share of the original class ruling on the relevant Dealing Day;

CF is the currency conversion factor determined by the Directors for the relevant Dealing Day is representing the effective rate of exchange applicable to the transfer of assets between the relevant funds of the two relevant classes, after adjusting such sum as may be necessary to reflect the effective casts of making such transfer and

making such transfer; and

making such transfer; and

SP is the Subscription Price per share for the new class ruling on the relevant Dealing Day.

SP is the Subscription Price per share for the new class ruling on the proceeds of which will be placed in At present only one class of Participating Shares will be issued, the proceeds of which will be placed in measurements denominated in sterling. Shareholders will be notified if the Directors propose to issue classes of Participating Shares whose proceeds will be investments denominated in currences other than the contraction.

valuation

The Articles of Association set out the detailed provisions as to how the investments of the Fund are to be valued. Treasury Bills, Certificates of Deposit and other Money Market instruments and Financial Futures to three to the appropriate market. Quoted investments will be valued at contracts will be determined by reference to the appropriate market. Quoted investments will be valued at the subset of the relevant Valuation Point being 3.00 p.m. on the business day stock exchange prices prevailing at the relevant Valuation Point being 3.00 p.m. on the business day stock exchange prices prevailing at the relevant Valuation Point being 3.00 p.m. on the business day stock exchange prices prevailing at the relevant Valuation will be valued at the Managers' valuation. The immediately preceding the Dealing Day. Unquoted investments will be valued at the Managers' valuation. The immediately preceding the consider such valuation better reflects the lair value of any asset, and may carry out a special valuation of net assets and issue and redemption prices if in their view circumstances merit it. Valuation

The following is a copy of a report addressed to the Directors of the Fund by Turquands Barton Maybew & Co., the auditors of the Fund:

To the Directors
TSB Capital Fund Limited

Dear Sirs.

TSB Capital Fund Limited ("the Fund") was incorporated on 11th July, 1963. As at the date hereof, no TSB Capital Fund Limited ("the Fund") was incorporated on 11th July, 1963. As at the date hereof, no TSB Capital Fund Limited ("the Fund") was incorporated on 11th July, 1963. As at the date hereof, no TSB Capital Fund Limited ("the Fund") was incorporated on 11th July, 1963. As at the date hereof, no TSB Capital Fund Limited ("the Fund") was incorporated on 11th July, 1963. As at the date hereof, no TSB Capital Fund Limited ("the Fund") was incorporated on 11th July, 1963. As at the date hereof, no TSB Capital Fund Limited ("the Fund") was incorporated on 11th July, 1963. As at the date hereof, no accounts for the Fund has accounts for the Fund has not commenced bosiness.

Yours faithfully,

Yours faithfully,

2 ARTICLES OF ASSOCIATION The Articles of Association provide (inter slis):—

The Articles of Association provide (inter slis):—

(1) The Directors may require a subscriber to pay to the Managers upon the issue of Participating Shares an initial charge and exceeding 25 per cent, of the total of the subscription price and an amount to adjust the resulting total upwards to the nearest one-track of the minimum unit of the currency in which the subscription price is payable. (2) Subject to the provisions of the Law the Fund may by Special Resolution from time to time reduce in

(2) Subject to the provisions of the Law the Fund may by Special Resolution from time to time reduce its share capital in any way.

(3) Subject to the provisions of the Law, all or any of the special rights and privileges for the time being attached to any class of abares for the time being issued may from time to time be altered or abrogated with the consent in writing of the holders of not less than three-fourths of the issued abares of that class or with the sanction of an entraordinary resolution passed at a separate class meeting of the holders of such abares. At such a meeting every holder of the abares of the class shall be entitled, on a poll, to one vote for every such share held by him. The necessary quorum at any such meeting is two persons at least holding or representing by proxy one-third of the issued abares of that class, except that if at any adjourned meeting such a quorum is not present the holders who are present shall be a quorum.

(4) The rights attached to the Participating Starres shall be deemed to be varied by any variation of the rights attached to shares of any other class or by the creation or issue of any shares ranking in priority to them as respects participation in the profits or assets of the Fund. Subject to this, the special rights attached to any class of shares having preferential rights shall, unless otherwise expressly provided, be deemed not to be varied by:—

(a) the creation, allotment or issue of further shares ranking pari passu therewith; or

(b) by the creation, allotment or issue of Founders Shares; or

(c) by the creation of Unclassified Shares, or

(d) by the allotment, issue or redemption of Participating Shares of any class; or

(e) by the conversion of Participating Shares of any class where the dividend is paid out of the fined of investments of their discretions to allot assets and liabilities to the funds of investments of the found investments of their other class; or

(f) by the exercise by the Directors of their discretions to allot assets and liabiliti

transfer such shares or to request their redemption.

(7) There are restrictions on investments, of which the following is an abbreviated summary. No investment may be acquired which would result in the value of the investments of the fund relating to any class of Participating Shares issued, ander, accepted or guaranteed by any Approved Bank exceeding 20 per cent, of the value of that fand or by any other person 10 per cent, of the value of that fund or a type of the purchase of financial instruments issued by local and public authorities and agencies and sovereign borrowers approved by the Directors. In addition so units in a unit strust or shares in an antisted mutual fund may be acquired if it would cause the Fund's holding of units and shares in mutual funds to exceed 10 per cent, of the total assets of the Fund. No interest in land may be acquired, nor any investment which may involve the Fund in unlimited liability (including partnerships). The Fund is prohibited from investing in commodities. The Fund may not exter into forward purchase contracts where the amount payable in respect of forward purchases for the fund of investments of a class of Participating Shares exceeds 10 per cent, of the assets of that fund. The nominal value of all financial futures communics comprised in the fund of investments of a class of Participating Shares plus the cost of the bolding in anch contracts may not exceed 20 per cent, of the value of the assets of that fund. Loans to third participants of the Fund.

D. THE ARTICLES OF ASSOCIATION - DIRECTORS

The Articles of Association contain provisions relating to Directors (inter alla) as follows:—

(1) Any Director may hold any other office or place of profit under the Fund (other than the office of Auditor) in conjunction with his office of Director on such terms as to tenure of office and otherwise as the Directors may determine. Any Director may also act in a professional espacing (other than as Auditor) and he or his firm shall be entitled to remuneration for such services as if he were not a

Director.

(2) A Director may not agriculty vote in respect of any contract in which he is materially interested but shall not be disqualified by his office from contracting with the Fund. A Director is not counted in the quorum of any meeting in relation to a resolution on which he is debarred from voting.

(3) The Directors shall be entitled to such remnaemition as may be voted to them by the Fund in General Meeting. Such remoneration shall be deemed in accrue from day to day. The Directors may also be paid all travelling, hotel and other expenses properly incurred by them in attending and returning from meetings of the Directors or any committee of the Directors or General Meetings of the Fund, or in connection with the business of the Fund.

(4) The Directors may exercise the powers of the Fund to borrow, but borrowings of the Fund and its subsidiaries shall not except with the consent of the Fund in General Meeting) exceed one-quarter of the aggregate of the against amount of issued and paid-up share capital and complicated reserves as defined in the Articles of Association.

the aggregate of the against amount of issued and paid-up share capital and consolidated reserves as defined in the Articles of Association.

(5) There is no share qualification for Directors.

(6) The office of a Director is vacated at the next annual general meeting after he attains the age of seventy

E. GENERAL INFORMATION

1. The Constitution of the Fund is defined in its Memorandum and Articles of Association; they are subject to alteration in accordance with Jersey law.

2. The preliminary expenses incurred in respect of the formation of the Fund are estimated to amount to £2,000 and the expenses incurred in connection with the initial issue of Participating Shares and the application to The Stock Exchange for admission to the Official List of Participating Shares are estimated to amount to £93,000. The inhowing contracts which are or may be material have been entered into otherwise than in the ary course of business:

(a) Management Agreement between the Fond and the Managers dated 12th July, 1983 whereby the latter have agreed to manage the business of the Fund. The agreement is rerminable on six months socied by either party. The Fund pays all out-of-pocket expenses incurred by the Managers in consection with the performance of their services including postage, teles, telegrams, and telephonic calls.

(b) Agreement between the Managers (1) Barchygrest Interminant Limited (2) and the Fund (3) dated 12th July, 1983 whereby Barchygrest Interminant Limited (2) and the Fund (3) dated 12th Party in the Fund (4) dated 12th July, 1983 whereby investment advice will be provided by Central Trustee Savings Bank Limited (2) and the Fund (3) dated 12th July, 1983 whereby investment advice will be provided by Central Trustee Savings Bank Limited (d) Costodian Agreement between the Fund (1) and TSB Trustees (C.I.) Limited (2) dated 12th July, 1983 whereby the latter was appointed Costodian of the Brand (2) Limited (2) dated 12th July, 1983 whereby the latter was appointed Costodian of the State of the Fund. (c) Letter written by the Fund we Mr. P. F. Keem on 12th July, 1983 appointing him a consulting to the Fund until 31st December, 1983.

(f) Administration Agreement between the Costodian (1) and Trustee Savings Bank of the Channel Islands (2) dated 14th July, 1983 whereby the latter agreed to provide administration services to the Costodian.

Coppodian.

8. The Fund has not commenced buniars and has not established and does not intend to establish a place of business in Great Brinia. The Fund does not have any ashaldingtes.

9. In view of the arrangements for the payment of preliminary expenses, which are described in paragraph E2 above, there is no minimum amount which in the opinion of the Directors must be raised by the present issue of shares in order to provide for the matters referred to in paragraph 4 of the Fourth Schedule to the Companies Act 1948 (Great British) namely:

(2) The purchase price of any property purchased or to be purchased, which is to be defrayed in whole or to part out of the proceeds of issue;

(b) Preliminary expenses payable by the Fund and any commission so payable;

(c) The repayment of any monies borrowed by the Fund in respect of any of the foregoing matters; and (d) Working capital.

10. Turquands Barton Mayhew & Co. have given and have not withdrawn their written consent to the issue of the Prospectus with the inclusion therein of their Report in the form and context in which it is included.

11. This Prospectus shall have the effect, where an application is made in pursuance thereof, of renderma all persons concerned bound by the provisions (other than penal provisions) of Sections 50 and 51 of the Companies Act 1948 (Great Brizain) so far as applicable.

12. The Fund does not have any debentures, loan capital, borrowing or undebtedness in the nature of borrowing, mortgages, charges, bire purchase commitments, guarantees or other material contingent liabilities. The Articles of Association permit borrowings and the Directors intend to perpoisite tanably borrowing facilities at such times as this is thought desirable or necessary, subject to the limits of the Articles of Association.

13. The issued and paid up share capital of the Castodian is £250,000. This is divided into 1,000 Ordinary Shares of £1 each, which carry one vote per share and are held by TSB Trust Company Limited, and 249,000 to per cent. Preference Shares of £1 each, which carry one vote per share and are held by TSB Trust Company Limited, and 249,000 to per cent. Preference Shares of £1 each, which carry one vote in tomi and which are held by T.S.B. Unit Trust Managers (Channel Islands) Limited.

14. The Directors of the Managers are: Reginald Robert Jeune, Philip Francus Keens, Douglas John Edwin Clothier, Dennis Glover Creasey, Anthony Percival Warwick Simon, Brian Michael John Brown and Ronald Anthony de Putron.

Mr. R. R. Jeune is a Director of the Fund and as a partner in the firm of Mourant du Feu & Jeune which will receive a lee for its services in connection with the incorporation of the Fund and thus issue. Messra Jeune, Simon and Brown are Directors of the Fund and are Directors of The Trust Managers (Channel Islands) Limited.

15. It will be the policy of the Directors of the Fund to obtain wavers of remunerat

Limited.

16. The Fund does not own any freehold or leasthold property.

17. Persons interested in acquiring Participating Shares in the Fund should inform themselves as to (i) the legal requirements within the countries of their nationality, residence, ordinary residence or domicile for such acquisition; (ii) any foreign exchange restriction or exchange control requirements which they might encounter on acquisition or tale of Participating Shares; and other tax consequences which might be relevant to the acquisition. and (iv) the income tax and other tax consequences w holding or disposal of Participating Shares in the Fund.

F. DOCUMENTS AVAILABLE FOR INSPECTION Copies of the above mentioned report and consent and of the above mentioned contracts have been attached to the copy of this Prospectus delivered to the Registrar of Companies in England and Wales for registration. Further copies together with the Memorandum and Articles of Association of the Fund and a copy of the Companies (Jersey) Laws 1861 to 1968 may be impected during normal business hours on weekdays (Saturdays and public bolidays excepted) at the offices of Mourant du Few & Jeune, 16 Hill Street, St. Helier, Jersey, and Bischoff & Co., Cuty Wall House, 79/83 Chiswell Street, London ECIY 477, until 2nd August, 1983.

APPLICATION PROCEDURE

1. The Subscription Lists will open at 10.00 a.m. on 3rd August, 1983 and will close as soon thereafter

Applications must be for a minimum of 2,000 Participating Shares.

Applications must be made on the Application Form below and must be accompanied by a remittance

in sterling for the appropriate amount. Payment may be made by personal cheque or banker's draft.

Where applications are for 10,000 or more Participating Shares payment may be made by telegraphic transfer to:
Trustee Savings Bank of the Channel Islands

Trustee Savings Bank of the Channel Islands
23 New Street, St. Helier, Jersey, Channel Islands
Account: TSB Gilt Fund Managers (Channel Islands) Limited 00654063.
The Fund reserves the right to reject applications in whole or in part.
Applications will not be acknowledged but certificates for Participating Shares will be posted to the successful applicants, at their registered addresses, and at their own risk, not later than 31st August, 1983.
Pending the issue of share certificates, transfers will be certified against the register by the Managers.

England still lack confidence in their batting By John Woodcock, Cricket Correspondent New Zealand, with eight echer of the 147 by Hutton and econd innings wickers in hand, simpson at the Oval in 1949, innings, Willis was soon among the wickers when they barred in England failed to win the first best against New Zealand's firs

second innings wickets in hand. need 330 runs to beat England. If England failed to win the first Cornhill Test Match they will regret having batted as pawkily as they did in their second as they did in their second always composed; occasionally, on Saturday morning, because innings. New Zealand, to win it, need to defy the facts of cricket

Fowler had trouble with Willis took his fourth wicket in history. Their target is 460, 54 runs more than have ever been

England's second innings of 446 for six declared was accumulated at only 2.35 runs an over - aross a fast outfield. in glorious weather, on a pitch which helped the bowlers only insofar as it was taking spin, and despite the fact that for the first time since 1974 three batsmen made hundreds in the same Test innings.

A record opening partnership was a perfect platform from which to attack the New Zealand bowlers. That, though is not the way England play whether their opponents are India in Kanpur, Australia in Perth, or New Zealand at the Oval. Amiss, Denness and Greig were the last three Englishmen to reach three much confidence in their said the work in the way England batted.

Syl that that is what matters, dived quite the distance which Taylor does when standing back. Keith Fletcher told me once that so good was Taylor's timing that the ball made no sound going into his gloves. First time round, the brothers batting figures in the same innings.

In 1931 the three who did it against New Zealand, were Sutcliffe, Hammond and Duleepsinhji - at goodness knows what rate per over. Today, weather permitting, New Zealand have 96 overs left runs. They, too, have made a start, thanks to Wright and Howarth, who have so far added 104 for the third wicket.

The internal counter 350 and Hadlee picked up two good wickets, Randall's with a perfect bouncer.

It was no fun watching Lamb both Wright and Howarth; uncomfortable moments, with a perfect bouncer.

It was no fun watching Lamb

The size of vesterday's crowd, making 48 in three hours and 40 which was the smallest of the minutes on Saturday. Yesterday four days - it was estimated at morning he just about kept pace between 4.000 and 5.000 - with Edmonds. After lunch, almost certainly had something with the declaration imminent, to do with England's batting on he hurried to his second Saturday which, once the hundred for England. Whatever opening stand of 223 between the tactical situation, Lamb is at Tavare and Fowler was broken. had won them few friends.

clear of the 147 by Hutton and Simpson at the Oval in 1949, which until now was England's the wickets when they batted best against New Zealand again. Regarding Wilis's tally of Tavaré's hundred, his second Test wickets I am sorry to say for England, was chanceless and the scriptures are wrong. I wrote

loaf of bread or a basket of escaped the net. Oh my flowers. I ask you! However, Southerton and my Preston, Fowler scored his first Test long ago! hundred, a great moment in a cricketer's career.

they could make 400 or more time, might have been more they would win. They did and I accomplished against spin, I expect they will, and they will doubt whether he could have say that that is what matters. dived quite the distance which batting.

New Zealand, too, are prac-

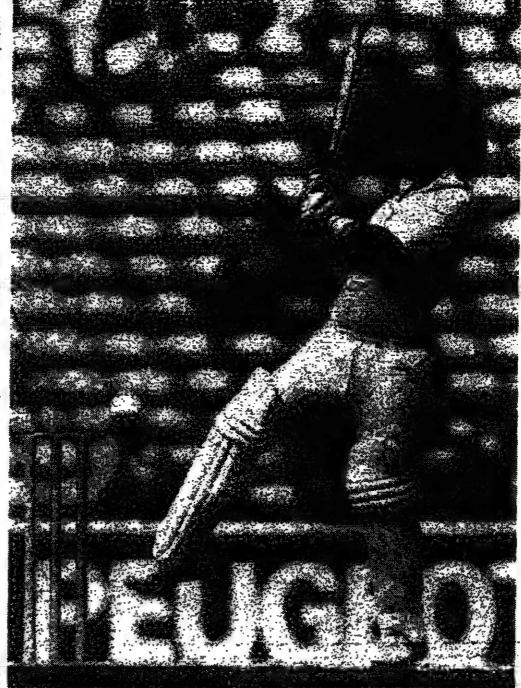

making 48 in three hours and 40 this best when putting but to buil. What for New Zealand had This was the seventh largest been a holding operation had first wicket partnership ever been astutely conducted by made for England, and well Howarth.

Bracewell, bowling what to him New Zealand's first innings, he were leg breaks. It really did drew level with Underwood scored in the fourth innings of a look rather ridiculous, too. 289 wickets each. In fact, Test match by a side winning it, when he was run out, carrying Underwood has 297, the eight his helmet under his arm, like a he took in Sri Lanka somehow

> Anyway, in his third over yesterday, Willis had Edgar Between lunchtime on Satur- caught at the wicket by Taylor, day and the close of play celebrating his 42nd birthday. England's performance, if prag-matic in their view, had little to played the last of his 28 Test encourage spectators to come matches for England. Both were again yesterday. They had no born to keep wicket. If Strud-doubt decided by then that if wick, because of the habit of his

Crowe - failed to score. Yesterday, Jeff, coming in when New Zealand, too, are practised at finding a lifleine. By giving England's batsmen very little in the way of loose balls they forced a couple of run-outs. That was good New Zealand cricket. Bracewell and Coney were both admirably accurate both Wright and Howarth some

Wright needed all his experience and expertise to cope with the ball pitching in the foot-marks outside his off-stump. He had marks using them to turn the ball away from him and Edmonds aiming at them from over the wicket and spinning the ball into the bat. There were always two or three fielders close up for the catch. Wright did well to avoid them. And when Willis returned for a last fling Wright picked up runs with drives and deflections. Today is one to look forward to.

Lamb strikes a statuesque pose after pulling a ball to the boundary. Photograph by Chris Cole.

Gooch hits 176 for record

Graham Gooch set a John Player League record at Southend yester-day, hitting the Glamorgan attack for 176. The Essex opener received only 117 balls but hit 28 fours and a six as he bettered by four runs the previous highest individual league innings set by Northamptonshires

Wayne Larkins earlier this season.
Gooch's fine stroke-play sent
Essex to 310 for five - another
competition best - and a predictable 56-run victory. Pringle, with an undefeated 52, was Essex's next highest scorer as the Glamorgan howlers wilted in the heat The Welsh county never seriously

threatened their opponents' total despite reaching 254 for four, their hest of the season. This was largely because of an undefeated 73 from Ontong and a fine 68 by Miandad.

Zaheer Abbas returned after rib unbeaten 64 and guide Gloucester-shire to a six-wicket victory over

as man-of-the-match and Shepherd received a case of champagne with three for 24 and 11 not out. four in 34.3 overs. OLD TRAFFORD: Clive Lloyd, the

Lancashire captain, scored 52 out of his side's 142 for eight, but then visitors Worcestshire forced a dramauc ue thanks to an unbesten 51 by Damian D'Oliveira, aged 22 son of the former England allrounder Basil.

D'Oliveira, who batted for 37 nimutes, hit two sixes and five fours, but with two runs needed off the last ball of a match reduced to 19 overs a side because of rain, tailender John Inchmore could only manage a leg bye and Worcestshire nded level on 142 for five.
Laucashire looked to have the

game well within their grasp until skipper Phil Neale (39) and D'Oliveira added 50 off 30 balls, mainly off Les McFarlane whose six overs cost him 60 runs.

Warwickshire with nearly aix overs to spare. He hit a six and five fours, but failed to collect any of the prize tenagers. Thorne (42) and Paul following vesterday's small Smith (35), added 61 in 12 overs to Smith (35), added 61 in 12 overs to Smith (35), added 61 in 12 overs to spokesman Peter Lush said: After a good start by Stovold and Romaines, who put on 73 in 14 "We require receipts of £25,000 overs, the home side cruised to 10 £30,000 above what we victory. Romaines made 57 before would normally get on a fourth being caught at the wicket day to make it worthwhile."

The poor gets the blame

David Storr. cricket and bowls hairman of the Farsley Cricket. John Player League without limiting owners. John Player League without limiting bowlers. John Player League without limiting bowlers. The overall standard of ricket is not as good as when I tarted 20 years ago. And that's true of cricket I played, when each side had two hours and a half batting. chairman of the Farsley Cricket. Bowling and Hockey Club has no doubt: "The overall standard of cricket is not as good as when I started 20 years ago. And that's true in the league too - there are now only half a dozen or wight clubs who only half a dozen or eight clubs who are good sides. The standard has one down tremendously."
We were siming beside the small,

sloping ground on the fringe of Pudsey, among the other hundred or more spectators who had paid their 30 pences to watch Graham Boothroyd, a farmer from Pontef-ract and Yorkshire Bank captain, on guide his side to victory in a Bradford League match with an

Farsley's most famous son, Raymond Illingworth, goes further, blaming the decline in county cricket on the state of the leagues. "They are just not playing the right type of cricket to produce young-

IN BRIEF

England juniors wir European Cup place

England's under-2! hockey team beat Portugal S-0 yesterday to win their qualifying tournament for next year's junior European Cup without conceding a goal, a Special Currespondent writes. On Saturday they beat Sweden 3-0 with goals from Maskery Grimley rom Maskery, Grimley and canings. Against Portugal midday heat and

a bumpy pitch spoiled the game as a spectacle, and stopping the ball was a lottery. However, with Knott and Halliday missing little in defence and Maskery running strongly on the left wing victory never seemed in doubt after a first minute penalty goal from Grimley.

By half-time goals from Jennings

Middlesex make up for lack of London action LORD'S: Middlesex beat Leicester-

Mercifully, on an afternoon hot enough for the umpires to be Emburey had Butcher stumped and allowed to dispense with coats, there was a good deal more action than on Davison to chop the ball into his the other side of the Thames. Middlesex eventually got the better of the argument despite a characteristically adventurous innings by Davison. So close was the pitch to the Tavem boundary that some of Butcher's balooning swings seemed

destined for the Oval.

Middlesex's innings revolved around two partnerships. After Slack and Radley had gone for 65, made at just over three an over. Uatting and Butcher set about Cook, recklessly peppering the St John's Wood Road, Butcher was John's Wood Road. Butcher was well-caught on the square-leg houndary for 37, one of several fine vatches, and Gatting followed. At 149 for five, with ten overs lett. Emburey joined Downton. Between them they added 22, both driving commendably straight and taking no advantage of the short pull to square fee. The front of pull to square leg. The front of Emburey's shirt billowed in the breeze, so at times he gave the impression of an old Indian Army

colonel trying to clear the mango with Davison, who had been continuously dive-bombed on the

boundary by obstreperous seagulls, giving Emburey a taste of his own

Watson's five-pointed star in the ascendant over a faltering Faldo

By John Hennessy, Golf Corresponde

Tom Watson, with character- arrived eventually somewhere istic courage, won his fifth Open Championship at Royal Birkdale yesterday. He had a final round of 70, one under par, for a score of 275, one stroke ahead of two fellow Americans, Hale Irwin (67 yesterday) and Andy Bean (also 67), and two strokes ahead of Graham Marsh, of Australia, who achieved the well off line. lowest score of the day, 64.

Watson has emulated Peter Thomson's five Open titles (two of them, incidentally, at Birkdale), a record surpassed only in the dark ages of the game. At .33 he clearly has an opportunity to stand alone on a pinnacle of his own creating. He has, too, shown his true qualities for the first time on a British links, since his four previous wins were achieved north of the Border.

Irwin must be haunted by his extraordinary lapse of the day before when he had incurred, quite unnecessarily, an extra stroke by making an ineffective pass at his ball hovering on the edge of the hole. In that way a near-birdie two became a four-"That air shot", he said afterwards, "now looms very

Nick Faldo, the only British hope, enlivened the early play with three successive birdies from the second hole, after dropping a shot at the first, but he was looking rather too much ito single putts to save him on to other holes. It all seemed a little frenetic and it told in the end as he declined from a score of eight under par at one point for in the lead by himself - but the strokes slipped away coming home and be finished with a 73

Faldo thus shared joint eight position with two other home players in Christy O'Connor, jur (68) and Dennis Durnian (67) and with Bill Rodgers, the winner in 1981. Severiano Ballesteros, spared the pain and the parecure up at the share end the pressure up at the sharp end (not that that would necessarily have marred his game, rather

near the green, he hardly moved the ball with his first chip, then hit it dead with his second. It was the start of an astonishing run of five successive singleputt greens, three successively for birdies and the fourth a brave eight-footer after a wretched tee-shot, short and

By now the spectators had reached a state of hysteria and rampaged all over Birkdale like a herd of elephants, quite out of the control of feeble marshalling Faldo was out of luck at the sixth, reduced to a more comfortable par four of 428 yards because of vandalism on Friday night in pursuit of some legal claim. His tee-shot dribbled just into heavy rough, encouraged by a stiffening right-to-left wind, and he could only

By now a four-way log-jam had developed at the top, Faldo and Floyd having advanced from six under to seven under, Watson having dropped one shot from eight under par overnight and, well up ahead, Marsh having stormed home in 64 to finish on 277.

Faldo continued to scramble well, getting down with a chip and putt on the seventh, ninth and eleventh. In between he had the chance of a birdie three from 10 feet at the 10th but it escaped, Suddenly, Watson and Floyd dropped back with five at

Then, as if somebody had tapped a kaleidoscope, the picture changed. Bean, an amiable giant from Florida, stole two quick birdies to go to seven under, accompanied by Hale Irwin. Harold Henning, a 48-year-old South African who had given up the game some years ago from boredom, moved up from three under to

The long 13th suggested signs of strain on Faldo, for he putted out well short from 15 yards or so and missed the second from four feet. His playing partner, Trevino, meanwhile holed from the reverse), came home with a the edge and a little war-dance 68 and stole a stroke in front of heralded his improvement to six under par. Three putts on the 14th (unluckly, since the We had unhappy visions on the 14th (unluckily, since the Thursday when Faldo hacked first hit the hole and rolled six his way down the first fairway, feet at right angles) finally or rather down the rough destroyed Faldo's realistic lanking it on the left. Having hopes. He had now to give five 69 in 1976.

players a two-stroke start over the closing holes, among them the formidable figure of Watson, holing from five feet after a splendid tex-shot to the 184-

The championship virtually died as a competition at 4.45 when Watson holed a short putt for a four on the thirteenth after a fortuitous lie from a wayward tee-shot. That took him to eight under par, with several birdie

Bean and Irwin joined him on the same mark but they were left with only the 18th to play. nominally a par four, but playing more like a par four and a half from its new tee hard by the Hillside course boundary. Sure enough, Bean cut his tee-shot into the rough and

Irwin was happy enough to make his four. The title was now there for Watson's taking-He needed a birdie to draw away from Irwin and Bean, of course, and that long 17th downwind beckoned. But the 16th intervened and from a tecshot into the rough there he smole a superb recovery shot to 15 feet and, beign Watson. almost ceretainly the best putter in the world under pressure. rolled the ball home.

It was just as well, for his drive into the intrusive sandhill on the left of the 17th left him no alternative but to hack back to the fairway. He made the green, of course, but not close enough for his expected four.

He was not yet out of the wood, or rather the willow scrub, for the redesigned eighth is as challenging a final hole as you are likely to find anywhere. But he played it perfectly. His tee-shot found the centre of the fairway at the dogleg and his second the heart of the green. He missed his put for the birdie but it was no longer of any

Dennis Durnian, the surprise packet from Manchester via Bolton and Australia on Friday. again showed his mettle at the side of Marsh and a final round of 67 placed him on 280, for under par at the end, a result beyond all the ambitions of any nart-time tournament player. He was joined by Christy O'Connor, jinr. (68 yesterday). who once led the championship

Marsh takes advice from Japan to challenge lead

Shortly after he had posted and sixth, holes where his his 64, Graham Marsh spoke of the new "Japanese takeaway" which had marked the end of one of the longest lean spells he had known in vears.

At the start of the season, Marsh had found himself hitting his woods better through adopting a flatter swing. His shorter irons and little chip; though, were far from good, and in desperation, he sought advice from a couple of Japanese friends, one a tele-

vision commentator.

The two helped Marsh to pick up the typically Japanese method of taking the club up on the outside and coming right across the ball. "We fiddled around a lot before I got the hang of it", explained Marsh. "However I've now been doing. "However, I've now been doing it for about a month and it's given me a whole new confi-

Marsh, who won the Yomiuri Open in Japan after making the change, cited the awkward bunker shot he played yesterday at the 17th as one which the Marsh of six weeks ago would not have been able to handle.

Marsh's wife, Julie, who is happily incorporating the Japa-nese action in her own 15-handicap game, described the birdie her husband ultimately made at the penultimate hole as the most exciting moment of all in that it had lifted him into a

The Australian started his rise up the leader board with consecutive birdies at the fifth

within the space of the next five holes, with his longest putt the 30 footer which dropped for his four at the 305-yd 13th. But, still more remarkable than the putts he holed were those that got away, with no less than six hitting the hole without dropping. Before he left the course to watch the rest of the Open on television at his temporary home in Southport, Marsh made the point that his chances of winning were slight: "Players like Faldo, Watson and Stadler are all world class, and it is hard to believe that one of them will not do something However, that won't stop me from hoping.

Simon fights back into bunch

From John Wilcockson, Saint Etienne

The saga of Pascal Simon and the Tour de France yellow jersey was extended by another two chapters were the weekend, but the epilogue is almost certain to be written today On two gentle climbs in the Forez

Hills yesterday, Simon was left struggling with the also-rans until his Prugeot team came to his aid for the umpleenth time in the six days since he crashed and fractured his "left shoulder blade.
On the Lavet Hill, halfway

through the 143km 16th stage from Issore. Simon was 50 seconds behind the main bunch. This margin made another Frenchman, the bespectacled Laurent Fignon, the temporary race leader.

2. Fignon won the day's first rush sprint bonus to close within 40 sees of Simon on overall time, after finishing almost 4 mins ahead of the vellow jersey in Saturday's time trial at Clermont-Ferrand.

The strapped-up Simon, riding a specially-lightened carbon sicycle, was 55th in the individual climb up the Puy de Dome mountain. Yesterday, he gamely regained his place in the main bunch which finished 64, mins

behind two breakways. Michel Laurent and Henk Lubberding.

These two tall cyclists, both tired from racing most of the hilly stage out in front, became locked in a tactical spring for the line on the slightly-rising Cors Fauriel. Lubberding, the long-haired Dutchman who were Aurise Stage lets work wars. who won Auriac stage last week, was leading coming into the final 100 metres, always squeezing his French

rival towards the metal barriers.

Laurent, perhaps, over-reacted to what is called a 'hook' in cycling parlance, and he cataputted off the base of a barrier, fell heavily on his base of a carrier, fett nearvity on his left elbow, and ended his stage with a bloodied jersey and an unrideable mount. It was found he had broken a bone in his left hand. Lubberding finished to a chorus

of jeers from the not unpatriotic wd, and after a hurried meeting by the race jury he was relegated to second place. He was not too upset by his declassification as the time he gained has placed this former Dutch champion up to 7th place overall, less than 5 mins behind Simon.

FOR THE RECORD

The stage through the deep forests of the upper Loire had started as if we were in for an exciting afternoon.

Problems for British selectors

By Jim Railton

places and last year he was sixth and last in the final of the world championships in single sculls. Is this the end of the road for one of Other absentees over the weekend

were the women's double scullers Ayling and Mayglothing (nee Clugston) who were also curtly dismissed in Lucerne last weekend. The key race of the weekend was the The key race of the weekend was the men's heavyweight coxiess pairs. The impressive Henley winners Field and Hill of Tyrian just held of Whitwell and Knight of Nottingham by 43 hundredths of a second with the Lea pair, fifth in Lucerne last weekend, just over two lengths adrift. The selectors will rejoice here with the least two talented pairs.

needed it is too.

After that it should have been academic but it was not to be the

veteran Crooks but the squad coxless four were far from convinc-ing in their win over London University.

The men's heavyweight eights

final was a poser in every sense of the word and a holding eight is bound to be selected for this year's championships. The ARA square eight – the two fours who combines togehter finished fifth in the eights race in Lucerne last weekend - were beaten by just over a length by a hastily put together composite from Kingston. London University, and Oxford University including the Australian world finalist Graham Jones on Board

That result will make the selector perhaps scratch their heads even more but at the same time they will be happy to keep intact the squad Lucerne last weekend, and now

January 1, 1985, it was announced here yesterday.

The Swedish car firm have been financing the grand prix circuit since 1979 when, with the men's professional counts council (MPTC), they signed a three-year contract worth 51.9m.

Recently Valve offered to renew this with a five-year contract worth around \$25m but the MPTC said this was not enough, and had received better offers:

Sweden's representative in the MPTC, Lars Myhrman, said it was not so much the dispute over cash have the opportunity to blood new talent in an eight for the world championships in Dulburg. not so much the dispute over cash which had brought the split to a head as Volvo's dissatisfaction with

Porter and Hancock get away to a flying start

lan Porter and Tim Hancock, split in two. The leaders, however, fresh from their success in winning the Wayfarer national champion-ships last week, maintained their winning streak in the first race of the world championship at Hayling Island yesterday. They also won the class twenty-fifth anniversary race last Friday, so if they can maintain that form, the fifth world championship would appear to be well within

cir compass. Yesterday's race, sailed over an Olympic-type course, was held in a north-westerly breeze fresh enough to cause some gear failure and a few capsizes. Porter and Hancock led throughout after a magnificent start at the crowded port end of the line. They were first round the windward mark, followed by Andrew Wilson, Trevor Rose and Geoff Hodshon, who were according to the progress. who was second in the previous world championship, held in the United States in 1982.

An unfortunately-timed squall caused some problems for their immediate pursuers and for a moment, to quote a competitor, "All hell was let loose." In the mêlée Chough's (Robin Barker) boom snapped and Heinz (Michael Webber-Walton) had her foresail

Trojan Fen is a credit to Troy

By Michael Phillips, Racing Correspondent

with more than 100 two-year-olds in his care at the start of the season the odds were on Henry Cesil having a good success rate from that age group, always assuming that his stable was not unition by a cough or some other disease which afflicts most yards these days. And so it has prov

Following Trojan Fen's impressive victory in the Donnington Castle Stakes at Newbury on Saturday Cecil is now firmly back in the driving seat, making plans that may well cause others to shy away. The cynics will say that he has been in this position before, and what has become of Diesis, Dunbeath and The Fort, who were sweeping all before them last season? But that is

another story.

For the time being, at least, it is new names: Vacarme, Precocious, Trojan Fen and Millbow who could easily be added to that list if this full brother to Kris and Diesis does what is expected of him in the

Vacarme (Ricmond Stakes) and indoubtedly the daddies of them all as far as sheer speed is concerned, yet there was not mistking the air of authority which Trojan Fen dis-played when winning on Saturday. He will be a worthy favourite for the Stavros Niarchos's other good colt Millbowm free to travel North to Newcastle early in August for the Seaton Delaval Stakes.
Trojan Fen's history is yet another illustration of the ups and

downs of racing Roderick More O'Ferrall, the owner of the famous Kildangan stud, in Ireland, decided to mate his mare Fenella with Troy and eventually a colt, subsequently called Trojan Fen, was born. But not before Mr O'Ferrall had decided to cull Fenella from a good family of which he has plenty and on which Kildangan has thrived over the

wmarket where she was sold for Newmarket where she was sold for 118,000 guineas, carrying, as it turned out, Saturday's hero. The purchaser was John van Geest for his Waresley Park Stud. Some 22 months later Mr van Geest sent the produce up to Newmarket again where he was bought by the BBA acting on behalf of Mr Niarchos for 115,000 guineas, but not before Lord Weinstock and Lord Porchester had decided not to buy him on ter had decided not to buy him on veterinary advice!

No wonder their Lordships were

to be seen taking a keen interest in Trojan Fen on Saturday, an interest made all the more sad by Troy's death at such an early age midway through May this year. Still Lord Weinstock can consol himself that he and his father-in-law, Sir Michael Sobell, do have 10

of Troy's stock and more in utero.

Trojan Fen is the only horse by Troy to have run so far and what a fine advertisement for his late sire

Cram poised to book his Cain keeps 1500m place for Helsinki

Steve Cram knows that he has to run about 3min 34sec in Nice tonight to be considered for a 1,500 metres place in the British team for the world championships in Helnski in three weeks time.

That task will be easier if he hears, as now seems likely, that the selectors have ignored the claims of Schastian Coe and Steve Ovett to

The main body of selections is to be announced in London this morning, and it is likely that Overt and Graham Williamson will be chosen for the 1,500m, with Cram needing only to confirm his return to form to win the last place. Coe has already been selected for 800m, but the two who will accompany him to Helsinki at that distance are less clear, and that selection may be left until after the

AA championships next weekend. Cram left for Nice feeling that he would probably have to race Williamson next Sunday for the last place in the 1,500 metres behind Coe and Overt. But Coe's second icfeat at the distance last Friday has eft him with only an invitation mile at the AAA championships, and it would be invidious to select him without him having faced either Cram, Williamson or Ovett. Todd Bennett and Pail Brown

Todd Bennett and Phil Brown will have done enough last Friday to be selected at 400 metres, and the coullient running of Wendy Sly in beating the Commonwealth 1,500, metres champion. Chris Boxer, means that Mrs Sly will undoubtedly be selected for both the 1,500 metres and 3,000 metres in Helsinki.

The men's sprints will have caused the selectors almost as many problems as the middle distance races, especially with Alan Wells will have done enough last Friday to be selected at 400 metres, and the ebullient running of Wendy Sly in beating the Commonwealth 1,500, metres champion, Chris Boxer, means that Mrs Sly will undoubtedly be selected for both the 1,500 metres and 3,000 metres in Helsinki.

Bill Cain, of Saltwell Harriers, became the least established athlete achieved a surprise victory at Belgrave on Saturday. Cain, aged, 26, has only twice run internationally and was using the race 4 Belgrave properties of the same o primarily as a training exercise for a

He allowed Jimmy Ashworth of Yorkshire to open a gap to two minutes at halfway, but his even paced running in temperatures of 90°F enabled him to take the lead at 18 miles and win by two and a hall

Cain is the first North Eastern Counties representative to win the title since Jim Alder 20 years ago.

and Cameron Sharp showing so little of their excellent form of last "This is the first big race I have won", Cain said, "Only when I look year. But Buster Watson has been impressive enough to be nominated for at least the 200 metres and at all the names on the cup over the years - Bill Adcocks, Don Faircloth, Andy Holden, Dave Clarke - does it Kathy Cook and Joan Baptiste in Keith Connot, already selected for the world championships, competes in Nice tonight against Helsinki rival Ken Lorraway, of

Cain took two showers and drank four pints of liquid to hydrate his body before subjecting it to the heat. His caution proved effective on a day when more than one third of the 180 starters failed to finish. They included two of Cain's team colleagues, thus denying North Eastern Counties the team championship and leaving Surrey to beat Yorkshire on the strength of a better placed third scorer.

RESULTS: Inter-Counties championable: 1. W Cain (NE Counties) thr 48min (2sec: 2. J Astructrik (voricatire), 150.07; 8. J. Offord (Leicestershire), 153.05. Team: 1. Surrey (M Page, D. Wright, R. Lions expecting another mauling on return today

From Don Cameron, Auckland

New Zealand ... British Isles.....

The Bristish Lions were cut to pieces by the All Blacks in the forth international at Eden Park on Saturday and Jim Telfer, the Lions coach, expects the same treatment when he alights at Heathrow Airport

As they poked through the ashes of the heaviest defeat the British Isles have suffered at the hands of the All Blacks or anyone else, Willie John McBride, the Lions manager, remarked that this was the finest All Black display he had Black display he had seen. Telfer, ever the pragmatist, claimed that the 4-0 defeat in the series showed the gap between New Zealand and British rugby and emphasized the need for the four home countries to rethink their concepts of the game.

If such happens then the boffins of British rugby could well study and restudy films of this match for it represented a level of All Black skill and teamwork and exuberant joy and teamwork and exuberant joy which New Zealand, or any other country for that matter, seldom

ago, even if the Welsh that day were a rather better integrated side than

salvage something from the tour, even if I suspect that Telfer was hoping against hope, realizing that all the hard work at training might not bridge the gap between the teamwork and ability of the opposition and the earnest endeav-

Within 15 minutes the Lions were shaken, perhaps shattered, even if they had only offered up two penalty goals to Hewson, in that first quarter hour the All Blacks had all the ball, all the command, all the skill as they probed this way and pounded that way, their backs and forwards knitting together impres-

Loveridge, the Toscanini of balf-backs, had the ball safely delivered to him 13 times. Laidlaw, in contrast, had three pieces of and about as comfortble as being offered a hand grenade

with the pin out.
Inevitably, the Lions had to crack, first by losing control of a screwed scrum on their own line, which had the ball squirting out for marvellous combined thrust by the All Blacks which had the extra man. Fraser, drawing in Baird and allowing Wilson to break away to the corner and into the record books.

tries in an international. By this time, 30 minutes into the game, the All Blacks led 16-3 and such was their command back and forward that the match was already won. It only remained to find out by how much. So the Lions, for all their braveness in the tackle, had 50 more minutes of excruciating agony to endure, and four more times to

show his wonderous talents, floated a perfect chip shead of Wilson and that, was that. Hewson pushed a little kick shead and as Campbell (2 sad figure hobbling on his hamstring injury) and Evans debated who

Ollie Campbell (above) was predictably the top points score on the Lions tour. The Irishman's three points on Saturday penalties, 18 conversions, six dropped goals and a try from 11 of the 18 matches. The record for a touring Lion is 188, set by Barry John in 17 appearances in New Zealand and Australia It was, in the finest sense, total in New Zealand and Australia rugby, surpassing the All Blacks's in 1971. The runner-up to 23-3 defeat of Wales in the Campbell was Dusty Hare, of 23-3 defeat of Wales in the Campbell was Dusty Hare, of centenary international three years England, who gained 78 points in six matches. The leading try were the Lions on Saturday.

The Lions went into the match with spirit and a determination to Baird, of Scotland, and Irwin, of Ireland, with six.

> would retrieve it. Hewson glided between them and raced away to the

A thunderous All Black forward charge to the line had Haden wrenching the hall clear and spearing between the posts. As the final indignity, not softened by Evans's late penalty goal, the Lions tried to run from their 22, the ball was lost behind Ackerman (replacing a concussed Baird), and Wilson had only to tap the ball over the line for the try. Besides scoring a try, Hewson provided four conversions and two penalty goals for 18 points.

So 54,000 New Zealanders drifted off in various states of ecstacy. Dalton, the All Black captain, an hour later was still starry-eyed with the wonder of it all and the Lions went away to the harsh history of

the record books.

It might be no comfort for them
to be told that their opponents were
light years distant from the side who had struggled through the errors of the first international, the gale of the second and the icy swamp of the

It would have taken better teams than the 1983 Lions to claw their way back into the game after the shattering impact of that early All Black opening. This was Rolls-

Royce rugby.

Seven All Blacks were spirited on to a plane yesterday bound for centenary matches in South Africa. strators staged a peaceful protest at Auckland airport. The players, including the Maori, Pokere, and

EQUESTRIANISM

White City echoes to names of past years

By Jenny MacArthur

Britain's leading show jumpers will be riding on a wave of nostalgia at this week's Royal International Horse Show which has returned outside to its old post-war home at the White City after a 15-year absence. The show begins tonight

and continues until Saturday.

The Royal International first moved to the White City from its original home at Olympia in 1947.

Now, nearly 20 years later. having been re-started after the war through the efforts of Colonel Sir Michael Ansell. Leading riders from home and abroad competed at the White City over the next 20 years (the show moved to Wembley in 1968) and the reputation of the Royal International grew accord-

at the White City in those halvoon years will be present this week although not all in a riding capacity. Mr Pat Koechlin-Smythe, the most famous woman show jumper the sport has known, returns in her role as president of the British Show

officially open the show. Colonel Raimondo d'Inzeo and Graziano Mancinelli the Italians who iumped regularly at the White City in the early 1960s are two of the nine foreign riders who have

Player Special Grand Prix takes v Salen Rederierna AB place on Thursday evening.

Before Sir John Donaldson Among the British riders compet-ing will be Harvey Smith, who has won the grand prix seven times. It was at this show, in the 1950s, that Smith first came to the fore on a horse called Farmer's boy, which he bought at York sales in 1954 for

Smith's rival competitors in the international classes will include his two sons, Robert and Steven. It is the first time in the show's history that a father and two sons have

competed against each other.

Robert Smith will be out to repeat his 1979 victory in Wednesday night's King George V Gold Cup, one of the most sought after prizes

one of the most sought after prizes in international show jumping. His rivals will include last year's winner, Michael Whitaker on Disnev Way, and David Broome who is seeking his sixth King George Cup.

Liz Edgar is the favourite for the women's equivalent of the King George – the Queen Elizabeth Cup on Wednesday afternoon. Mrs Edgar, who has already won the competition a record four times, will ride Everest Forever. Mrs will ride Everest Forever. Mrs Koechlin-Smythe will no doubt have some fond memories as she accepted invitations to compete. watches from the stand, She won the D'Inzeo won the John Player Queen Elizabeth Cup in 1958 on Mr Trophy in 1963. This year's John Pollard.

Assessing deceased's living expenses Harris v Empress Motors Ltd Cole v Crown Poultry Packers value the earning capacity of the

[Judgment delivered July 14]

In assessing damages recoverable by the estate of a deceased for his future loss of carnings under the Law Reform (Miscellaneous Provisions) Act 1934 the approach to the calculation of the deceased's living expenses should not be the same as when assessing those expenses for the purposes of calculating a dependency under the Fatal Accidents Act 1976 and the deduction which had to be made from the net loss of earnings for the "lost years" would normally be greater than the deduction under the

The Court of Appeal so held in allowing appeals by Empress Motors Ltd against an award of damages to Mrs Susan Harris by Mr Justice McCowan on January 21, 1982 ([1983]1WLR 65) and by Crown Poultry Packers Ltd against an award of damages to Mr John Cole and Mr Albert Cole by Mr Justice Forbes on February 2, 1983. The cases would go back for

Mr Charles Whitby, QC and Mr Jonathan Acton-Bond for Mrs Harris, Mr Michael Ogden, QC and Mr John Stevenson for Crown Poultry Packers, Mr Christopher

LORD JUSTICE O'CONNOR said that the two cases raised

injured person whose expectation of life had been shortened. In both cases the injured man had died as 2 Before Lord Justice Stephenson,

Justice Goff

Cases the injuries received in accidents caused by the defendants' negligence.

had to be made from the net loss of earnings for the lost years be calculated? One solution, at least in claim by the dependent widow, was to make the same deduction as was made when assessing the Fatal Accidents Acts dependency. That had been done by the judges in the

A second solution at first instance

had been the savings only approach in Sullivan v West Yorkshire Transport Executive (unreported, December 17, 1980) where living expenses was given a vide meaning, namely, all expenditure except savings, but savings were to include expenditure generatwere to include expenditure generating wealth such as mortgage The third, 'available surplus' solution in White v London Transport Executive ([1982] 1QB

489) where the available surplus was deemed to be what remained after deducting from the net earnings the cost of maintaining the deceased in his station of life, would be returned In the two House of Lords judgments of Pickets v British Rail Engineering Ltd ([1980] AC 136) and Gammell v Wilson ([1982] AC 27) three principles had emerged.

First, that the ingredients that went to make up 'living expenses were the same whether the victim

Second, that the sum to be deducted as living expenses was the proportion of the victim's net earnings that he spent to maintain himself at the standard of life

Law Report July 18 1983 Court of Appeal

appropriate to his case.

Third, that any sums expended to naintain or benefit others did not form part of the victim's living expenses and were not to be deducted from the net earnings.

The hidden difficulty in the second and third principles could be illustrated by the example of a bachelor living in a flat, where the rent, rates and heating were undoubtedly part of his living if he married a wife without

income who came to live in the flat.

it would be impossible to say that the expenditure had suddenly ceased to be part of the husband's living expenses, yet the Fatal Accidents Act solution would lead to that result. In contrast, the attractive assertion that the full cost of the flat remained part of the husband's living expenses was not compatible with the third principle. Any proportion of a man's net earnings that he saved or spent exclusively for the maintenance of others did not form part of his living. expenses. Any proportion that he spent exclusively on himself did. In cases where there was a proportion of the carnings expended on shared living expenses, which in practice would be found to be limited to the

cost of housing, a pro rata part of that proportion should be allocated for deduction.

His Lordship realised that in so rejecting the straight Fatal Accidents Act solution he was differing from a considerable body of judicial opinion in the Queen's Bench

others should be reckoned as part of a man's living expenses in the required by the House of Lords. That left the surplus fur

solution propounded in the White case. Save that the deceased should not be treated as an eternally single man and bearing in mind his Lordship's findings on joint expenditure, it was an acceptable way of arriving at the deduction to be made n cases of young persons.

The reason for supporting that high rate of deduction in cases such as White was that the future was made for the fact that a man might never marry, never save, n never support anybody; but in the present case there was much less speculation and that which was not to be deducted could be seen with

The court had been asked to give guidance as to what proportion of the net earnings in the lost years should be deducted for the purposes of the Law Reform Act claim. It was impossible to do that because so much depended upon the amount of the joint expenditure and the number of persons among whom it was to be divided, but in general, was to be divided, but in general, according to the circumstances, the proportion would be greater than the percentage used for calculating the dependency under the Fatal Accidents Act.

Lord Justice Stephenson and Lord Justice Goff agreed.

Repayments of advance corporation tax

Petrolema Ltd Before Mr Justice Peter Gibson [Judgment delivered July [1]

Entitlement to repayments of advance corporation tax (ACT) arising under section 17 of the Oil Taxation Act 1975 and section 127 of the Finance Act 1981 in respect of petroleum revenue tax (PRT) and supplementary petroleum duty (SPD) paid by oil companies participating in winning oil from the were satisfied. Repayment was not to be deferred until an assessment to corporation tax for the relevant accounting period had been made

on any such company.

Mr Justice Peter Gibson so held in a reserved judgment in the Chancery Division dismissing an appeal by the Crown from a determination of the special commissioners requiring the immediate repayment of ACT of £17.6m to the taxpayer company, ICI Petroleum

The taxpayer company carried on the trade of North Sea oil extraction. For the chargeable periods ended December 31, 1981 it paid SPD of £58.7m. Under the provisions of section 127(1) of the Finance Act 1981, that amount was to be deducted in computing its profits for corporation tax purposes for its

accounting period ending December In March 1982 it submitted its 1981 accounts showing a profit for tax purposes after payment of SPD minutes of excruciating agony to endure, and four more times to the Figian-born Frascr, secretly stand behind their line as the mercless Hewson kicked for conversion

Fokere, at last given space to Headen, it whether, it is a standard with the figure of the aircraft.

1981 accounts showing a profit for tax purposes after payment of \$PD of £165.5m. On the same date it submitted a claim to the Oil Taxation Office under section 127(5) for that period for repayment. of ACT, treated under sections 85 arisen, It contended that it had. and 92 of the Finance Act 1972 as having been paid in respect of its distribution made by it during the

period.
The taxpayer company appealed against the refusal of that claim to repayment. At the hearing before the commissioners it was common ground (a) that if the right to repayment had arisen, ACT of

Elliss (Inspector of Taxes) v ICI £17.6m was repayable and (b) that no assessment to corporation tax had by then been made on the taxpayer company for its 1981 period.

The crown appealed against the commissioners' determination that

the taxpayer company was entitled to the repayment claimed.

Section 127(1) of the Finance Act 1981 provided for a deduction for SPD, in computing the amount of liability to corporation tax.

Section 127(5) provided that:

"Where, because of a deduction made under subsection (1) above in

computing for corporation tax the amount of a company's income of any kind, the amount of advance corporation tax which can be set against the company's liability to corporation tax for an accounting period is less than the amount of dvance corporation tax could have been set against that liability if the deduction had not been made, then, if a claim in that behalf is made by the company not later than two years after the end of that accounting period an amount of advance corporation tax equal to the difference shall be repaid to the

Section 17(1) and (3) of the Oil Taxation Act 1975 contained similar provisions relating to PRT. SPD was abolished by section 132 of the Finance Act 1982.

Mr Robert Carnwath for the Crown: Mr Peter Whiteman, QCr and Mr Terence Mowschenson for the taxpayer company. MR JUSTICE PETER GIBSON

before the commissioners in August. 1982 the taxpayer company's right to repayment of ACT had already The Crown argued that the right to repayment arose on the making of an assessment to corporation tax for the relevant period or, in the case of a company making no profits, the date when the inspector of taxes sgreed that no tax was payable. In the alternative it

contended that that right arose on

payable" date.
Section 127(1) and (5) were the crucial provisions. Mr Whiteman said that all the conditions precedent to the making of a valid claim had been satisfied by the taxpayer company and the amount of the repayment had been agreed with the inspector before the hearing of the appeal. He contended that there was no express or implied restriction in section 127 excl the right to repayment or leading to a deferment. He relied on section 42(1) and (7) of the Taxes. Management Act 1970 as being applicable to the making of the claim and pointed to the mandatory

The subsection required that the following conditions be satisfied for a company to acquire a right to repayment of ACT:

(i) a deduction had to have been

made under section 127(1) in computing for corporation tax purposes the amount of a company's income for the accounting (ii) the amount of ACT to be set

against the company's liability to corporation tax for the accounting period was less than the amount of ACT which could have been set against that liability if the deduction had not been made, and (iii) a claim was made by the

company not less than two years after the end of the accounting As to (i) it was common ground

that SPD had been paid and that it fell to be deducted from the taxpayer company's income. What was in dispute was whether that deduction could be said to have been made before the three dates for the which the Crown contended.

As to (ii) it was common ground As Io (ii) it was common ground that the amount of ACT which could be set against the taxpayer company's liability to corporation tax was less than the amount of ACT which could have been set against that liability but for the deduction that fell to be made under section 127(1).

What was in dispute was whether as the Crown claimed, the reference to setting ACT against corporation tax liability imported a reference to section 85 of the Finance Act 1972. No dispute arose as to the date of

Mr Carnwath said that the reference in section 127(5) to the deduction having been "made" was, in its context of a computation for corporation tax, a reference to what was done by the assessing authority. But why should it matter whether or not an inspector had taken some formal step? Why should the arising of a right to repayment in a non-profit making period depend on an agreement by an inspector that no tax was payable? Section 127(5) contained no reference to an assessment and provided no more than the requirement that the statutory conditions for the making of the deduction were satisfied.

If there was no agreement as to the deduction then that was a matter that could be determined on an appeal from the refusal of a claim. As the present case showed, there were circumstances in which no practical difficulty arose over the deduction that could readily be computed and agreed: there was no justification for implying as a further condition the taking of some formal step by an inspection before a deduction could be said to have

Section 85 of the Finance Act 1972 - the provision requiring ACT paid by a company in respect of any distribution made by it in an accounting period to be set against its liability to tax on any income charged to corporation tax – did not assist the Crown's case, it followed that section 127(5) did not support the Crown's argument that there was to be a deferment of repayment of ACT until an assessment hadbeen made. At the date of the hearing before the commissioners the taxpayer company had fulfilled the conditions required by section (27(5) and were thus entitled to repayment of ACT of

£17.6m. Solicitors: Solicitor of Inland

round for granting leave to appeal

to the High Court.
It was not if his appreciation that

the Court of Appeal might take a different view had no more solid a basis than that was in the nature of

Appealing from arbitrations

Antaios Compania Naviera SA
Wark Saville, QC and Mr Bernard
V Salen Rederierna AB
Mark Saville, QC and Mr Bernard
Eder for the charterers.

Before Sir John Donaldson, Master of the Rolls, Lord Justice Ackner and Lord Justice Fox

[Judgment delivered July 8] Subject to the exceptional situation contemplated by section 1 (6A) of the Arbitration Act 1979 (which barred any appeal to the Court of Appeal from the grant or refusal of leave to appeal to the High Court unless the High Court itself granted leave). Parliament had made it clear that it was content and indeed required that the decision whether to grant or refuse leave to appeal to the High Court should be left exclusively to the discretion of the judges of the High Court.

The Master of the Rolls so stated when the Court of Appeal in reserved judgments (Lord Justice Ackner dissenting) dismissed an appeal by the appellant owners Antaios Compania Naviera SA from Mr Justice Staughton's refusal on November 19, 1982, of their application for leave to appeal to the High Court against an arbitration award dated July 9, 1982, arising from a dispute with the respondent charterers. Salen rederierna AB.

The MASTER OF THE ROLLS

said that the judge had refused the owners leave to appeal to the High Court under section 1 (3) (b) of the 1979 Act against an arbitration award but had given leave to appeal to the Court of Appeal and invited that court to consider whether he should have done so.

The judge considered that the arbitrators were probably right in their view that the owners had by their view that the owners had by their own inactivity lost any right of withdrawal of the Antaios and it would follow that, applying The would follow that, applying The Those factors might well have to the parties, or one on which there was a difference of judicial opinion.

Those factors might well have to the parties, or one on which the would follow that, applying The printing account within the last of the parties, or one on which the world in the parties, or one on which the world in the parties, or one on which when the parties are the parties, or one on which the parties are the parties and the parties are the parties would follow that, applying The Nema [1982] AC 724) guidelines, leave to appeal to the High Court should be refused.

Declinear had made it close that

Parliament had made it clear that subject to the exceptional situation contemplated by section 1(6A) of the 1979 Act it was content and the 1979 Act it was content and indeed required that the decision whether to grant or refuse leave to appeal to the High Court should be left exclusively to the discretion of the judges of the High Court which, in the light of Order 73, rule 6, of the Rules of the Supreme Court meant the judges of the Commercial Court. That was understandable because of

the exceptional situation con-templated by section 1(6A) was one, his Lordship thought, in which a judge of the High Court wanted to have a "second opinion" on the principles which should guide the

exercise of his discretion. The judge had been right to grant leave to appeal to the Court of Appeal.

His Lordship did not accept the submission that leave to appeal to the Court of Appeal should also be given where the issue raised by the award was of general interest or Importance, of particular importance to the parties, or one on which there was a difference of judicial

general Nema guidelines in deciding wheather or not to must leave to appeal to the High Court, but seemed to have no bearing on whether a decision having been given to grant or refuse leave to appeal to that court, that decision should be open to reconsideration by the Court of Appeal.

As to leave to appeal to the High Court under section 1 (3) of the 1979 Act the judge had seled the

1979 Act, the judge had asked the general question whether where a judge had formed a firm view that the arbitrator was probably right, the fact that the Court of Appeal

appellate courts. It was quite different if there were known to be different schools of thought among different schools of thought among the judiciary. In such a case leave to appeal to the High Court should be given provided the resolution of the issue would substantially affect the rights of the parties (section 1 (4) of for leave to appeal under section 1 (7) of the Act.
The decision was one for the

> discretion of Mr Justice Stangarton, his Lordship could detect no error in the principles applied and if the matter had been one for his own discretion he would have exercised it in the same way.
>
> LORD JUSTICE ACKNER said that with all proper diffidence he would have allowed the appeal. As regarded the basis of appeals to the Court of Appeal, the philosophy of the 1979 Act was to favour finality in arbitration and so to discourage

discretion of Mr Justice Staughton.

If the judge concluded even where there was a substantial and arguable point of law, that the arbitrators were probably right, he must say so and refuse leave to appeal to the

Court of Appeal. LORD JUSTICE FOX agreeing in dismissing the appeal said that section 1 (6A) of the 1979 Act must have been intended in the interests of finality to tilt the balance heavily against appeals beyond the High Court.

Valuing shares in unmarried couple's joint home

Walker v Hall

Before Lord Justice Lawton, Lord Justice Kerr and Lord Justice Dillon [Judgment delivered June 30] A counte who purchased a house family home though not married to each other and who subsequently parted were held to be entitled to beneficial interests established by

ine, not when cohabitation ceased.
The Court of Appeal allowed in part an appeal by the defendant, Mr Zacharia Hall, of 33 Foxberry Road, Zaciaria Haii, 61.35 Poxiberry Road, Brockley, London, and dismissed a cross appeal by the plaintiff, Mrs. Hazel May Walker, of Cordwell Road, Lewisham, London, from a decision of Mr John Mowbray, QC, sitting as deputy judge of the Chancery Division on November 19, 1981, who held, on an application by Mrs Walker under section 30 of the Law of Property Act 1925, inter alia, that 33 Foxberry Road was held on trust for

their contributions to the nurcha

money and valued at the present

the parties in the proportion of one quarter to Mrs Walker and three quarters to Mr Hall, Mr Steven Whitaker for Mr Hall; Mr Richard Jenkins for Mrs Walker. LORD JUSTICE DILLON said

LORD JUSTICE DILLON said that in December 1967 Mrs Walker and Mr Hall began living together in a house owned by Mr Hall, and from their pooled earnings payments under the mortgage and certain savings were made.

In May 1972, 33 Foxberry Road was acquired in their joint names as a family home. The total outlay was £3,580 provided as to £195 each out of joint savings as to £10000 by a of joint savings, as to £1,000 by a bank loan for which both were equally liable and as to the balance out of the proceeds of sale of Mr

Hall's house. Little more than a year later in July 1973. Mrs Walker left. Only 2270 of the loan had by then been repaid. Mr Hall continued to live in the house and to make the repayments the loan being finally

repaid in 1975. Mrs Walker made no claim against Mr Hall until 1977 and commenced the present proceedings in May 1979. The basis of the judge's approach was that where a house was acquired in the joint names of a man and his mistress the court would find out how much of the total outlay had been provided by each and hold that the house belonged to them beneficially in the proportions of their respective financial contributions.

In calculating the respective financial countributions of the parties, the judge credited Mrs Walker with having provided one half of the bank loan, but she did not in fact repay half the loan, and there quest to be an adjustment as there ought to be an adjustme that Mr Hall could be recouped in respect of the repayments made

after Mrs Walker left. It was said on behalf of Mr Hall that Mrs Walker's share ought to be valued or quantified by reference to the value of the house in July 1973 when she left and the cohabitation ceased, with the result that the should take no part of the not inconsiderable subsequent rise in

the value of the property.

The judgments of Lord Denning,
Master of the Rolls, and Lord
Justice Dunn in Hall v Hall (The
Times, April 4, 1981; 3 FLR 379), to lay it down as a general rule that where a family home was in joint names of a man and his mistress the share of the mistress was to be valued and quantified according to the value of the house at the date consistation ceased.

But in Gordon v Douce (The Times, January 18, 1983; [1983] ! WLR 563), Lord Justice Fox concluded that Hall v Hall could not, as a matter of authority, be regarded as establishing a rigid rule that the date of valuation of the shares in cases concerned with mistresses must be the date of

The reason put forward for

valuing Mrs Walker's share of the house as at July 1973 when she left

an end. The true position was that when Mrs Walker left and co-habitation ceased, the purpose of the trust, in the sense of the purpose for which the house had been bought, came to an end.

But the trust for sale, imposed by statute as a result of the transfer of the property into joint names, did not come to an end, but would inevitably continue until either the property was sold in execution of the trust for sale, or one party, by boying the other out, became solely and absolutely entitled to the

property in equity. A fortion the beneficial interests of both parties established by their contributions to the original purchase of the property, would not

automatically cease or be quantified as fixed sums on the cesser of cohabitation.

Unfettered by Hall v Hall, there was no reason in the circumstances why Mrs Walker's interest in the house should be valued or quantified at the date when she left.

It should be valued at the present Where, as in the present case, a where, as in the present case a house, intended to be the family home of a man and woman who were living together as if man and wife, had been conveyed into their joint names it was relatively easy to conclude that the reason why the house was acquired in joint names was that the parties intended that they should each have a beneficial interest in the house.

If there was no further evidence to indicate the extent of those interests, the conclusion would be that equity followed the law and the parties holding the legal estate as joint tenants were entitled ben-

efficially as joint tenants also. that where purchase money for property acquired by two or more persons in their joint names had been provided by those persons in unequal amounts, they would be beneficially entitled as between themselves in the proportions in which they had provided the purchase money. That was the basic doctrine of the resulting trust.

That purely financial approach would seem to accord with the inherent probabilities where a property had been acquired at an investment or for commercial purposes. However, it was more debatable where a house bought as a

family home was concerned.

But the House of Lords bad indicated in Petitit v Petitit (1970) AC 777, 817) and Gissing v Gissing (1971] AC 886, 899-900) that there was no special class of family assets which fell to be treated under the law of trusts in some way different

from other assets. Accordingly, it was not open to the court, in the absence of specific evidence of the parties' intention, to hold that the house belonged beneficially to Mr Hall and Mrs Walker in equal shares, potwithwanter in education to the purchase price, simply because it was bought to be their family home and they intended that their relationship

Equally, it was not open to the court to "top up" Mrs Walker's share beyond what it would be on the more basis of her fenancial contribution, on some broad notion of what would be fair simply

11100

family home.

The judge's proportions of one quarter to Mrs Walker and three-quarters to Mr Hall were in principle right, subject only to adjustment for the appropriate proportion of the bank loan transment made by Mr. Hall after. proportion of the cank toan repayments made by Mr Hall after separation, and the appeal would be allowed only to the extent of directing such recoupment to Mr

CLIFFORD GRANT ON 01-837 1326

The Times Guide to career training

Be prepared for false starts

Do not despair if the job of your dreams, or indeed no job at all has materialized when the time comes to leave university. It is not an end to all prospect of a worthwhile career if you have not been taken on by one of the handful of large organizations who go on the academic milk round every year. The only problem in finding a niche in companies which do not regularly recruit graduates is that it requires initiative in identifying an appropriate employer and convincing him or her of your usefulness.

Most of the graduates we interviewed in compiling this series of articles found the process to be one of trial and error. The examples we have chosen happen to be self-employment, the public relations side of communications and a medium-sized engineering company. But they could equally have involved building societies, selling, market research, or trade associations. These are all areas which traditionally have taken on more school leavers and school of life" students than graduates as raw recruits.

In such organizations there is frequently no clearly defined path for progression from trainee to management. It is therefore extremely difficult to trace lines of status and responsibility from the outside. This may mean several false starts before the recruit can find a job ladder which he or she wants to climb. Once the

In a series of four articles, Patricia home. Yet parents can not only provide material for work study, but alternative careers for graduates who have either not found a job, or who have to look again for employment, making use of experience and qualifications gained in other fields.

ladder has been identified, however, intelligent persistence usually pays off in getting an entry - particularly if the applicant can narrow the gap between abilities and job requirements in the

intervals between refusals.
Identifying the requirements of a job is often an intelligence test in itself. Specifications in advertisements are frequently misleading. Personnel and careers advisers tend to talk in terms which are too broad to be of much help and job labels are worse than useless. The best way is to treat the search for employment as an academic exercise and apply the same

Talk to as many people working in as many different organizations as possible and try to observe them in their working environment. Parents may be as good a starting point as any if only because they have a vested interest in helping their offspring towards economic independence. It is surprising how many youngsters do not actually know what responsi-bilities their parents carry away from also introductions to colleagues and

friends in other fields.
Once inside an organization,
canteens can make useful observation posts from which to examine culture and hierarchy, and also to collect introductions for further research. Most people enjoy talking about their jobs and may be prepared to give demonstrations. These should show the sort of practical skills - dealing with telephone queries, entering data on a computer terminal, setting up meetings etc. which a prospective applicant might find worthwhile to acquire.

It is hard to remember, when you have just finished your finals, but to most employers a degree mainly represents proof of intelligence plus ability to work to a defined objective. Employers seeking workhorse indians are extremely wary of aspirant chiefs. This is one reason why a methodical approach to a job application, backed by sensible research and some personal ingenuity, is much more likely to produce results than a blanket spread of pre-printed curriculum vitae's posted to anonymous recipients.

Next Week: case histories of fou graduates hoping to work in public relations, who are all now taking part in an experimental training pro-

Entering an uncertain world

Our elders tend to warn, during our years in education, that "you'll have to change when you get a real job."

We are usually told that we must be education to the compromore conformist in our dress, grooming, speech, timekeeping and social behaviour, show greater respect for authority; and must work long and regular hours, relieved by holidays which are far shorter than those we

The extent of these particular changes is usually much exaggerated and russion us adapt to them quickly and easily, but we are rarely warned about the most fundamental changes of all which are concerned with the way in which we work. Even most employers fail to explain these changes, so our awareness of them tends to develop only slowly during

our early years in work.
In school and higher education the end result of our work is to be able to provide "ideal answers" to given problems. The syllabus we follow ensures that we are given access to all the information we are likely to need to answer the questions which may be put to us. We are also given guidance on the reliability of our information sources - so we usually know if a particular statement is a fact or an opinion, or if an explanation of some phenomenon is based on a rigorously proven "law" or is only a hypothesis. If we are given a piece of academic work to do, we are normally given adequate time to complete it satisfacmise of work

The world of employment, particularly in industry and commerce, is very different. The questions we face cannot be confined within a perdeter-mined syllabus because the world within which organizations have to work is constantly changing. We rarely have access to all the information we need to produce answers which will be one hundred per cent right.

Often we cannot accurately assess the reliability of our information sources. We rarely have enough time to evaluate all the information available to us before we have to arrive at an answer. Thus we must often be satisfied with producing the best answer we can within the time and from the information available to

In education the answers we produce are the end product of our work. In employment we use the answers we produce to make decisions which will lead to action. Often decisions cannot be readily reversed - so we must then make them work even if we subsequently discover that better alternatives were available to us. We have to live with the consequences of our decisions.

In the certain world of education we can expect to be penalized for making mistakes. In the uncertain world of employment it is usually argued that the person who never made a mistake, never made a decision. The successful person is often defined as one who makes more right decisions than wrong, and who never makes the same mistake twice.

So in moving form education to employment, we move from a world of relative certainty to one of considerable uncertainty - within which we are expected to take calculated risks.

As students we work alone and to personal targets. If occasionally we work with others, it is usually with a peer group of our own choice. At work we normally work within a team which is not of our choosing and to shared objectives. Our individual work affects and is affected by others. We must clearly understand how our own function interacts with those of others and with the organization as a whole. To achieve the willing collaboration of the team, we must combine the ability to argue our own point of view assertively and persuasively and the ability to listen and learn from others - making compromises when necessary.

It is this transition from solitary effort in a certain world to collabora-tive risk-taking which is at the heart of the move from education to employment

Graduate Appointments

3'A' Levels

Time now to think about Sponsorship

Good A levels or equivalent examinations in 1984 could for a Financial Career qualify you for a Midland Bank Studentship at University, and a real head start on a management career in finance.

How the schemes work. Each year a limited number of students are selected for sponsorship commencing with one year's accelerated training in the Bank on full pay. Then, they go to Loughborough University to read for a BSc Honours Degree in Banking and Finance -or. if they see their future on the international side of banking, to The City University in London to read for a BSc Honours Degree in Banking and International Finance. In addition to the normal education authority grant for the three years of University study, students receive a further grant from the Bank and undertake vacation work in the summer

After University, graduates return for further training at Midland Bank, with a view to reaching responsible positions in their mid-twenties. Full managerial status

APPOINTMENTS

GRADUATING?

We are currently working with several image publishers of business journals who are look-ing for graduates to train as advertiserant sales executives.

A. R. Ward (CRS/282),
Lockyer Bradshaw & Wilson Limited.
178 North Gower Street London NW1 2NB

You're just out of university or college.

You've gained a good degree in engineering, mathematics, other sciences, or provided that you are also numerate - in one of the arts or social sciences.

And now you are also further ate — in one of the arts of social sciences.

And now you're looking for your first job.

What do you know about iBM? We develop, manufacture, market and maintain information processing products from large mainframe computers to personal computers, and from word processors to typewriters. We employ 15,000 people in the UK

Until you meet us you cannot know of the career opportunities we are offering ambitious men and women to sell and help install these systems - the scope, the potential and the rewards are excellent. Our training will direct your energies into one of the most interesting and exciting environments you'll find.

Sales Representatives

You'll be meeting customers who can vary from multinational companies to one man operations. You'll have to understand their business thoroughly to respond to their needs and to appreciate their problems before you come up with the answers. And they'll have to be the right answers.

But your responsibility doesn't end when a system is Installed. You'll keep in touch with your customers as they grow, meeting their new requirements as and when they arise. At the same time, you'll be looking for new business opportunities, keeping one step ahead in an increasingly competitive field.

Systems Engineers

You'll work closely with your sales representative as a vital part of the marketing team. In your career you'll wear many hats: programmer, analyst, operator, management consultant, teacher and diplomat. With only a few years experience many systems

engineers move into extremely successful sales careers.
Initially you'll provide full marketing and technical support, helping our sales representatives and guiding our customers and their staff on all aspects of using our new technology. Your expertise will be essential before and after our systems are installed. If problems arise you'll be expected to provide fast and effective solutions.

We are looking for new and very recent graduates to fill these vacancies. But we shall be even more interested in you as a person; your ability to relate to and communicate with others and your potential for development are also important.

So, if you would like to know more about your career prospects with IBM please write briefly for further details and our application form, to: John Whelan, Graduate Recruitment, IBM United Kingdom Limited, P.O. Box 41, North Harbour, Portsmouth, Hants, PO6 3AU. Mark the envelope and your letter with the ref: T/SSE

Many safety lapses claimed

By Rupert Morris

Serious lapses in British Airways safety procedures have by a British Airways pilot, who camerged in the aftermath of the said that safety standards in Scilly Isles helicopter tragedy, helicopers had been the subject

Times flew to the Scillies earlier increase in incident reports last week, and was identified on her ticket not by her name, but cant vonly as body - a macabre ance. coincidence. This failure to A record passengers' names has that North Sea helicopter pilots made more difficult the task of had become increasingly ancontacting relatives

passengers were allowed to walk in passenger traffic by a along the helicopter gangway to stringent efficiency drive, reductake photographs even though the seatbelt signs were still illuminated.

Cabin staff did not demonstrate the use of safety equip-ment, and a barely audibly announcement that safety instructions were in passengers' seats proved inaccurate, only airsick bags visible.

The Times was also contacted despite its generally good y a British Airways pilot, who reputation. Only last Wednesdid that safety standards in day one suffered from engine although there is as yet no evidence that these contributed directly to the accident.

A journalist working for The there had been a sudden the Scillian and the limit of the contributed that the Scillian and the limit of the contributed that the scillian and the limit of the contributed that the scillian and the limit of the contributed that the scillian and the limit of the contributed that the scillian and the limit of the scillian and the limit of the scillian and the limit of the scillian and the scillian a pilots noting down any signifi-cant variation in flight perform-

A separate source confirmed ontacting relatives. Xious about safety as British
The same source said that Airways had responded to a fall ing ticket prices by as much as 40 per cent.

Specific lapses to be reported included one on March 1 this year when lines to the air speed indicator and altimeter had been crossed.

failure over the North Sea. More serious technical failures included the snapping of a rotor blade, which led to the loss of 13 lives aboard a Norwegian S-61 in the North Sea in 1978. Rotor blade checks were made on all S-61s, but since then another Norwegian beliconter of the same make has helicopter of the same make has suffered a similar fate.

Gearbox failure has been another problem, and was the reason for a British Airways S-61 ditching in the North Sea on May 11. In the Scillies however

neither gearbox nor rotor blade failure seems likely, since it is understood that the helicopter hit the water with its rotor blades still turning.

The helicopter involved, the pilot error, the likeliest expla-Sikorsky S-61, has a recent nation at this stage would history of technical faults appear to be instrument failure.

Sikorsky crash mystery

Lets hope we stay there.

other survivors, saying: "I

Average house prices rose by 4.5 per cert over the past three months, equivalent to an annual increase of around 19 per cert according to The Times/Haffax House Price Index, in June, the index rose to its highest ever level of 193.3, representing an increase of 1.5 per cert on last month's figure. The average price of second-hand dwallings seasonally adjusted now stands at \$22,525, nearly 4 per cent higher than 6 months ago and 12 per cent above lest year's figure. On an unsubjusted besist, the average price of second-hand dwallings rose sharply over the month by 2.7 per cent to \$23,155.
Regionally, the West and East Midlends

Regionsity, the West-and East Midlands recorded the largest percentage increases (urradiusted) over the quester with 12.4 per centified 10.7 per centified the percent respectively.

Nature notes

sky passenger helicopters - 26 lifejackets, two inflatable din-ghies, one life raft and five emergency escapes, as opposed to four.

The two pilots probably survived because they had their own doors in the cabin. Rescue helicopter pilots from

RNAS Culdrose in Cornwall, who had flown immediately to the scene, said that visibility was so bad that flares fired from the lifeboat to guide them were not spotted immediately. The most graphic account of

the crash came from Mrs Lucille Langley-Williams, a Scilly Isles councillor from St Mary's, who was returning from a meeting of the area health authority in Penzance. She was with another member, Mrs Megan Smith, aged 60, from St

Mrs Langley-Williams, who is in hospital in St Mary's with three broken ribs, said: that

shortly before the helicopter was due to land she had moment in my life to see the suggested that for the first time coxswain's face as he reached coxswain's face as he reached in many years they should read down to me over the side of the the helicopter's emergency inlifeboat. It is a miracle, it really structions. They had been told Mrs Langley-Williams' hus-band said from his St Mary's they were flying at about 100 feet and she had replied laughingly to another person:

home last night that his wife had kept Mrs Smith affoat by She said yesterday: "I reresting her head on a floating member a bang and it must have been when we hit the Suitcase. "When it happened the water. I remember thinking we're going under. I started helicopter was filling up with

struggling with the door handle. It was difficult. I twisted and pulled frantically and finally it wedding ring in the process. She water and my wife could not get pulled frantically and finally it wedding ring in the process. She opened and I took a deep breath and Megan came out of the but it seemed a long long way same door." This was the first fatal

She found Mrs Smith, who accident involving a BA Sikorwas already on the surface with sky since the company started using them in 1977. It could be a year before :

Mrs Langley-Williams said: final report on the crash is "I kept saying yes you can" published, but early action will We kept together. We could be taken if the investigation hear the choppers but couldn't points to possible defects in the

Letter from Kielce

Wedding-day finance down on the farm

Apart from potatoes, which are being chewed voraciously by shock troops of Colorado beetles, it looks like being a good harvest in Poland this year. Good enough, at any rate, for the farmers to drop their scythes, put on clean shirts and walk across the fields to Leszczyny village to spend a sun-baked Saturday afternoon celebrating the wedding of Bronislaw and

The countryside is the right place to see concepts such as love and marriage, economic reform and the energy crisis, stripped to their grubby

The hotel where the local farmers have a raucous discotheque at weekends is, for example, allocated a monthly supply of 90 kg of meat to feed 150 guests. The meat of course lasts only a matter of days and the hotel has to use unofficial means to feed its guests. So much for profit-based economic reform.

Petrol stations in the area can sell petrol only in return for ration coupons - farmers are given a more generous allowance - but an unofficial surcharge of 10 zloties a litre, pocketed by the attendant secures a full tank. The petrol is written off as evaporation.

Marriage turns out to be a similar business. In the cities marriages have long-been a way of sidestepping the housing shortage. A popular film of the Gierek era depicted a young worker activist who had been allocated a flat, providing that he was married.

The girls, desperate to get away from their parental away from their parental homes, tumbled over each other to win a proposal. Not surprisingly, the divorce rate, except in the devout countryside, is high.

There did not seem much doubt about the immediate cause of the wedding between Bronislaw and Ewa. Dressed in demure white, Ewa could not disguise the fact that she was four months pregnant. Her condition may have explained the irritability of the priest who started his service on the dot at five o' clock, even though the bride and her entourage had not even arrived.

Fifteen minutes into the service, four horse-drawn wagons, diverted from the harvest, arrived in the square outside the church and the bride, her family and friends spilled out

Inside, the priest, assisted by a hefly, sunburnt altar boy, was sprinting through the service, pausing only to reprimand the couple for their lateness and complaining that they had not brought an icon of the Virgin Mary to be blessed.

It was a typical bucolic scene, described and dissected many times in the classics of Polish literature. But as the newly-married couple left the church and the priest sped away in a Polski Fiat to another appointment, the mood changed and it became clear that a wedding in the country is an intricate financial transaction, as complex as feeding diners at a restaurant or filling petrol tanks.

While the bridgeroom's friends were kissing him, the old gap-toothed ladjes began to argue and shout in indignation about the priest's words. "If you pay 5,000 zloties for a blessing you expect to get it." one woman said, her arms crossed. Another disagreed but was promptly and spectacularly kicked by her husband out of church grounds.

The tone of the complaints was that the priest had agreed to carry out the wedding despite a crowded schedule – the couple agreed to have a picture of the Virgin Mary blessed in their name. This in turn would involve a donation to the church of 5,000 ploties two weeks wages for a good farm labourer.

The couple tried to keep aloof from the dispute and they too left by car to be photographed. The deal had almost certainly been contracted by their parents, who must also have worked out what land would change hands as a result of the new union.

The revellers, the business having been done, clambered aboard the wagons. The horses with begonias stuffed under their tackle, stamped impatiently in the heat. The vodka began to rotate

the band started to play again. but the wagons stayed where they were, in the centre of Leszczyny, with its wells and INTS wooden general store. The annual Polish bicycle

race, the Tour de Pologne, was due to pass through the village and a new cause for excitement had been found. For the time being. Ewa and Bronislaw had been forgotten.

Birds are not much affected by the hot weather. There are many insectivorous birds that hardly ever drink water, getting all the liquid they need from caterpillars and worms. Some drink the morning dew. Woodpigeons and other doves are more regular drinkers unlike most species, they have the capacity to suck water through their bills-instead of scooping it up and throwing it back with a toss of the head. They can usually find a pond or stream within flying distance.

More and more flowers are coming into full bloom. New dandelion-like species continually appear, where the hawksbeards were flourishing a month ago, the leafy hawkweed now takes their place, a taller plant with many yellow heads. Nippiewort is a daintier member of the same family: it is much sought after by insects on sunny mornings, but closes in the afternoon, or when clouds come up. On readsides and railway embankments, soft yellow flowers are appearing on the woolly towers of great mullein.
